AN ORDINANCE AMENDING SECTIONS 72.02, 72.03, 72.05, 72.06 AND 72.07 OF THE SAN DIEGO MUNICIPAL CODE, REGULATING OPERATION OF TAXICABS, INCLUDING DRIVERS, AND RATES.

BE IT ORDAINED By the Council of The City of San Diego, as follows:

Section 1. That Section 72.02 of the San Diego Municipal Code be, and the same is hereby amended to read as follows:

"SEC. 72.02 TAXICABS - RATES OF FARE

(a) The City Council by resolution shall, after a hearing, establish just and reasonable rates for hire of taxicabs. A certificate holder under Section 72.01 shall petition the City Council for any desired change in taxicab rates for hire. A copy of said petition shall be filed with the Chief of Police. Pending action by the Council to establish rates hereunder, the taxicab rate for hire shall be Sixty cents (60¢) for the first mile and ten cents (10¢) for each additional one-third (1/3) mile or lesser fraction.

(b) It shall be unlawful for any owner or driver to operate any taxicab in The City of San Diego unless vehicle is equipped with a taximeter designed to calculate fares upon the basis of a combination of mileage traveled and time elapsed and when operative with respect to fare indication, the fare-indicating mechanism shall be actuated by the mileage mechanism whenever the vehicle is in motion at such a speed that the rate of mileage revenue equals or exceeds the time rate, and may be actuated by the time mechanism whenever the vehicle speed is less than this and when the vehicle is not in motion. Means shall be provided for the vehicle operator to render the time mechanism either operative or inoperative with respect to the fare-indicating mechanism. The

taximeter shall also be of a style and design approved by the City Manager of said City, or his representative. Waiting time shall include all time when a taxicab occupied or engaged by a passenger is not in motion or traveling at a speed which is slow enough for the time rate to exceed the mileage rate; and the time consumed while standing at the direction of the passenger or person who has engaged such taxicab. It shall be the duty of every owner operating a taxicab to keep such taximeter in perfect condition so that said taximeter will, at all times, correctly and accurately indicate the correct charge for the distance traveled and waiting time, and such taximeter shall be at all times subject to inspection by an inspector of the City Manager, or any peace officer, and such inspector, or any peace officer is hereby authorized at his instance or upon complaint of any person to investigate or cause to be investigated such taximeter, and upon discovery of any inaccuracy in said taximeter, or if the taximeter is unsealed, to remove or cause to be removed such vehicle equipped with such taximeter from the streets of The City of San Diego until such time as said taximeter shall have been correctly adjusted, or sealed.

(c) It shall be unlawful for any driver of a taxicab while carrying passengers to display the flag or device attached to such taximeter in such a position as to denote that such vehicle is for hire, or is not employed, or to have such flag or other attached device in such a position as to prevent said taximeter from operating, and it will be unlawful for any driver to throw such flag into a position which causes said taximeter to record when such vehicle is not actually employed or to fail to throw said flag or other device on such taximeter into a non-recording position at the termination of each and every service.

(d) The taximeter shall be so placed in said taxicab that the reading dial showing the amount to be charged shall be well lighted and readily discernible by the passenger riding in such taxicab.

(e) It shall be unlawful for any owner, driver, or operator of a taxicab to demand of a passenger a charge for hire other than the current applicable rate approved by the City Council and on file with the City Clerk.

(f) There shall be displayed in the passenger compartment of each taxicab in full view of the passenger a card not less than two inches by four inches in size, which shall have plainly printed thereon the name of the owner, or the fictitious name under which said owner operates, the business address and telephone number of said owner, and a schedule of the current authorized rates to be charged for hire of the vehicle."

Section 2. That Section 72.03 of the San Diego Municipal Code be, and the same is hereby amended to read as follows:

"SEC. 72.03 TAXICABS - TAXICAB SPECIFICATIONS AND EQUIPMENT.

(b) No taxicab shall be operated until the taximeter thereon has been inspected, tested, and approved by an authorized representative of the City Manager,

and the taximeter shall be sealed and so maintained in a manner satisfactory to the representative of the City Manager.

