Section 2. Work to lay, construct, maintain, operate, repair, renew, change the size of pipe lines for the transportation of oil, petroleum, gas, gasoline, water and other substances, electric energy and communication by telephone and/or telegraph, in conformity with the terms and provisions of this ordinance, or to exercise any other privilege whatever under the terms of this ordinance, shall be commenced in good faith within not more than two (2) months from the granting of this franchise, and if not so commenced within said time said franchise so granted shall be declared forfeited by said Council. Said work must be completed within not more than one (1) year thereafter, and if not so completed within said time said franchise so granted will be forfeited by said Council; provided, that for good cause shown said Council may by resolution extend the time for the completion thereof not exceeding three (3) months.

Section 3. The franchise granted by the terms and provisions of this ordinance is upon the following conditions and limitations, to-wit:

1. The word "grantee," whenever used herein, shall be held to include the grantee or grantees, his, her, its or their successors and assigns.

2. That the said franchise and privilege granted hereby shall be held and enjoyed only upon the provisions and conditions prescribed by law and those contained in this ordi-

nance.

3. The term of said franchise and privilege shall be forty (40) years from and after the date of the adoption of this ordinance.

4. The grantee of this franchise shall have the right, subject to such regulations as are now or hereafter may be in force, to make all necessary excavations in said Sicard Street to maintain, operate, repair, renew, change the size of and remove said pipe lines, and any manholes, service connections and appurtenances necessary in connection with the use of said pipe lines.

5. The work to maintain, operate, repair, renew, change the size of and remove all pipe lines, manholes, service connections and appurtenances shall be performed in accordance with the provisions and conditions prescribed by law and of all applicable ordinances and regulations of The City of San Diego, and shall be conducted with the least possible hindrance to the use of the street for purposes of travel, and all excavations shall be backfilled and the surface placed in as good condition as it was at the time of beginning such work, and to the satisfaction of the City Manager.

6. The City of San Diego reserves the right to change the grade of the street over which the franchise is granted, and within a reasonable time after receipt of written notice from the Manager of said City of the City's intention to do so, the grantee of this franchise, at its own cost and expense, shall change the location of all pipes, manholes, service connections and appurtenances maintained and operated thereunder so as to conform to such change of grade.

7. The grantee of this franchise shall file with the City Clerk of said City, on or before the first day of April of each year during the life of this franchise, a statement, verified by the oath of said grantee, showing the total gross

The payment of said percentage of gross receipts by said grantee shall begin upon the date of the taking effect of this ordinance.

Any refusal by said grantee to file said verified statement, or to pay said percentage of said gross annual receipts, as hereinabove provided, within the time above provided, shall constitute a ground for forfeiture of said franchise, and all rights granted thereby.

8. That before any pipe lines or other facilities, not now installed in Sicard Street, are constructed or installed, said grantee shall notify the Public Works Department of The City of San Diego of such proposed installation or construction, and shall furnish said Public Works Department with a map or maps showing such proposed installation or construction.

That if any portion of said Sicard Street shall be damaged by reason of breaks or leaks in any pipe laid or constructed under this franchise, the grantee shall, at its own expense, repair such damage and put such street in as good condition as it was in before such break or leak, to the satisfaction of the City Manager of said City.

9. The grantee of this franchise shall have the right, during the period for which this franchise is granted, to transport oil, petroleum, gas, gasoline, water and other substances, electric energy, and communication by telephone and/or telegraph, through said pipe lines and service connections.

10. Said grantee shall not sell, transfer or assign this franchise, or the rights and privileges granted thereby,

without the consent of the Council by ordinance duly and regularly adopted.

11. Any refusal or failure by said grantee to comply with any of the terms and conditions of this franchise shall constitute ground for forfeiture of said franchise, and all rights granted hereunder.

12. In the event that this franchise is forfeited for any reason the grantee shall thereafter remove all pipes, conduits, attachments, appliances and equipment of every kind and character belonging to said grantee from the said Sicard Street, and shall put said street in as good condition as it was prior to such removal.

The salaries and compensations hereinabove provided for members of the Police Department and full-time lifeguards shall be compensation in full for work performed by said policemen and full-time lifeguards during a forty-four hour week during said fiscal year.

