In addition to the schedule of salaries hereinabove provided and fixed for the employees of The City of San Diego in the Classified Service, each and every employee in said Classified Service, except those employees whose standard rate of pay is fixed herein in the sum of \$500.00 or more per month, shall receive each and every month during the fiscal year commencing July 1, 1948, and ending June 30, 1949, the sum of Seven Dollars (\$7.00); and said sum of Seven Dollars (\$7.00) per month shall be paid to said employees as a part of the regular monthly compensation provided by this ordinance for employees of the Classified Service.

Section 4. All classifications and rates designated in this ordinance by the number "(1)" carry a standard work week of forty-four (44) hours; those carrying the number "(2)" carry a standard work week of seventy-two (72) hours; and all others carry a standard work week of forty (40) hours. All classifications and rates designated in this ordinance by an asterisk (*) are based upon and include holiday work.

Section 5. (a) When a foreman is regularly in charge of the work of employees, some of whom are being paid at a salary which is only one rate lower than that of their foreman, the salary of such foreman may be increased to the next standard rate above that determined for his classification.

(b) A foreman classification in which the work is performed daily, and generally in which his duties must be performed under substantially less supervision and requiring performance of work at the journeyman level, such foreman may have his classification reviewed by the Civil Service Commission and the rate established on the basis of supervision of such journeyman.

Section 6. Except as otherwise provided in the Charter of The City of San Diego, and upon the recommendation of the head of the department, or appointing authority, and the approval of the Civil Service Commission, increase in salary, if sufficient funds are available, may be made in all positions included within any of the "Standard Rates" numbered 1 to 36, inclusive, as follows: For each six months of continuous service in a position, the increase in salary for such position, unless otherwise provided, may be approximately five per cent (5%) of the existing salary rate per month prescribed for the position, class or grade in which such employee is classified; provided, however, that not more than six (6) such seniority increases may be allowed in the same position. Notwithstanding any other provision in this section, increases in compensation within the limits provided for by any grade may be granted at any time by the City Manager, or other appointing authority, upon the basis of efficiency and seniority record after having first received the approval of the Civil Service Commission therefor.

Section 7. Whenever the duties of a position are of such a character as to require the employee holding the same to work regularly a number of hours per week in excess of the hours customarily worked by other city employees, upon the recommendation of the department head, or appointing authority, such employee may be paid at the next Standard Rate above the rate for the class in which such position is found, as herein provided.

Section 8. That Ordinance No. 3429 (New Series), adopted May 22, 1947, Ordinance No. 3476 (New Series), adopted July 15, 1947, Ordinance No. 3482 (New Series), adopted July 29, 1947, Ordinance No. 3524 (New Series), adopted September 2, 1947, Ordinance No. 3565 (New Series), adopted October 28, 1947, Ordinance No. 3702 (New Series), adopted March 23, 1948, and Ordinance No. 3706 (New Series), adopted March 30, 1948, be, and the same are hereby repealed.

Dollars (\$7.00) per month shall be paid to said employees as a part of the regular monthly compensation provided by this ordinance for employees of the Classified Service.

Section 4. All classifications and rates designated in this ordinance by the number "(1)" carry a standard work week of forty-four (44) hours; those carrying the number "(2)" carry a standard work week of seventy-two (72) hours. All others carry a standard work week of forty (40) hours. All classifications and rates designated in this ordinance by an asterisk (*) are based upon and include holiday work.

Section 5 (a) When a foreman is regularly in charge of the work of employees, some of whom are being paid at a salary which is only one rate lower than that of the foreman, the salary of such foreman may be increased to the next standard rate above that determined for his classification.

(b) A foreman classification in which the work is performed daily and generally in which his duties must be performed under substantially less supervision and require a less performance level, such foreman may have his classification reviewed by the Civil Service Commission and the rate established on the basis of supervision of such journeyman.