(c) Each taxicab shall bear on the outside an identification marker of the type and design and in the place prescribed by the City Manager, and also be equipped with a device which shall plainly indicate to a person outside the taxicab whether the taximeter is in operation or is not in operation.

(d) All taxicabs must be and conform to a color scheme approved by the City Manager, and the Council may refuse a certificate to every person whose color scheme, trade name and/or insignia imitates that of any permittee in such manner as to deceive the public.

(e) Each taxicab licensed to operate in this city shall have located in a convenient place in the driver's compartment and in view of the passengers therein a container of type and design approved by the Chief of Police. Said container shall contain a card provided by the Chief of Police visible to the passengers, bearing the following information:

(1) The number of the City Chauffeur's license of the driver thereof;

(2) The name and residence address of said driver;

(3) The name of the company employing said driver;

(4) A small photograph of said driver."

(b) Every driver shall, upon request of a passenger, give a receipt upon payment of the fare.

(c) All disputes as to fares shall be determined by the officer in charge of the police station nearest to the place where the dispute is had. It shall be unlawful for any person to fail or refuse to comply with such determination by the police officer.

(d) It shall be unlawful for any person to refuse to pay the lawful fare of any of the vehicles regulated by this article, after employing or hiring the same.

(e) No driver of any taxicab, as defined in this article, shall seek employment by repeatedly and persistently driving his vehicle to and fro in a short space in front of, or by otherwise interfering with the proper and orderly access to or egress from, any theater, hall, hotel, public resort, railway or ferry station, or other place of public gathering; or, by leaving his vehicle, or otherwise approach and solicit patronage by pedestrians upon the sidewalk, in any theater, hall, hotel, public resort, railway or ferry station, or other place of public gathering; but such driver may solicit employment by driving through any public street or place without stops, other than those due to obstruction of traffic, and at such speed as not to interfere with or impede traffic, and may pass and repass before any theater, hall, hotel, public resort, railway or ferry station or other place of public

gathering; providing that, after passing such public place he shall not turn and repass until he shall have gone a distance of two blocks upon the streets and highways of The City of San Diego. No person shall solicit passengers for such vehicles other than the driver thereof when sitting upon the driver's seat of the vehicle; provided, however, the Chief of Police or his representative may authorize a dispatcher to solicit passengers and assist in loading passengers at such times and places as, in his discretion, public service and traffic conditions require.

(f) No driver of any taxicab shall transport any larger number of persons, including the driver, than the manufacturer's rated seating capacity for the vehicle.

(g) No driver of any taxicab, as defined by this Article, shall park his taxicab on the same side of the street in any block in which two taxicabs are already parked, or within one hundred (100) feet of any other taxicab, or within fifteen (15) feet of any fire plug, except as modified by Section 72.07 of this Article.

(h) The driver of any of the vehicles regulated by this Article shall promptly obey all lawful orders or instructions of any police officer or fireman.

(i) It shall be unlawful for any taxicab to remain standing in any established taxicab stand, unless said cab is attended by a driver or operator, except when assisting passengers to load or unload, or when answering his telephone."

(b) Applicants for such permits shall file applications therefor with the Traffic Division of the Police Department, upon blanks to be furnished by the Traffic Division of the Police Department.

(c) A temporary permit only shall be granted for a period not to exceed sixty (60) days, after which time said license shall be made permanent if, after investigation, said applicant is found to be a fit and proper person.

(d) Said permit shall be filed with the City Treasurer as part of the application for license.

(a) The City Council by resolution shall, after a hearing, establish just and reasonable rates for hire of taxicabs. A certificate holding the City Council for any desired change in taxicab rates for hire shall be filed with the Chief of Police. Pending action by the Council to establish rates hereunder, the taxicab rate for hire shall be Sixty cents (60c) for the first mile and ten cents (10c) for each additional one-third (1/3) mile or lesser fraction.

