ORDINANCE No. 7309  
(New Series)

AN ORDINANCE INCORPORATING A PORTION OF LOT 67, RANCHO MISSION, IN THE CITY OF SAN DIEGO, CALIFORNIA, INTO R-2 ZONE, AS DEFINED BY SECTION 101.0406 OF THE SAN DIEGO MUNICIPAL CODE, AND REPEALING ORDINANCE No. 5132 (NEW SERIES), ADOPTED MARCH 25, 1952, IN SO FAR AS THE SAME CONFLICTS HEREWITH.

WHEREAS, pursuant to section 101.0206 of the San Diego Municipal Code, the City Planning Commission fixed and determined a time and place for a public hearing upon a proposed rezoning of a portion of Lot 67, Rancho Mission, in The City of San Diego, California, as indicated on Planning Commission Zone Map Drawing No. B-761, attached to Planning Commission communication on file in the office of the City Clerk as Document No. 545826; and

WHEREAS, after due notice duly and regularly given, hearings were duly held and all persons interested were given an opportunity to appear and be heard before said Planning Commission; and

WHEREAS, the area as designated on Zone Map Drawing No. B-761 is proposed to be subdivided, whereby provision will be made for the installation of public utility services and for the dedication of streets, alleys and easements for public uses; and

WHEREAS, the City Planning Commission by a vote of 5 to 0 has filed a recommendation with the Council of said City as contained in Document No. 545826, filed December 28, 1956, recommending that a portion of Lot 67, Rancho Mission, in The City of San Diego, California, as indicated on Zone Map Drawing No. B-761, be incorporated into R-2 zone, the restrictions of said zone to attach upon the recordation of a final subdivision map of said area; and

ORDINANCE NO. 7324  
(New Series)

AN ORDINANCE AMENDING CHAPTER 6, ARTICLE IV OF THE SAN DIEGO MUNICIPAL CODE BY AMENDING SECTION 64.21 AND BY ADDING THERETO SECTIONS 64.21.1, 64.21.2, 64.21.3, 64.21.4, 64.21.5, 64.21.6, and 64.21.7, REGULATING SEWAGE DISPOSAL.

WHEREAS, the City Council recognizes the necessity for safe and adequate liquid industrial waste disposal as a means of reducing and controlling pollution of surface water within and adjoining the city, and the City Council also recognizes its obligation to permit industry to participate in the use of such basic public services as sewerage, while at the same time affording the maximum reasonable protection to the public interests involved; and

WHEREAS, it is the intent of the City Council to encourage the connection of as many sources of industrial wastes to the public sewerage system as is compatible with the operation of the system, preservation of public safety, and satisfying waste discharge requirements, and to limit or exclude by means of the industrial waste provisions of these recommendations only those substances which will prevent or seriously impair attainment of those objectives; NOW, THEREFORE,

BE IT ORDAINED, by the Council of The City of San Diego, as follows:

Section 1. That Section 64.21 of the San Diego Municipal Code, be, and the same is hereby amended to read as follows:

"SEC. 64.21 WASTE DISPOSAL - OBJECTIONABLE SEWAGE PROHIBITED.

It shall be unlawful for any person to cause to enter or permit to enter the public sewerage system any substance, liquid, gas, or solid, which would cause a public nuisance or hazard to life, or would be deleterious to the sewerage system or to the waters receiving the discharge of the sewerage system."

Section 2. That Article IV, Chapter 6, of the San Diego Municipal Code, be, and the same is hereby amended by adding thereto new sections to be known as and numbered Sections 64.21.1, 64.21.2, 64.21.3, 64.21.4, 64.21.5, 64.21.6 and 64.21.7, to read as follows:

"SEC. 64.21.1 WASTE DISPOSAL - PERMIT REQUIRED

Any person, municipality, sanitation district, or government agency desiring to discharge industrial wastes into the sewerage system shall obtain a permit to discharge said wastes into said system from the Director of Public Works.

SEC. 64.21.2 WASTE DISPOSAL - REGULATIONS OF DIRECTOR OF PUBLIC WORKS

The Director of Public Works shall make and enforce regulations necessary to the administration of this section. He may amend such regulations from time to time as conditions require. These regulations shall be consistent with the general policy established by the City Council and shall be approved by the City Council.

SEC. 64.21.3 WASTE DISPOSAL - APPEAL FROM DIRECTOR OF PUBLIC WORKS.

In the event that any interested or affected person shall be dissatisfied with any action or determination of the Director, such person shall be entitled to make an appeal in writing (a) to the City Manager, if dissatisfied with a determination of the Director, and (b) to the City Council if dissatisfied with the determination of the City Manager. If thirty (30) days or more shall elapse following the action or determination of any one of the officials in the above designated chain of appeal without an appeal being taken therefrom, then the action or determination of such official or officials shall become final.