If it becomes necessary, in order to perform the duties of his office, a department head may require such employee to work in excess of the times herein prescribed, in which event said department head may, within his discretion, either compensate said employee for said overtime work by additional compensation at his regular rate, or allow said employee compensatory time off.

The salaries and compensations assigned to employees working part-time for said City shall be full compensation for the

actual hours or days in which said part-time employee is performing services for the City.

The salaries and compensations hereinabove provided to be paid to members of the Fire Department shall be compensation in full for work performed by the members of said department, as required under Section 58 of the Charter of The City of San Diego.

Section 5. (a) When a foreman is regularly in charge of the work of employees, some of whom are being paid at a salary which is only one rate lower than that of their foreman, the salary of such foreman may be increased to the next standard rate above that determined for his classification.

(b) A foreman classification in which the work is performed daily, and generally in which his duties must be performed under substantially less supervision and requiring performance of work at the journeyman level, such foreman may have his classification reviewed by the Civil Service Commission and the rate established on the basis of supervision of such journeyman.

Section 6. Except as otherwise provided in the Charter of The City of San Diego, and upon the recommendation of the head of the department, or appointing authority, and the approval of the Civil Service Commission, increase in salary, if sufficient funds are available, may be made in all positions included within any of the "Standard Rates" numbered 1 to 36, inclusive, as follows: For each six months of continuous service in a position, the increase in salary for such position, unless otherwise provided, may be approximately five per cent (5%) of the existing salary rate per month prescribed for the position, class or grade in which such employee is classified; provided, however, that not more than six (6) such seniority increases may be allowed in the same position. Notwithstanding any other provision in this section, increases in compensation within the limits provided for by any grade may be granted at

any time by the City Manager, or other appointing authority, upon the basis of efficiency and seniority record after having first received the approval of the Civil Service Commission therefor.

Section 7. Whenever the duties of a position are of such a character as to require the employee holding the same to work regularly a number of hours per week in excess of the hours customarily worked by other city employees, upon the recommendation of the department head, or appointing authority, such employee may be paid at the next Standard Rate above the rate for the class in which such position is found, as herein provided.

Section 8. Each member of the Classified Service, other than those employees described in Article XII of the Charter, who have been regularly in the employ of the City for at least one calendar year shall be entitled to the vacation with pay authorized by Rule X of the Rules of the Civil Service Commission.

(b) A foreman classification in which the work is performed daily, and generally in which his duties must be performed under substantially less supervision and requiring performance of work at the journeyman level, such foreman may have his classification re-viewed by the Civil Service Commission and the rate established on the basis of supervision of such journeyman.

Section 5. Except as otherwise provided in the Charter of The City of San Diego, and upon the recommendation of the head of the department, or appointing authority and the approval of the Civil Service Commission, increase in salary, if sufficient funds are available, may be made in all positions included within any of the "Standard Rates" numbered 1 to 38, inclusive, as follows: For each six months of continuous service in a position, the increase in salary for such position, unless otherwise provided, may be approximately five per cent (5%) of the existing salary rate per month prescribed for the position, class or grade in which such employee is classified; provided, however, that not more than six (6) such seniority increases may be allowed in the same position. Notwithstanding any other provision in this section, increases in compensation within the limits provided for by any grade may be granted at any time by the City Manager, or other appointing authority upon the basis of efficiency and seniority record after having first received the approval of the Civil Service Commission therefor.

Section 7. Whenever the duties of a position are of such a character as to require the employee holding the same to work regularly a number of hours per week in excess of the hours customarily worked by other city employees, upon the recommendation of the department head, or appointing authority, such employee may be paid at the next Standard Rate above the rate for the class in which such position is found, as herein provided.

Section 8. Each member of the Classified Service, other than those employees described in Article XII of the Charter, who have been regularly in the employ of the City for at least one calendar year shall be entitled to the vacation with pay authorized by Rule X of the Rules of the Civil Service Commission.

(a) An annuity which shall be the actuarial equivalent of his accumulated contributions at the time of his retirement; and

(b) A pension, in addition to his annuity, of like amount; and

(c) If he has a prior service certificate in full force and effect, an additional pension which shall be equal to one-seventieth (1/70) of his average final compensation multiplied by the number of his years of prior service, as certified on his prior service certificate; and

(d) If he has a prior service certificate in full force and effect and has attained age seventy-two (72) years, such further pension as may be required to bring his total retirement allowance up to a minimum of six hundred dollars (\$600.00) per annum.