(b) It shall be unlawful for any owner or driver to operate a taxicab in the City of San Diego unless vehicle is equipped with a taximeter designed to calculate fares upon the basis of a combination of mileage traveled and time elapsed and when operating with respect to fare indication, a fare-indicating mechanism shall be actuated by the mileage mechanism whenever the vehicle is in motion at such a speed that the amount of mileage revenue equals or exceeds the time rate, and may be actuated by the time mechanism whenever the vehicle speed is less than this and when the vehicle is not in motion. Means shall be provided for the vehicle operator to render the time mechanism either operative or inoperative with respect to the fare-indicating mechanism. The taximeter shall also be of a style and design approved by the City Manager of said City, or his representative. It shall be the duty of every owner operating a taxicab to keep such taximeter in perfect condition so that said taximeter will, at all times, correctly and accurately indicate the correct charge for the distance traveled and waiting time, and such taximeter shall be at all times subject to inspection by an inspector of the City Manager, or any peace officer, and such inspector, or any peace officer is hereby authorized at his instance or upon complaint of any person to investigate or cause to be investigated such taximeter, and upon discovery of any inaccuracy in said taximeter, or if the taximeter is unsealed, to remove or cause to be removed such vehicle equipped with such taximeter from the streets of the City of San Diego until such time as said taximeter shall have been correctly adjusted, or sealed.

(c) It shall be unlawful for any driver of a taxicab while carrying passengers to display the flag or device attached to such taximeter in such a position as to denote that such vehicle is for hire, or is not employed, or to have such flag or other attached device in such a position as to prevent said taximeter from operating, and it will be unlawful for any driver to throw such flag into a position which causes said taximeter to record when such vehicle is not actually employed or to fail to throw said flag or other device on such taximeter into a non-recording position at the termination of each and every service.

(d) The taximeter shall be so placed in said taxicab that the reading dial showing the amount to be charged shall be well lighted and

chauffeur's license revoked or suspended;

(3) Been convicted of driving while under the influence of intoxicating liquors;

(4) Been convicted of driving under the influence of narcotics;

(5) During any continuous six (6) month period he shall have had three (3) or more convictions of any of the moving offenses set forth in Divisions 9 of the Vehicle Code of the State of California, and amendments thereto, or any combination of either or any of said offenses.

(h) Any person whose operator's permit shall have been revoked or renewal refused by the Chief of Police may within ten (10) days after receipt of notice thereof appeal to the Council for a hearing thereon; and the decision of the Council in this regard shall be final. If no appeal is taken within ten (10) days, the action of the Chief of Police shall be final."

Section 5. That Section 72.07 of the San Diego Municipal Code be, and the same is hereby amended to read as follows:

SEC. 72.07 TAXICAB STANDS

(b) Each taxicab stand established hereunder shall be in operation twenty-four (24) hours of every day, unless otherwise specified by the City Manager.

(c) It shall be unlawful for the owner, driver or operator of any taxicab to allow said taxicab to remain parked in the Central Traffic District except in a regular established taxicab stand; provided, however, that taxicabs may park in any available parking space when actually engaged in loading or unloading passengers; and provided, further, that between the hours of 10:00 o'clock P.M. and 6:00 o'clock A.M. of the following day, taxicabs may stop, stand or park in any place where the parking of vehicles is otherwise permitted."

BE IT ORDAINED by the Council of The City of San Diego as follows:

Section 1. That Chapter III, Article 2 of the San Diego Municipal Code be and the same is hereby amended by adding thereto new sections, to be known as and numbered Sections 32.50, 32.51, 32.52, 32.53, 32.54, 32.55, 32.56, 32.57, 32.58, 32.59, and to read as follows:

"SEC. 32.51 PURPOSE.

