WHEREAS, Section One of said Act provides, among other things, that

"Whenever any city or municipal corporation shall elect to avail itself of the provisions of this Act relative to assessment and collection of taxes, the board of trustees, common council, or other legislative body of such city or municipal corporation shall have the power, and it shall be their duty, before making the levy provided to be made by Section 3 hereof, to fix by ordinance the amount of money to be raised by taxation upon the taxable property therein as a revenue to carry on the various departments of such municipal corporation or city for the current year, not to exceed the limit fixed by law, and to pay the bonded or other indebtedness of such municipal corporation or city, or any portion or district thereof,"

ORDINANCE NO. _____
(New Series)

AN ORDINANCE AMENDING SECTION 102.23 OF
THE SAN DIEGO MUNICIPAL CODE.

BE IT ORDAINED, By the Council of The City of San Diego,
as follows:

Section 1. That Sec. 102.23 of the San Diego Municipal Code, regulating the water distribution systems in subdivisions and the purchase of water systems by the City be, and the same is hereby amended to read as follows:

SEC. 102.23 WATER DISTRIBUTION SYSTEM - MAPS AND
COSTS - PURCHASE OF WATER SYSTEM BY CITY

(a) All new subdivisions shall have a complete water distribution system installed before such subdivisions are finally accepted by the City. The plan, design and size of pipes or mains of such water distribution system must be approved by the Water Department and the City Manager. Such system shall include a feeder main or mains from the nearest point in the City's water system from which a satisfactory quality of water in sufficient quantity and at sufficient pressure can be supplied for the proposed subdivision. The subdivider shall pay for the installation of said water distribution system, including the said feeder main or mains except as hereinafter provided.

(b) Upon receipt of an application for approval of a new subdivision and the filing of a tentative map thereof, which shall contain an accurate description of the property to be served, the Manager shall cause the Water Department to prepare a plan of the water distribution system necessary to adequately serve the proposed subdivision. Said system shall include a feeder main or mains. In this connection the Department shall determine whether the best interests

01321

of the City will be served by installing larger mains than necessary for the proposed subdivision in order that the City may serve areas outside of the said subdivision. Where mains larger in size than those actually needed for the purpose of providing water for the proposed subdivision, or a larger feeder main or mains are determined to be necessary to serve not only the subdivisions but other territory, the increased cost of such water mains, including the larger sized feeder main or mains, shall be borne by the City, as hereinafter provided. The Water Department shall then decide whether it would be in the interests of the City to install said system, including said feeder main or mains, by City forces or public contract. If so decided the Water Department shall then determine the amount of the entire cost of the system, including the feeder main or mains, which the subdivider shall be required to pay under this ordinance. The amount of such cost thus determined shall be deposited by the applicant with the City, If the City's interests will be best served, or in the event of shortage, scarcity or unavailability, the City cannot acquire the materials necessary for the installation of such system, the City may require that the subdivider furnish materials in part payment under conditions and at current market prices to be determined by the City. Following the receipt of such deposit, the Manager shall take the necessary steps and cause said water distribution system to be installed in the proposed subdivision either by City forces or by contract.

In the event of the applicant's deposit for estimated cost of the installation of said water system, including the feeder main or mains, which the subdivider is required to pay, exceeds the actual cost of such installation, the excess shall be refunded to the applicant; and in the event that the deposit is less than the actual cost of the installation the applicant shall pay to the City the amount of such

deficiency.

If it is decided that the City will not itself undertake the installation of said water system, including the feeder main or mains, it shall be the duty of the subdivider to install the water system in said subdivision, including the feeder mains, in accordance with the said plan of the Water Department. If the subdivider is required to install larger mains and appurtenances than are actually needed for the particular subdivision the City shall bear the additional cost of the larger sized mains and appurtenances, including any additional cost of installation. The cost to be thus borne by the City shall be paid to the subdivider or person interested in the manner, condition, and at the time provided in subdivision (c) of this Section of this article.

(c) Upon request of the Manager the Purchasing Agent of the City is hereby authorized and directed to purchase any existing water system installed by the owner of new subdivisions pursuant to the terms of this article or otherwise where the cost of the installation of said water system, including the feeder main or mains, has been entirely borne by the owner of said subdivision and where the owner has been required to install water mains, including a feeder main or mains larger than necessary to be installed in order to supply water to the subdivision. The price to be paid by the City for such water distribution system shall be determined by the Water Department, and shall be that amount which represents the difference in cost of mains, and appurtenances necessary for serving the subdivision and the mains and appurtenances which were actually installed by the owner of the subdivision by order of the City in order that the City might secure the benefit of the larger sized mains to serve territory in addition to that in the subdivision.

01323

In all such cases before the money is actually paid said owner shall be required to furnish and deliver to the City a good and sufficient quitclaim and conveying to the City all of the right, title and interest of the legal owner of any existing water distribution system located in public streets, rights of way, highways and public places, either within or without said subdivision; provided, however, that the City Manager may recommend that the City purchase a portion of such water system, without or within said subdivision prior to the completion of the whole, where such portion is complete and in accordance to City requirements.

(d) No subdivision, or map thereof, shall be finally approved or accepted, nor shall any bond or other security given pursuant to any laws, to insure the installation of public improvements or utilities, be exonerated by the Council on behalf of the City until the legal owner, or the person interested, shall have furnished and delivered to said City a good and sufficient quitclaim deed, quitclaiming and conveying to the City all of the right, title and interest of said owner or person interested in and to any water system which has been installed in the public streets, highways, rights of way and public places either within or without said subdivisions, pursuant to the requirements of this article.