(i) If he has a prior service certificate in full force and effect and has attained age seventy (70) years, and shall have completed not less than ten (10) years of creditable service as an employee, such further pension as may be required to bring his total retirement allowance up to

a minimum of five hundred seventy-six dollars (\$576.00) per annum.

(3) Early Service Retirement Benefit. Should a member other than a policeman, fireman or full-time lifeguard who has attained the age of fifty-five (55) years and has a minimum of twenty (20) years of service, be removed from a regular permanent position of the city without fault or delinquency on his part, before he has attained the age of sixty-two (62), he may receive a special retirement allowance consisting of an annuity which is the actuarial equivalent of the member's accumulated contributions at the time of retirement, plus a pension which is the actuarial equivalent of the annuity that would be payable at age sixty-two (62) from the member's contributions at withdrawal if accumulated to age sixty-two (62), and if the member has prior service certificate in full force and effect, an additional pension which is the actuarial equivalent of a pension payable at age sixty-two (62), equal to one-seventieth (1/70) of the member's average final compensation multiplied by the number of his years of prior service. (4) Disability Retirement Benefit. Upon the application of a member in service, or of his supervisory official, any member who has had ten (10) or more years of creditable service may be retired by the Board of Administration, not less than thirty (30) and not more than ninety (90) days following the date of filing of his application, upon a disability retirement allowance, provided that the Medical Board, after a medical examination of such member, shall certify that the member is mentally or physically incapacitated for the further performance of duty, and that such incapacity is likely to be permanent and that such member should be retired; provided, however, that no disability benefit shall be granted to any member when it is established to the satisfaction of the Board of Administration that such disability resulted from venereal disease, vicious or licentious habits, or violation of law.

C0607

(5) Allowance on Disability Retirement. Upon retirement for disability a member shall receive a service retirement allowance if he has attained his minimum service retirement age; otherwise he shall receive a disability retirement allowance which shall consist of:

(a) An annuity which shall be the actuarial equivalent of his accumulated contributions at the time of retirement, and

(b) A pension which, together with his annuity, shall provide a total retirement allowance equal to ninety per centum (90%) of one-seventieth ($1/70$) of his average final compensation, multiplied by the number of years of his creditable service, if such retirement allowance exceeds twenty per centum (20%) of his average final compensation; otherwise a pension which, together with his annuity, shall provide a total retirement allowance equal to twenty per centum (20%) of his average final compensation, provided, however, that no such allowance shall exceed ninety per centum (90%) of one-seventieth ($1/70$) of his average final compensation, multiplied by the number of years which would be creditable to him were his service to continue until the attainment of his minimum service retirement age.

(6) Re-examination of Beneficiaries Retired on Account of Disability. At least once each year during the first five years following retirement of a member on a disability retirement allowance, and once in every three-year period thereafter, the Board of Administration may, and upon his application shall, require any disability beneficiary who has not yet attained his minimum service retirement age to undergo a medical examination, such examination to be made at the place of residence of said beneficiary or other place mutually agreed upon, by a physician or physicians designated by the Board of Administration. Should any disability beneficiary who has not yet attained his minimum service retirement age refuse to submit to such medical examination by a physician or physicians designated by the Board of Administration as the Board may require, his allowance may be discontinued until his withdrawal of such refusal, and should his refusal continue for one year, all his rights in and to his pension may be revoked by the Board of Administration.

(a) Should the Medical Board report and certify to the Board of Admin-

istration that such disability beneficiary is engaged in or is able to engage in a gainful occupation paying more than the difference between his retirement allowance and his average final compensation, and should the Board of Administration concur in such report, then the amount of his pension shall be reduced to an amount, which, together with his annuity and the amount earnable by him, shall equal the amount of his average final compensation. Should his earning capacity be later changed, the amount of his pension may be further modified; provided that the new pension shall not exceed the amount of the pension originally granted nor an amount which, when added to the amount earnable by the beneficiary together with his annuity, equals the amount of his average final compensation. A beneficiary restored to active service at a salary less than the average final compensation upon the basis of which he was retired shall not become a member of the retirement system.