The City Council of The City of San Diego hereby declares that these sections are adopted to achieve the following, among other, purposes, and directs that the provisions hereof be interpreted in order to accomplish those purposes:

(a) To adopt sales and use tax requirements which comply with the requirements and limitations contained in Part 1.5 of Division 2 of the Revenue and Taxation Code of the State of California;

(b) To adopt sales and use tax requirements which incorporate provisions identical to those of the Sales and Use Tax Law of the State of California insofar as those provisions are not inconsistent with the requirements and limitations contained in Part 1.5 of Division 2 of the said Revenue and Taxation Code;

(c) To adopt a sales and use tax law which imposes One percent (1%) tax and provides a measure therefor that can be administered and collected by the State Board of Equalization in a manner that adapts itself as fully as practical to, and requires the least possible deviation from, the existing statutory and administrative procedures followed by the State Board of Equalization in administering and collecting the California State Sales and Use Taxes;

(d) To adopt sales and use tax requirements which can be administered in a manner that will, to the degree possible consistent with the provisions of Part 1.5 of Division 2 of the said Revenue and Taxation Code, minimize the cost of collecting city sales and use taxes and at the same time minimize the burden of record keeping upon persons subject to taxation under the provisions of these sections;

(e) To adopt sales and use tax requirements which can be administered in a manner that will exclude the receipts of particular sales from the measure of the sales tax imposed by this City which have been included in the measure of the sales tax imposed by any other city and county, county other than the county in which this city is located, or city in this State, and avoid imposing a use tax on the storage, use or other consumption of tangible personal property in this City when the gross receipts from the sale of, or the use of, that property has been subject to a sales or use tax by any other city and county, county other than the county in which this city is located, or city in this State, pursuant to a sales and use tax ordinance enacted under the provisions of Part 1.5 of Division 2 of the said Revenue and Taxation Code.

This auxiliary switch shall be set to open on temperature rise and shall be set at a temperature not greater than 250° F. This auxiliary limit switch shall break the same circuit that the high limit switch breaks (in series with the high limit switch) and sensing element of said limit switch shall be placed at the up stream end of the heat exchanger.

F. Furnaces with 35,000 BTU or under in capacity may use 3/8" O. D. Type "T" copper connector not to exceed 30' in length. Copper tube shall not pass through the floor, wall, or other partition to complete said connection. Tube shall be accessible.

G. In residences where the heater room is not on an outside wall and where the furnace size does not exceed 190,000 BTU, one high combustion air opening in the ceiling is sufficient providing said opening meets the requirements of Section 5102-C-1.

Such awning may extend over public property not more than two-thirds the distance from the property line to the nearest curb in front of the building site. The lowest part of any collapsible awning frame shall have not less than eight feet (8') clearance, and the lowest part of any fringe attached to such awning shall have not less than seven feet (7') clearance.

b. A rigid or non-collapsible awning is a shelter with pitched roof of not less than two inches (2") per foot. The frame of such awning or hood shall be constructed of rust-and-corrosive-resistant, incombustible, lightweight material and to resist a wind load of fifteen (15) pounds per square foot in any direction.

Such rigid or non-collapsible awning shall be constructed with a device to permit quick release in the event of emergency and in such a way as not to interfere with the free use of any doorway. The device shall be approved by the Chief of the Fire Department. No such awning shall obstruct the use of fire escapes or fire ladders, or the means of egress from upper floors.

Such rigid or non-collapsible awning may extend over the sidewalk, not exceeding two-thirds of the distance from the property line to the outer edge of the sidewalk. No part of such awning shall be more than sixteen (16') feet or less than seven (7') feet above the sidewalk; and no valance or skirt attached thereto shall extend above

Secondary members in contact with or directly supporting the facing may in all types of signs be formed of light gauge steel provided such members are designed in accordance with the specifications for the design of light gauge steel as provided in U.B.C. Standards No. 27-2 and No. 27-3, and are galvanized to comply with the A S T M "Standard Specifications for Zinc-Coated Iron and Steel" (A93 46) and no minimum thickness for the facing is specified. Secondary members when formed integrally with the facing shall be not less than 24 gauge in thickness (0.024 inch). When not formed integrally with the facing, the minimum thickness of the secondary members shall be 12 gauge (0.105 inch). Steel pipe shall be of such quality as to conform to U. B. C. Standard No. 27-4.

(b) The design of wood or wood members shall conform to the requirements of Chapter 25 of the Uniform Building Code.

(c) The working stress of wire ropes and their fastenings shall not exceed 25 per cent of their ultimate strength.

(d) The working stresses for combined wind and dead load, or earthquake stresses, may be increased as allowed by Section 2307 of the Uniform Building Code.