Section 6. Except as otherwise provided in the Charter of the City of San Diego, and upon the recommendation of the head of the department, or appointing authority, and the approval of the Civil Service Commission, increase in salary, if sufficient funds are available, may be made in all positions included within any of the "Standard Rates" numbered 1 to 36, inclusive, as follows: For each six months of continuous service in a position, the increase in salary for such position, unless otherwise provided, may be approximately five per cent (5%) of the existing salary rate of the position, class or grade in which such employee is classified; provided, however, that not more than six (6) such seniority increases may be allowed in the same position. Notwithstanding any other provision in this section, increases in compensation within the limits provided for by any grade may be granted at any time by the City Manager, or other appointing authority, upon the basis of efficiency and seniority record after having first received the approval of the Civil Service Commission therefor.

Section 7. ORDINANCE No. 3778
(New Series)

AN ORDINANCE PROVIDING FOR THE EXTENSION OF WATER MAINS AT THE EXPENSE OF APPLICANTS THEREFOR, AND PROVIDING FOR THE REFUND TO SUCH APPLICANTS OF A PROPORTIONATE SHARE OF THE COST TO BE PAID BY SUBSEQUENT APPLICANTS FOR SERVICE CONNECTIONS TO SUCH MAINS, AND REPEALING ORDINANCE No. 2786 (NEW SERIES), ADOPTED MARCH 7, 1944 AND ORDINANCE No. 3088 (NEW SERIES), ADOPTED OCTOBER 30, 1945.

BE IT ORDAINED, By the Council of The City of San Diego,
as follows:

Section 1. DEFINITIONS. The meaning of various terms as used in this ordinance shall be as follows:

"CITY" shall mean: The City of San Diego;

"MANAGER" shall mean: The City Manager of The City of San Diego or his duly authorized representative;

"DEPARTMENT" shall mean: The Water Department, Division of Distribution of The City of San Diego;

"APPLICANT" shall mean: A person, firm or corporation who applies for water service;

"EXTENSION" shall mean: A water main extension; and

"MAIN" shall mean: An existing water main in the water distribution system of The City of San Diego.

Section 2. When an application is made for water service which requires a water main extension to serve property not conventionally subdivided into city lots, the area shall be considered acreage, and the extension shall be made at the expense of the applicant as hereinafter provided.

The required extension shall originate at the nearest adequate existing water main as determined by the Manager and shall extend to and full length along the property to be provided with water service.

Section 3. The design, location, materials and standards of construction of any and all extensions shall be approved by the Manager.

(a) The design of an extension shall be based upon considerations of adequate capacity to meet the present and future requirements of the area to be benefited, of distribution system operation and efficiency, of maintenance requirements, and of anticipated life of such extension.

(b) Extensions shall generally be located on the south and east sides of dedicated City streets or on rights-of-way granted to The City of San Diego for water main location. Under no circumstances shall any structure be placed over or around any water main or extension, unless provision is made for ready and easy access to any and all parts or points of such main or extension.

(c) Materials and standards of construction shall be those which have been adopted and are used by the Department for the area and class of service to be provided.

Section 4. The cost of an extension to or in an unconventionally subdivided area shall be borne by the applicant requiring such extension, in conformity with the following provisions:

(a) Upon receipt of an application for water service which requires an extension, when such application is properly filled out and provides an accurate description of the property to be served, the Manager shall cause the Department to prepare a map showing the area to be benefited by such extension and to make an estimate of cost of installation of the proposed extension. The applicant shall then deposit a sum of money equal to this estimated cost, with the City. Following receipt of such deposit, the Manager shall cause the proposed extension to be con-

structed. Or, upon approval of the Manager and subject to specifications of and inspection by the Department, the proposed extension may be installed by private contract at the applicant's sole expense with no refund provisions applicable thereto. Upon completion of an extension which has been provided for by a deposit with the City, the actual cost of making such extension shall be determined. The actual applicable cost as determined in accordance with Section (d) shall be divided by the number of square feet in the area benefited by such extension, as determined by the Manager, and the resulting unit cost per square foot thus determined shall be the basis for making refunds to the applicant who made the deposit, and for determining the water main construction charges to be made for future service connections to the extension. In event the applicant's deposit for estimated costs of installation of an extension exceeds the actual cost of such installation, the excess shall be refunded to the applicant and in the event the deposit is less than the actual cost of installation the applicant shall be liable to the City for such deficiency.