(b) Should a disability beneficiary under his minimum service retirement age be restored to active service at a compensation not less than his average final compensation, his retirement allowance shall cease, and he shall again become a member of the retirement system and shall contribute thereafter at the same rate he paid prior to disability. Any prior service certificate on the basis of which his service was computed at the time of his retirement shall be restored to full force and effect, and in addition upon his subsequent retirement he shall be credited with all his service as a member, except that upon subsequent retirement within five (5) years from the date of restoration his creditable service rendered prior to his previous retirement shall be reduced by one-tenth (1/10) the amount thereof.

(7) Death Benefit. Upon the receipt of proper proofs of the death of a member in service there shall be paid to such person having an insurable interest in the life of the deceased, as he shall have nominated by written designation duly executed and filed with the Board of Administration, otherwise to his estate:

(a) His accumulated contributions; and

(b) If the member has five or more years of membership service, an amount equal to his last month's salary.

(8) Return of Accumulated Contributions.

(a) The Board of Administration annually, beginning with the fiscal year 1944-1945 may ascertain and determine the approximate average interest return on the assets of the system during the preceding fiscal year, which hereafter, in this section, shall be referred to as 'average interest rate'.

If the investigation shows that the said average interest rate is less than the regular established interest rate, then and in that event the Board of Administration may, in its discretion, by resolution entered in the minutes of said Board, establish said average interest rate. In the event the Board of Administration determines it will not be necessary to establish such an amount for any given year, it shall cause to be entered upon the minutes a finding to that effect.

(b) Every member who becomes separated from the service of the City except by death or retirement under the provisions of this ordinance shall, upon written demand made to the Board of Administration, receive and be paid the amount of his accumulated contributions, less a deduction of an amount approximately equal to the difference between the regular interest rate and the average interest rate which has been determined, each year respectively, by the Board of Administration.

(c) The Board of Administration may, in its discretion, before ordering a warrant for the payment of contributions demanded by a member upon separation from the City service, require a written notice to be served on said Board at least sixty (60) days prior to said payment.

(9) Optional Allowances. Until the first payment on account of his retirement allowance becomes normally due, any member may elect to convert the retirement allowance otherwise payable to him into a modified retirement allowance of equivalent actuarial value, in accordance with one of the optional forms named below; provided, however, that should he die prior to the expiration of thirty (30) days after the date of filing such election, or prior to thirty (30) days after retirement, his optional election shall not be effective, and he shall be considered to be a member in service at the time of his death. A member who has elected an optional benefit may change such election by due notice to the Board of Administration, but no change may be made after the

first payment of his allowance becomes normally due.

Option 1.

If he dies before he has received in payments the present value of his retirement allowance as it was at the time of his retirement, the balance shall be paid to his legal representative, or to such person as he shall nominate by written designation duly acknowledged and filed with the Board of Administration.

Option 2.

Such other form of benefit as shall be certified by the actuary to be of equivalent actuarial value to his retirement allowance, provided that the Board of Administration shall determine that the granting of such optional allowance is consistent with the purpose of the retirement system and shall be necessary or desirable from the point of view of the member.

(10) Pension Offset by Compensation Benefits. Any amounts which may be paid or payable by the City of San Diego under the provisions of any Workmen's Compensation or similar law to a member, or to the dependents of a member, on account of any disability giving rise to a disability benefit payable hereunder shall be offset against and payable in lieu of any such benefit payable out of funds provided by the City of San Diego under the provisions of this ordinance.

(11) Nothing herein shall be construed to be retroactive."

Section 2. That Section 8 of said Ordinance No. 10792, as amended by Ordinance No. 3067, New Series, adopted September 18, 1945, be, and the same is hereby amended to read as follows:

"Section 8. Method of Financing.

(1) All of the assets of the retirement system shall be credited in accordance with the purpose for which they are held to one of two funds, namely, the City Employees' Retirement Fund, as created by section 145 of Article IX of the City Charter, and the Retirement System Expense Fund.