SEC. 95.0112 GROUND SIGNS.

(a) Materials. The surface of all advertising structures located outside Fire Zone No. 1, on which the advertising matter is painted, may be of wood, at least three-quarters of an inch in thickness.

Within Fire Zone No. 1 no ground sign, for which a permit is required, shall be erected of combustible materials.

- EXCEPTIONS:
1. Non-structural trim may be of approved combustible materials or wood.
 2. Structural members may be of wood, provided that the least nominal dimension of each member is three inches (3").
 3. Display surface may be of a combustible material with a charring rate of not greater than 400° in 15 minutes tested with an air velocity test of 250 feet per minute.

(b) Height. The bottom of every ground sign shall be at least twenty four inches, (24") above the ground.

(c) Supports and Anchorage. Supports and anchorage shall conform to the following requirements:

1. Ground signs shall be adequately designed to resist dead and wind loads as provided in Section 95.0109 within the stress limits as provided in this Code.

2. The members supporting unbraced signs shall be so proportioned that the bearing loads imposed upon the soil in either a horizontal or vertical direction shall not exceed safe values. Braced signs shall be anchored to resist the specified wind load acting in any direction. Anchors and supports shall be designed for safe bearing loads on the soil and for an effective resistance to pull-out amounting to a force 25 per cent greater than the required resistance to overturning.

The soil used for backfill for the dug-in type of anchor or cantilever support shall be carefully placed and thoroughly compacted.

3. Portable signs supported by frames or posts rigidly attached to bases shall be so proportioned that the weight and size of the base are adequate to resist the wind pressure specified in Section 95.0109. Such signs shall not exceed six feet (6') in height.

4. Whenever anchors or supports consist of wood embedded in the soil or directly in contact therewith, the wood shall be treated under pressure with creosote or other approved preservative before erection.

5. The minimum thickness of hot-rolled structural steel members furnishing structural support for signs shall be three-sixteenths inch (3/16"), provided that if galvanized, such members may be not less than one-eighth inch (1/8") thick. The galvanizing shall comply with Section 95.0111.

Members formed of light gauge steel may be used for support of ground signs, provided that they are designed in accordance with U.B.C. Standard No. 27-3 and provided that the thickness, exclusive of the facing, shall be not less than 12 gauge (0.105 inch).

Steel members may be connected by one galvanized bolt, provided the connection is adequate to transfer the stresses in the members.

SEC. 95.0113 ROOF SIGNS.

(a) Materials. Roof signs, upright supports, and braces shall be constructed entirely of a noncombustible material. Non-structural trim may be of wood construction. Approved combustible materials may be used in letters, decorations and facings as provided in section 95.0102. The display surface may be of a combustible material with a charring rate not greater than 400° in 15 minutes, tested with an air velocity test of 250 feet per minute.

(b) Location. All roof signs and outdoor advertising structures shall be constructed so as to leave a clear space of not less than four (4) feet between the roof level and the lowest part of the sign, and at least (5) feet clearance between the vertical supports thereof, and every roof sign shall be set back at least (4) feet from the face of any front or rear wall or side wall of the building (if side wall is on street frontage) upon which said sign is erected. However, when a sign is placed diagonally on the roof of a building, the ends of the signboards may come within twelve (12) inches of the exterior wall of the building, provided the angle between the sign and front building wall is a minimum of 30 degrees.

(c) Prohibited Obstructions: No signs shall be placed on the roof of any building or other structure in such manner as to prevent free passage from one part of the said roof to any other part of the roof.

(d) Supports and Anchorage: Roof signs shall be thoroughly secured and anchored to the structural frame of the building over which they are constructed and erected. The dead and wind loads from the signs shall be distributed to the structural frame of the building in such a manner as not to overload any of the elements thereof. Uplift due to overturning of roof signs shall be adequately resisted by proper counterweights to resist the uplift. Proper anchorage to the structural frame of the building shall include such alterations to the building as may be needed to integrate and adequately interconnect sufficient dead load to equal not less than 10 per cent in excess of the computed uplift applied to the building by the sign. Where uplift is resisted by counterweights, their weight shall exceed the amount of the uplift by 10 percent.