(b) Where subsequent connections are made to the extension and where a portion or all of the cost of main extensions was paid by the applicant, the water main construction charges received by the City for subsequent service connections to the extension for a period of ten (10) years following the date of completion of the extension, the applicable proportion of the cost shall be refunded to the person who paid for such extension or to his successors or assigns as hereinafter provided.

Sale of the property herein referred to and conveyance of the title thereto shall constitute an assignment

to the purchaser of said property, and payments of such amounts as become due to the maker thereof or the purchaser of said property shall constitute a discharge of the obligation to the City of the amount so paid.

After the expiration of the ten-year period, any water main construction charges subsequently received shall become the sole property of the City.

A water main construction charge for each and every service connection to an extension installed under the provisions of this ordinance shall be paid before such service connection is made. The water main construction charge is separate from and is in addition to the service connection charge required by any other ordinance of the City. The service connection charges as defined above are not refundable. Water main construction charges shall be determined by multiplying the number of square feet of ground area to be benefited by such service connection by the unit cost per square foot as defined above. Any property lying within the area to be benefited by the extension, as determined in part (a) of this section, shall pay a water main construction charge as determined above before water service will be supplied such property. Water service shall be discontinued immediately when found to be supplied to any property within the area benefited if the water main construction charge for service to that property has not been paid.

(c) The cost of installing a water main extension less than six inches in diameter including pumps, tanks and appurtenances, shall be borne entirely by the applicant and there shall be no refund provisions for future service connections to such an extension.

(d) Cost of making extensions six inches and eight inches in diameter and feeder mains from the nearest

adequately supplied point in the water distribution system and including pumps, tanks and other appurtenances, shall be charged against the applicant. If such extension is provided for by deposit with the City, the actual applicable cost referred to in section 4, paragraph (a) shall be the entire cost of the six inch and/or eight inch pipe lines including facilities such as pumps, tanks and other appurtenances.

The applicable cost of making an extension larger than eight inches in diameter, when such larger diameter extension is recommended by the Manager, shall be determined as follows: The estimated cost of the water main including pumps, tanks and appurtenances, shall be provided for by a deposit made by the applicant and the difference in cost between an eight inch water main and the larger diameter actually installed shall be borne by the City. Subsequent water main connection charges shall be based on the estimated cost of an eight inch main, and the refunds to the applicant who made the deposits as hereinbefore provided, shall be upon such basis.

Section 5. All subdivisions shall have a complete water distribution system installed before such subdivisions are accepted by the City. The design and construction of such a water distribution system shall be approved by the Manager before such system is installed. The subdivider shall install the water distribution system at his own expense for all water mains which are eight inches in diameter or less. The system shall include a feeder from the nearest adequately supplied point in the City's water distribution system. In case a larger diameter than eight inches is recommended by the Manager,

the City will pay the difference in cost between an eight inch diameter main and the larger diameter main actually installed.

Section 6. Before any City street is paved with a permanent type of pavement, a six-inch or larger water main shall be installed in that street. The cost of installation of such a water main shall be borne by the property to be benefited by the water main.

Section 7. That Ordinance No. 2786 (New Series) of the ordinances of The City of San Diego, entitled, "An Ordinance providing for the extension of water mains at the expense of applicants therefor, and providing for the refund to such applicants of a proportionate share of the cost to be paid by subsequent applicants for service connections to such mains.", adopted March 7, 1944, and its amendatory ordinance No. 3088 (New Series) adopted October 30, 1945, be, and each of them is hereby repealed.

Section 8. This ordinance shall take effect and be in force on the thirty-first day from and after its passage.