(2) City Employees' Retirement Fund. The City Employees' Retirement Fund shall be subdivided into four accounts as follows: The Annuity Savings

Account, The Annuity Reserve Account, The Pension Accumulation Account and The Pension Reserve Account.

(3) Annuity Savings Account.

(a) The Annuity Savings Account shall be the account in which shall be accumulated contributions from the compensation of members to provide for their annuities. Upon the basis of such tables as the Board of Administration shall adopt and the regular interest, the actuary of the retirement system shall calculate for each age of entrance into membership the constant proportion of compensation which, when deducted from each payment of the prospective earnable compensation of a member entering at any such age prior to his attainment of his minimum service retirement age, and accumulated at regular interest until his attainment of his minimum service retirement age, shall provide at that time an annuity approximately equal in amount to one one hundred fortieth ($1/140$) of his average final compensation, multiplied by the number of his years of service as a member. Such proportion of compensation shall be known as the normal rate of member's contribution. The proportion so computed for a member whose age is one year less than his minimum service retirement age shall be applied to a member who attains a greater age before he becomes a member of the retirement system.

(b) Beginning with the effective date of the amendment to this section, all new members will contribute upon the basis of tables for men and for women as the Board of Administration shall adopt. The Actuary of the retirement system shall calculate for each age of entrance into membership the constant proportion of compensation which, when deducted from each payment of the prospective earnable compensation of a member entering at any such age prior to his attainment of his minimum service retirement age, and accumulated at regular interest until his attainment of his minimum service retirement age, shall provide at that time an annuity approximately equal in amount to one one hundred twentieth ($1/120$) of his average final compensation multiplied by the number of his years of service as a member.

Present members, both men and women, shall have the option of making future contributions upon the basis of the new tables to provide at minimum service retirement age on account of future membership service annuities

approximately equal in amount to one-one hundred twentieth (1/120) of average final compensation for each year of future membership service. The Board of Administration shall fix the time limit within which members may choose to exercise their options. Such option once exercised is irrevocable.

(c) The Board of Administration shall furnish the City Auditor with the amount of contribution for each member, and the City Auditor shall cause to be deducted from the compensation of each and every member each month, or shorter periods as the Board of Administration may approve, the amounts so certified for each member, provided, however, that compensation at a rate in excess of Three Thousand Six Hundred Dollars (\$3600.00) per annum shall be considered as Three Thousand Six Hundred Dollars (\$3600.00) for the purpose of computing the amounts to be deducted.

In determining the amount earnable by a member in a payroll period, the Board of Administration may consider the rate of annual compensation payable to such member on the first day of the payroll period as continuing through such payroll period, and it may omit deductions from compensation for any period less than a full payroll period if any employee was not a member on the first day of the payroll period; and to facilitate the making of deductions it may modify the deduction required of any member by such an amount as shall not exceed one-tenth (1/10) of one per centum of the annual compensation upon the basis of which said deduction is to be made. Compensation payable for overtime work or compensation in lieu of vacation shall not be considered in determining the amount earnable by a member in a payroll period.

(d) The deductions provided for herein shall be made notwithstanding that the minimum compensation provided for by law for any member shall be reduced thereby. Every member shall be deemed to consent and agree to the deductions made and provided for herein and shall receipt for his full salary or compensation; and payment of salary or compensation less said deductions shall be a full and complete discharge and acquittance of all claims and demands whatsoever for the services rendered by such person during the period covered by such payment except as to the benefits provided under this ordinance. The City Auditor shall furnish to the Board of Administration a copy of each and every payroll on which there appears a deduction for the

City Employees' Retirement System; and each of said amounts shall be deducted and when deducted shall be paid into said Annuity Savings Account and shall be credited, together with regular interest, to an individual account of the member from whose compensation said deduction was made.

(e) In addition to the normal deduction from compensation as hereinbefore provided, subject to the approval of the Board of Administration, any member may deposit in the annuity savings account by an increased rate of contribution an amount for the purchase of an additional annuity, which, together with his prospective retirement allowance, will provide for him a total retirement allowance not exceeding one-half of his prospective average final compensation at a chosen age between the voluntary and compulsory retirement age limits. Such additional amount so contributed shall not be considered in computing the pension to be provided from the contributions of the city, but shall accrue interest at a rate to be established by the Board of Administration, which rate shall not exceed three per cent (3%).