No anchor or support of any roof sign shall be connected to or supported by an unbraced parapet wall.

SEC. 95.0114 WALL SIGNS.

(a) Supports and attachments. Wall signs attached to exterior walls of solid masonry or concrete shall be safely and securely attached to the same by means of metal anchors, bolts, or approved expansion screws of sufficient size and anchorage to support safely the loads applied.

No wooden blocks or anchorages with wood used in connection with screws or nails shall be considered proper anchorage, except in the case of wall signs attached to buildings with walls of wood studs. No wall sign shall be supported by an unbraced parapet wall.

SEC. 95.0115 PROJECTING SIGNS.

(a) Supports and attachments. Supports and attachments shall conform to the following requirements:

1. Projecting signs shall be rigidly and securely attached to a building or structure by metal bolts, anchors, supports, wire ropes, or steel rods. No staples, nails, or single-strand wire shall be used to secure any projecting sign to any building or structure.

2. The dead load of projecting signs and the load due to wind pressure shall be supported by structural shapes, wire ropes, or steel guy rods. When wire ropes, guys, or steel guy rods are used, such supports shall be erected and maintained preferably at an angle of 45 degrees or more with the horizontal to resist the vertical load, and at an angle of 45 degrees or more with the face of the sign in an approximately horizontal plane to resist horizontal loads. The lateral supports shall be spaced not more than eight feet (8') apart and shall be secured to a bolt or an approved expansion anchor capable of developing the strength of the supporting wire rope or steel rod. The details of the anchorage shall be subject to the approval of the Building Official. Turnbuckles or other approved means of adjustment shall be placed in wire ropes or steel rods supporting or bracing projecting signs.

3. Wire ropes or steel rods used to support or brace projecting signs may be fastened to solid masonry walls with expansion bolts or other devices approved by the Building Official, but no such support or brace shall be attached to an unbraced wall. When the supports are fastened to walls made with wood studs, the supporting devices must be fastened securely in a manner approved by the Building Official.

When the supports or braces of a projecting sign extend above the roof line of a building, they shall be anchored to a mast or tower built of incombustible material, designed to support safely all of the loads imposed upon it and to distribute such loads in a proper manner to the structural frame of the building. Wire ropes and their attachments shall be galvanized or of corrosive-resistant material. All other metal supports and braces shall be painted.

SEC. 95.0116 THICKNESS OF SIGNS.

No sign shall exceed 24 inches in thickness, measured face to face except as provided for in Section 95.0126.

All signs and outdoor advertising structures must have the maker's name conspicuously located and permanently attached or painted on the exterior.

SEC. 95.0122—REFLECTED ILLUMINATION PROHIBITED.

Illuminating any sign by reflected light will not qualify such sign as an electric sign when the light is held away from the sign with arms, brackets, conduits or rods, whenever any portion thereof is over public property.

SECTION 4. That Section 95.0125 of the San Diego Municipal Code be and the same is hereby amended to read as follows:

SEC. 95.0125—MAXIMUM SIGN PROJECTION.

Only electric signs may project over a public street or public sidewalk as far as but not beyond the limiting dimensions as follows:

light gauge steel as provided in U.B.C. Standards No. 27-2 and No. 27-3, and are galvanized to comply with the A.S.T.M. "Standard Specifications for Zinc-Coated Iron and Steel" (A93 46) and no minimum thickness for the facing is specified. Secondary members when formed integrally with the facing shall be not less than 24 gauge in thickness (0.024 inch). When not formed integrally with the facing, the minimum thickness of the secondary members shall be 12 gauge (0.105 inch). Steel pipe shall be of such quality as to conform to U. B. C. Standard No. 27-4.
(b) The design of wood or wood members shall conform to the requirements of Chapter 26 of the Uniform Building Code.
(c) The working stress of wire ropes and their fastenings shall not exceed 25 per cent of their ultimate strength.
(d) The working stresses for combined wind and dead load, or earthquake stresses, may be increased as allowed by Section 2807 of the Uniform Building Code.
SEC. 95.0112—GROUND SIGNS.
(a) **MATERIALS.** The surface of all advertising structures located outside Fire Zone No. 1, on which the advertising matter is painted, may be of wood, at least three-quarters of an inch in thickness. Within Fire Zone No. 1 no ground sign, for which a permit is required, shall be erected of combustible materials.
EXCEPTIONS:
1. Non-structural trim may be of approved combustible materials or wood.
2. Structural members may be of wood, provided that the least nominal dimension of each member is three inches (3").
3. Display surface may be of a combustible material with a charring rate of not greater than 400° in 15 minutes tested with an air velocity test of 250 feet per minute.
(b) **HEIGHT.** The bottom of every ground sign shall be at least twenty-four inches (24") above the ground.
(c) **SUPPORTS AND ANCHORAGE.** Supports and anchorage shall conform to the following requirements:
1. Ground signs shall be adequately designed to resist dead and wind loads as provided in Section 95.0109 within the stress limits as provided in this Code.
2. The members supporting unbraced signs shall be so proportioned that the bearing loads imposed upon the soil in either a horizontal or vertical direction shall not exceed safe values. Braced signs shall be anchored to resist the specified wind load acting in any direction. Anchors and supports shall be designed for safe bearing loads on the soil and for an effective resistance to pull-out amounting to a force 25 per cent greater than the required resistance to overturning. The soil used for backfill for the dug-in type of anchor or cantilever support shall be carefully placed and thoroughly compacted.
3. Portable signs supported by frames or posts rigidly attached to bases shall be so proportioned that the weight and size of the base are adequate to resist the wind pressure specified in Section 95.0109. Such signs shall not exceed six feet (6') in height.
4. Whenever anchors or supports consist of wood embedded in the soil or directly in contact therewith, the wood shall be treated under pressure with creosote or other approved preservative before erection.
5. The minimum thickness of hot-rolled structural steel members furnishing structural support for signs shall be three-sixteenths inch (3-16"), provided that if galvanized, such members may be not less than one-eighth inch (1/8") thick. The galvanizing shall comply with Section 95.0111. Members formed of light gauge steel may be used for support of ground signs, provided that they are designed in accordance with U.B.C. Standard No. 27-2 and provided that the thickness, exclusive of the facing, shall be not less than 12 gauge (0.105 inch). Steel members may be connected by one galvanized bolt, provided the connection is adequate to transfer the stresses in the members.
SEC. 95.0113—ROOF SIGNS.
(a) **MATERIALS.** Roof signs, upright supports, and braces shall be constructed entirely of a noncombustible material. Non-structural trim may be of wood construction. Approved combustible materials may be used in letters, decorations and facings as provided in section 95.0102. The display surface may be of a combustible material with a charring rate not greater than 400° in 15 minutes, tested with an air velocity test of 250 feet per minute.
(b) **LOCATION.** All roof signs and outdoor advertising structures shall be constructed so as to leave a clear space of not less than four (4) feet between the roof level and the lowest part of the sign, and at least (5) feet clearance between the vertical supports thereof, and every roof sign shall be set back at least (4) feet from the face of any front or rear wall or side wall of the building (if side wall is on street frontage) upon which said sign is erected. However, when a sign is placed diagonally on the roof of a building, the ends of the signboards may come within twelve (12) inches of the exterior wall of the building, provided the angle between the sign and front building wall is a minimum of 30 degrees.
(c) **PROHIBITED OBSTRUCTIONS:** No signs shall be placed on the roof of any building or other structure in such manner as to prevent free passage from one part of the said roof to any other part of the roof.