Following provisions:

(a) Upon receipt of an application for water service which requires an extension, when such application is properly filled out and provides an accurate description of the property to be served, the Manager shall cause the Department to prepare a map showing the area to be benefited by such extension and to make an estimate of cost of installation of the proposed extension. The applicant shall then deposit a sum of money equal to this estimated cost, with the City. Following receipt of such deposit, the Manager shall cause the proposed extension to be constructed. Or, upon approval of the Manager and subject to specifications of and inspection by the Department, the proposed extension may be installed by private contract at the applicant's sole expense with no refund provisions applicable thereto. Upon completion of an extension which has been provided for by a deposit with the City, the actual cost of making such extension shall be determined. The actual applicable cost as determined in accordance with Section (d) shall be divided by the number of square feet in the area benefited by such extension, as determined by the Manager, and the resulting unit cost per square foot thus determined shall be the basis for making refunds to the applicant who made the deposit, and for determining the water main construction charges to be made for future service connections to the extension. In event the applicant's deposit for estimated costs of installation of an extension exceeds the actual cost of such installation, the excess shall be refunded to the applicant and in the event the deposit is less than the actual cost of installation the applicant shall be liable to the City for such deficiency.

(b) Where subsequent connections are made to the extension and where a portion or all of the cost of main extensions was paid by the applicant, the water main construction charges received by the City for subsequent service connections to the extension for a period of ten (10) years following the date of completion of the extension, the applicable proportion of the cost shall be refunded to the person who paid for such extension or to his successors or assigns as hereinafter provided.

Sale of the property herein referred to and conveyance of the title thereto shall constitute an assignment to the purchaser of said property, and payment of such amounts as become due to the maker thereof or the purchaser of said property shall constitute a discharge of the obligation to the City of the amount so paid.

After the expiration of the ten-year period, any water main construction charges subsequently received shall become the sole property of the City.

A water main construction charge for each and every service connection to an extension installed under the provisions of this ordinance shall be paid before such service connection is made. The water main construction charge is separate from and is in addition to the service connection charge required by any other ordinance of the City. The service connection charges as defined above are not refundable. Water main construction charges shall be determined by multiplying the number of square feet of ground area to be benefited by such service connection by the unit cost per square foot as defined above. Any property lying within the area to be benefited by the extension, as determined in part (a) of this section, shall pay a water main construction charge as determined above before water service will be supplied such property. Water service shall be discontinued immediately when found to be supplied to any property within the area benefited if the water main construction charge for service to that property has not been paid.

(c) The cost of installing a water main extension less than six inches in diameter including pumps, tanks and appurtenances, shall be borne entirely by the applicant and there shall be no refund provisions for future service connections to such an extension.

(d) Cost of making extensions six inches and eight inches in diameter and feeder mains from the nearest adequately supplied point in the water distribution system and including pumps, tanks and other appurtenances, shall be charged against the applicant. If such extension is provided for by deposit with the City, the actual applicable cost referred to in Section 4, Paragraph (a) shall be the entire cost of the six inch and/or eight inch pipe lines including facilities such as pumps, tanks and other appurtenances.

The applicable cost of making an extension larger than eight inches in diameter, when such larger diameter extension is recommended by the Manager, shall be determined as follows: The estimated cost of the water main including pumps, tanks and appurtenances, shall be provided for by a deposit made by the applicant and the difference in cost between an eight inch water main and the larger diameter actually installed shall be borne by the City. Subsequent water main connection charges shall be based on the estimated cost of an eight inch main, and the refunds to the applicant who made the deposits as hereinbefore provided, shall be upon such basis.

Section 5. All subdivisions shall have a complete water distribution system installed before such subdivisions are accepted by the City. The design and construction of such a water distribution system shall be approved by the Manager before such system is installed. The subdivider shall install the water distribution system at his own expense for all water mains which are eight inches in diameter or less. The system shall include a feeder from the nearest adequately supplied point in the City's water distribution system. In case a larger diameter than eight inches is recommended by the Manager, the City will pay the difference in cost between an eight inch diameter main and the larger diameter main actually installed.