(f) The accumulated contributions of a member withdrawn by him, or paid to his estate or to his designated beneficiary in the event of his death as provided in this ordinance, shall be paid from the Annuity Savings Account. Upon the retirement of a member his accumulated contributions shall be transferred from the Annuity Savings Account to the Annuity Reserve Account.

(4) Annuity Reserve Account.

The Annuity Reserve Account shall be the account from which shall be paid all annuities and all benefits in lieu of annuities payable as provided in this ordinance.

(5) Pension Accumulation Account.

(a) The Pension Accumulation Account shall be the account in which shall be accumulated all reserves for the payment of all pensions and other benefits payable from contributions made by The City of San Diego and from which shall be paid all pensions and other benefits on account of members with prior service credit.

(b) On account of each member who is an employee of The City of San Diego the said City shall pay annually into the Pension Accumulation Account for

the preceding fiscal year an amount equal to a certain percentage of the earnable compensation of each member, to be known as the 'normal contribution', and an additional percentage of his earnable compensation to be known as the 'accrued liability contribution'. The rates per centum of such contributions shall be fixed on the basis of the liabilities of the retirement system as shown by actuarial valuation. Until the first valuation the normal contribution shall be one and sixteen hundredths per centum, and the accrued liability contribution shall be one and seventy-three hundredths per centum of the earnable annual compensation of all employees.

(c) On the basis of regular interest and of such mortality and other tables as shall be adopted by the Board of Administration, the actuary engaged by the Board to make each valuation required by this ordinance during the period over which the deficiency contribution is payable, immediately after making such valuation, shall determine the uniform and constant percentage of the earnable compensation of the average new entrant, which, if contributed on the basis of the earnable compensation of such new entrant throughout his entire period of active service would be sufficient to provide for the payment of any pension or other benefit provided by the City that may be payable on his account. The rate per centum so determined shall be known as the 'normal contribution' rate. After the accrued liability contribution has ceased to be payable, the normal contribution rate shall be the rate per centum of the earnable compensation of all members obtained by deducting from the total liabilities of the Pension Accumulation Fund the amount of the funds in hand to the credit of that fund and dividing the remainder by one per centum of the present value of the prospective future salaries of all members as computed on the basis of the mortality and service tables adopted by the Board of Administration and regular interest. The normal rate of contribution shall be determined by the actuary after each valuation.

(d) Immediately succeeding the first valuation, the actuary engaged by the Board of Administration shall compute the rate per centum of the total annual compensation of all members which is equivalent to the sinking fund payment that would liquidate at regular interest within a period of thirty (30) years the liability on account of all members and beneficiaries which is not dis-

chargeable by the aforesaid normal contribution made on account of such members during the remainder of their active service. The rate per centum originally so determined shall be known as the 'accrued liability contribution' rate.

(e) The total amount payable in each year to the Pension Accumulation Fund shall not be less than the sum of the rates per centum known as the normal contribution rate and the accrued liability contribution rate of the total compensation earnable by all members during the preceding year; provided, however, that the aggregate payment by The City of San Diego shall be sufficient, when combined with the amount in the fund to provide the pensions and any other benefits payable out of the fund during the year then current.

(f) The accrued liability contribution shall be discontinued as soon as the accumulated reserve in the Pension Accumulation Fund shall equal the present value, as actuarially computed and approved by the Board of Administration of the total liability of such fund less the present value, computed on the basis of the normal contribution rate then in force, of the prospective normal contributions to be received on account of persons who are at that time members.

(g) All pensions and benefits in lieu thereof, with the exception of those payable on account of members who receive no prior service allowance, shall be paid from the Pension Accumulation Account.

(h) Upon the retirement of a member not entitled to credit for prior service, an amount equal to his pension reserve shall be transferred from the Pension Accumulation Account to the Pension Reserve Account.

(6) The Pension Reserve Account.

The Pension Reserve Account shall be the account from which shall be paid the pensions to members not entitled to credit for prior service and benefits in lieu thereof. Should such a beneficiary retired on account of disability be restored to active service with compensation not less than his average final compensation at the time of his last retirement, the pension reserve thereon shall be transferred from the Pension Reserve Account to the Pension Accumulation Account. Should the pension of such a beneficiary be reduced as a result of an increase in his earning capacity, the amount of the annual reduction in his pension shall be paid annually into the Pension Accumulation Account

during the period of such reduction.