(d) **SUPPORTS AND ANCHORAGE:** Roof signs shall be thoroughly secured and anchored to the structural frame of the building over which they are constructed and erected. The dead and wind loads from the signs shall be distributed to the structural frame of the building in such a manner as not to overload any of the elements thereof. Uplift due to overturning of roof signs shall be adequately resisted by proper counterweights to resist the uplift. Proper anchorage to the structural frame of the building shall include such alterations to the building as may be needed to integrate and adequately interconnect sufficient dead load to equal not less than 10 per cent in excess of the computed uplift applied to the building by the sign. Where uplift is resisted by counterweights, their weight shall exceed the amount of the uplift by 10 percent.
No anchor or support of any roof sign shall be connected to or supported by an unbraced parapet wall.
SEC. 95.0114—WALL SIGNS.
(a) **SUPPORTS AND ATTACHMENTS.** Wall signs attached to exterior walls of solid masonry or concrete shall be safely and securely attached to the same by means of metal anchors, bolts, or approved expansion screws of sufficient size and anchorage to support safely the loads applied.
No wooden blocks or anchorages with wood used in connection with screws or nails shall be considered proper anchorage, except in the case of wall signs attached to buildings with walls of wood studs. No wall sign shall be supported by an unbraced parapet wall.
SEC. 95.0115—PROJECTING SIGNS.
(a) **SUPPORTS AND ATTACHMENTS.** Supports and attachments shall conform to the following requirements:
1. Projecting signs shall be rigidly and securely attached to a building or structure by metal bolts, anchors, supports, wire ropes, or steel rods. No staples, nails, or single-strand wire shall be used to secure any projecting sign to any building or structure.
2. The dead load of projecting signs and the load due to wind pressure shall be supported by structural shapes, wire ropes, or steel guy rods. When wire ropes, guys, or steel guy rods are used, such supports shall be erected and maintained preferably at an angle of 45 degrees or more with the horizontal to resist the vertical load, and at an angle of 45 degrees or more with the face of the sign in an approximately horizontal plane to resist horizontal loads. The lateral supports shall be spaced not more than eight feet (8') apart and shall be secured to a bolt or an approved expansion anchor capable of developing the strength of the supporting wire rope or steel rod. The details of the anchorage shall be subject to the approval of the Building Official. Turnbuckles or other approved means of adjustment shall be placed in wire ropes or steel rods supporting or bracing projecting signs.
3. Wire ropes or steel rods used to support or brace projecting signs may be fastened to solid masonry walls with expansion bolts or other devices approved by the Building Official, but no such support or brace shall be attached to an unbraced wall. When the supports are fastened to walls made with wood studs, the supporting devices must be fastened securely in a manner approved by the Building Official.
When the supports or braces of a projecting sign extend above the roof line of a building, they shall be anchored to a mast or tower built of incombustible material, designed to support safely all of the loads imposed upon it and to distribute such loads in a proper manner to the structural frame of the building. Wire ropes and their attachments shall be galvanized or of corrosion-resistant material. All other metal supports and braces shall be painted.
SEC. 95.0116—THICKNESS OF SIGNS.
No sign shall exceed 24 inches in thickness, measured face to face except as provided for in Section 95.0126.
SECTION 2. That Sections 95.0118, 95.0119, 95.0120, 95.0121 and 95.0122 be and the same are hereby amended to read as follows:
SEC. 95.0118—PUBLIC PROPERTY PROHIBITION.
(a) No person shall place, paint or secure any lettering advertisement, card, poster, sign or notice of any kind, or cause same to be done, on any curb, sidewalk, post, pole, lamp post, hydrant, bridge, tree or other surface located on public property except such signs as may hereinafter be lawfully authorized.
(b) No advertising structure, or part thereof, shall be located over public property except as otherwise specified in detail in this Division.
The provisions of this Section shall be enforced by the San Diego Police Department, the Planning Department and the Inspection Department.
SEC. 95.0119—REMOVAL OF NON-CONFORMING SIGNS.
Any sign overhanging public property, and not in compliance with this Division shall be removed prior to Dec. 31, 1958.
SEC. 95.0120—NATIONAL CODE REQUIREMENTS.
Except as otherwise specified in this Division, all electric signs shall meet specification and construction requirements equal or equivalent to the electrical sign requirements as specified in the National Electrical Code, 1953 Edition.
SEC. 95.0121—IDENTIFICATION.
All signs and outdoor advertising structures must have the maker's name conspicuously located and permanently attached or painted on the exterior.
SEC. 95.0122—REFLECTED ILLUMINATION PROHIBITED.