Sale of the property herein referred to and conveyance of the title thereto shall constitute an assignment to the purchaser of said property, and payment of such amounts as become due to the maker thereof or the purchaser of said property shall constitute a discharge of the obligation to the City of the amount so paid.

After the expiration of the ten-year period, any water main construction charges subsequently received shall become the sole property of the City.

A water main construction charge for each and every service connection to an extension installed under the provisions of this ordinance shall be paid before such service connection is made. The water main construction charge is separate from and is in addition to the service connection charge required by any other ordinance of the City. The service connection charges as defined above are not refundable. Water main construction charges shall be determined by multiplying the number of square feet of ground area to be benefited by such service connection by the unit cost per square foot as defined above. Any property lying within the area to be benefited by the extension, as determined in part (a) of this section, shall pay a water main construction charge as determined above before water service will be supplied such property. Water service shall be discontinued immediately when found to be supplied to any property within the area benefited if the water main construction charge for service to that property has not been paid.

(c) The cost of installing a water main extension less than six inches in diameter including pumps, tanks and appurtenances, shall be borne entirely by the applicant and there shall be no refund provisions for future service connections to such an extension.

(d) Cost of making extensions six inches and eight inches in diameter and feeder mains from the nearest adequately supplied point in the water distribution system and including pumps, tanks and other appurtenances, shall be charged against the applicant. If such extension is provided for by deposit with the City, the actual applicable cost referred to in Section 4, Paragraph (a) shall be the entire cost of the six inch and/or eight inch pipe lines including facilities such as pumps, tanks and other appurtenances.

The applicable cost of making an extension larger than eight inches in diameter, when such larger diameter extension is recommended by the Manager, shall be determined as follows: The estimated cost of the water main including pumps, tanks and appurtenances, shall be provided for by a deposit made by the applicant and the difference in cost between an eight inch water main and the larger diameter actually installed shall be borne by the City. Subsequent water main connection charges shall be based on the estimated cost of an eight inch main, and the refunds to the applicant who made the deposits as hereinbefore provided, shall be upon such basis.

Section 5. All subdivisions shall have a complete water distribution system installed before such subdivisions are accepted by the City. The design and construction of such a water distribution system shall be approved by the Manager before such system is installed. The subdivider shall install the water distribution system at his own expense for all water mains which are eight inches in diameter or less. The system shall include a feeder from the nearest adequately supplied point in the City's water distribution system. In case a larger diameter than eight inches is recommended by the Manager, the City will pay the difference in cost between an eight inch diameter main and the larger diameter main actually installed.

Section 6. Before any City street is paved with a permanent type of pavement, a six-inch or larger water main shall be installed in that street. The cost of installation of such a water main shall be borne by the property to be benefited by the water main.

Section 7. That Ordinance No. 2786 (New Series) of the ordinances of The City of San Diego, entitled, "An Ordinance providing for the extension of water mains at the expense of applicants therefor, and providing for the refund to such applicants of a proportionate share of the cost to be paid by subsequent applicants for service connections to such mains," adopted March 7, 1944, and its amendatory ordinance No. 3038 (New Series) adopted October 30, 1945, be, and each of them is hereby repealed.

Three Pool Halls Found Illegally Near Schools

Three of San Diego's 46 licensed pool halls are within less than 300 feet of school buildings, contrary to city ordinance, Edwin James Cooley, city welfare director reported last night upon completion of a survey requested by the City Council.

The council ordered the survey Tuesday after Daniel G. Craig appealed the Welfare Bureau's refusal to approve a permit for a pool hall at 3537 Adams Ave., on the grounds it is only 276 feet from John Adams School.

STORY BRINGS ACTION

Craig claimed that Welfare Worker William E. Everson had led him to believe he would get a license for the place before he bought it. When he actually applied, Cooley turned the application down because of the 300-foot limitation.

Hearing Craig's claim, the council ordered Cooley to report Tuesday on the number of pool halls within 300 feet of a school that have been licensed since April 12, and the number of licensed pool halls operating within 300 feet of a school. On April 9, the Welfare Bureau assumed the duty of passing