(7) Expense Fund.

The Expense Fund shall be the fund to which shall be credited all money provided by The City of San Diego to pay the administration expenses of the retirement system, and from which shall be paid the expenses necessary in connection with the administration and operation of the system. Annually the Board of Administration shall estimate the amount of money necessary to be paid into the Expense Fund for the ensuing year to provide for the expense of operation of the retirement system, and such estimate shall be submitted to the City Manager in accordance with Section 69 of Article VII of the City Charter.

(8) Estimate of Appropriations Required.

(a) On or before the 15th day of April of each year the Board of Administration shall certify to the City Manager the amount of the appropriation necessary to pay to the various funds and accounts of the retirement system, the amounts payable by The City of San Diego as enumerated in this ordinance for the year beginning on the succeeding first day of July, and items of appropriation providing the amounts shall be included in the Annual Appropriation Ordinance. The amount so appropriated shall be credited to the various funds and accounts of the retirement system.

(b) To cover the requirements of the system for the period prior to the first day of January, 1928, the amount of \$11,000.00 shall be paid into the Pension Accumulation Account of the City Employees' Retirement Fund and the amount of \$4,500.00 shall be paid into the Expense Fund.

(9) Unclaimed Benefits.

All unclaimed amounts payable under the provisions of the retirement system sections shall remain part of the funds of the retirement system, and shall be credited to the Pension Accumulation Account.

(10) Nothing herein shall be construed to be retroactive."

Section 3. That Sections 2 and 3 of Ordinance No. 3067, New Series, of the Ordinances of The City of San Diego, entitled, "An Ordinance Amending Sections 4, 5 and 8 and adding Section 9 $\frac{1}{2}$ to Ordinance No. 10792 (City Employees' Retirement System), approved December 1, 1926, and repealing Sections 3, 4 and 6 of Ordinance No. 2721, New Series, adopted September 28, 1943," be, and each of them is hereby repealed.

(a) An annuity which shall be the actuarial equivalent of his accumulated contributions at the time of retirement, and

(b) A pension which, together with his annuity, shall provide a total retirement allowance equal to ninety per centum (90%) of one-seventieth (1/70) of his average final compensation, multiplied by the number of years of his creditable service, if such retirement allowance exceeds twenty per centum (20%) of his average final compensation; otherwise a pension which, together with his annuity, shall provide a total retirement allowance equal to twenty per centum (20%) of his average final compensation, provided that such allowance shall be reduced to one per centum (1/70) of his average final compensation for each year of his service until he reaches his minimum service retirement age.

which they are held to one of the funds, namely, the City Employees' Retirement Fund, as created by Section 155 of Article IX of the City Charter, and the Retirement System Expense Fund.

(2) City Employees' Retirement Fund. The City Employees' Retirement Fund shall be subdivided into four accounts as follows: The Annuity Account, The Pension Account, The Savings Account, and The Accumulated Contributions Account.

(a) Annuity Savings Account. The annuity savings account shall be the account in which accumulated contributions shall be made for their annuities. Upon the basis of such tables as the Board of Administration shall adopt, the regular interest, the actual retirement system shall be applied for each age of entrance into membership the normal proportion of compensation which shall be deducted from each payment of a member's prospective earnings commencing at the time of his minimum service retirement age and accumulated at regular interest until his attainment of his minimum service retirement age, shall provide at that time an annuity approximately equal in amount to one-hundred fortieth (1/40) of his average final compensation, multiplied by the number of his years of service as a member. Such proportion of compensation shall be known as the normal rate of member's contribution. The proportion so computed for a member whose age is one year less than his minimum service retirement age shall be applied to a member who attains a greater age before he becomes a member of the retirement system.

(b) Beginning with the effective date of the amendment to this section, all new members will contribute upon the basis of tables for men and for women as the Board of Administration shall adopt. The Actuary of the retirement system shall calculate for each age of entrance into membership the constant proportion of compensation which, when deducted from each payment of the prospective earnable compensation of a member entering at any such age prior to his attainment of his minimum service retirement age, and accumulated at regular interest until his attainment of his minimum service retirement age, shall provide at that time an annuity approximately equal in amount to one-hundred twentieth (1/20) of his average final compensation multiplied by the number of his years of service as a member.

(c) Present members, both men and women, shall have the option of making future contributions upon the basis of the new tables to provide at minimum service retirement age on account of future membership service annuities approximately equal in amount to one-hundred twentieth (1/20) of average final compensation for each year of future membership service. The Board of Administration shall fix the time limit within which members may choose to exercise their options. Such option once exercised is irrevocable.

(d) The Board of Administration shall furnish the City Auditor with the amount of contribution for each member, and the City Auditor shall cause to be deducted from the compensation of each and every member each month, or shorter periods as the Board of Administration may approve, the amounts so certified for each member, provided, however, that compensation at a rate in excess of Three Thousand Six Hundred Dollars (\$3,600.00) per annum shall be considered as Three Thousand Six Hundred Dollars (\$3,600.00) for the purpose of computing the amounts to be deducted.

(e) In determining the amount earnable by a member in a payroll period, the Board of Administration may consider the rate of annual compensation payable to such member on the first day of the payroll period as continuing through such payroll period, and it may omit deductions from compensation for any period less than a full payroll period if any employee was not a member on the first day of the payroll period; and to facilitate the making of deductions it may modify the deduction required of any member by such an amount as shall not exceed one-tenth (1/10) of one per centum of the annual compensation upon the basis of which said deduction is to be made. Compensation payable in lieu of vacation or compensation shall not be considered in determining the amount earnable by a member in a payroll period.

(f) The deductions provided for herein shall be made notwithstanding that the minimum compensation provided for by law for any member shall be reduced thereby. Every member shall be deemed to consent and agree to the deductions made and provided for herein and shall receipt for his full salary or compensation less said deductions shall be a full and complete discharge and acquittance of all claims and demands whatsoever for the services rendered by such person during the period covered by such payment except as to the benefits provided under this ordinance. The City Auditor shall furnish to the Board of Administration a copy of each and every payroll on which there appears a deduction for the City Employees' Retirement System; and each of said amounts shall be deducted and when deducted shall be paid into said Annuity Savings Account and shall be credited, together with regular interest, to an individual account of the member from whose com-

position the average new entrant, which, if contributed on the basis of the earnable compensation of such new entrant throughout his entire period of active service would be sufficient to provide for the payment of any pension or other benefit provided by the City that may be payable on his account. The rate per centum so determined shall be known as the 'normal contribution' rate. After the accrued liability contribution has ceased to be payable the normal contribution rate shall be the rate per centum of the earnable compensation of all members obtained by deducting from the total liabilities of the Pension Accumulation Fund the amount of the funds in hand to the credit of that fund and dividing the remainder by one per centum of the present value of the prospective future salaries of all members as computed on the basis of the mortality and service tables adopted by the Board of Administration and regular interest. The normal rate of contribution shall be determined by the actuary after each valuation.

(g) Immediately succeeding the first valuation, the actuary engaged by the Board of Administration shall compute the rate per centum or two total annual compensation of all members which is equivalent to the sinking fund payment that would liquidate at regular interest within a period of thirty (30) years the liability on account of all members and beneficiaries which is not dischargeable by the aforesaid normal contribution made on account of such members during the remainder of their active service. The rate per centum originally so determined shall be known as the 'accrued liability contribution' rate.

(h) The total amount payable in each year to the Pension Accumulation Fund shall not be less than the sum of the rates per centum known as the normal contribution rate and the accrued liability contribution rate of the total compensation earnable by all members during the preceding year; provided, however, that the aggregate payment by the City of San Diego shall be sufficient when combined with the amounts in the fund to provide the pensions and any other benefits payable out of the fund during the year then current.

(i) The accrued liability contribution shall be discontinued as soon as the accumulated reserve in the Pension Accumulation Fund

(3) Unclaimed benefits. All unclaimed amounts payable under the provisions of the retirement system sections shall remain part of the funds of the retirement system, and shall be credited to the Pension Accumulation Account.

(10) Nothing herein shall be construed to be retroactive.