SEC. 64.21.4 WASTE DISPOSAL - NOTICE OF VIOLATION.

Any person found to be violating any provision of this section shall be served by the City with written notice which shall state the nature of the violation and shall provide a reasonable time limit for the satisfactory correction thereof. The offender shall, within the period of time stated in such notice, permanently cease all violation.

SEC. 64.21.5 WASTE DISPOSAL - SUSPENSION OF SEWER SERVICE.

When deemed necessary by the Director of Public Works for the preservation of public health or safety or for the protection of public or private property, he may suspend sewer service to any person or persons using the sewer system in a manner or way to endanger the public health or safety, or public or private property. In suspending service he may sever all pertinent connections to the public sewer. If such endangerment shall be imminent, then the Director may act immediately to suspend sewer service coincident with notice or warning to said person or persons.

SEC. 64.21.6 WASTE DISPOSAL - INSPECTION BY CITY EMPLOYEE.

The Director of Public Works or other duly authorized employees and agents of the City shall be permitted to enter upon all properties at any reasonable time for the purpose of (1) determination of the size, depth, location, and condition of any sewer or storm drain connection, (2) determination of the location and discharge connections of roof and surface drains and plumbing fixtures, and (3) inspection, observation, measurement, sampling, and testing of the quantity and characteristics of sewage or water being discharged to the public

sewerage system.

SEC. 64.21.7 WASTE DISPOSAL - DEFINITIONS.

Definitions: The following words and phrases whenever used in this section and sub-sections shall be construed as defined herein, unless from the context, a different meaning is intended.

AN ORDINANCE AMENDING SECTIONS 62.0201,  
62.0203 and 62.0206 OF THE SAN DIEGO  
MUNICIPAL CODE REGULATING TYPE AND AMOUNT  
OF PERFORMANCE BOND.

BE IT ORDAINED, by the Council of The City of San Diego,  
as follows:

Section 1. That Sections 62.0201, 62.0203 and 62.0206  
of the San Diego Municipal Code be, and the same are hereby  
amended to read as follows:

"SEC. 62.0201 APPLICATION AND PERFORMANCE BOND.

(a) Every person constructing public improvements  
or encroachments in the public right-of-way, either as  
a property owner or by private contract shall present  
an application and a performance bond to the City  
Engineer. The application shall be on forms provided  
by the City Engineer and shall enable the City Engineer

If the property owner fails to correct the default within the established time, the City Engineer may use all or any portion of the property owner's deposit to complete the work satisfactorily. The property owner shall be provided with an accounting of such expenditures. The deposit or any remaining balance shall be refunded upon acceptance of the work by the City Engineer. If the property owner has posted a surety bond, the provisions of Section 62.0205 shall apply.

"SEC. 62.0206 TYPE AND AMOUNT OF PERFORMANCE BOND ESTABLISHED.

The performance bond may be for a specific job or an annual and continuing bond may be filed with the City covering the costs of several jobs. The amount of the bond covering a specific job shall be the amount of the estimate submitted by the person doing the work and approved by the City Engineer, plus 10%. An annual and continuing bond may be in an amount of \$1,000.00, \$2,000.00, \$3,000.00, \$4,000.00, \$5,000.00, \$10,000.00, or any larger amount in multiples of \$5,000.00. This bond shall qualify the Contractor to do work for which the aggregate total of approved cost estimates of work in progress, plus 10%, shall not exceed the amount of the bond. Annual and continuing bonds shall have a non-cancellation without notice clause.

Specific job bonds shall be filed in the City Engineers Office. Annual and continuing bonds shall be filed in the Office of the City Clerk.

Notice of cancellation shall be sent to the City Clerk and a copy sent to the City Engineer."

Section 2. This ordinance shall take effect and be in force on the thirty-first day from and after its passage.

7325 (NEW SERIES). PERFORMANCE BOND

### ORDINANCE NO. 7325 (NEW SERIES)

AN ORDINANCE AMENDING SECTIONS 62.0201, 62.0202 and 62.0206 OF THE SAN DIEGO MUNICIPAL CODE REGULATING TYPE AND AMOUNT OF PERFORMANCE BOND.

BE IT ORDAINED, by the Council of The City of San Diego, as follows:

Section 1. That Sections 62.0201, 62.0202 and 62.0206 of the San Diego Municipal Code be, and the same are hereby amended to read as follows:

"SEC. 62.0201 APPLICATION AND PERFORMANCE BOND.

(a) Every person constructing public improvements or encroachments in the public right-of-way, either as a property owner or by private contract shall present an application and a performance bond to the City Engineer. The application shall be on forms provided by the City Engineer and shall enable the City Engineer to determine the applicant's qualifications for doing the proposed work. Upon approval by the City Engineer, the applicant shall be considered qualified to do such work.

(b) No performance bond under the provisions of this article shall be required from the State of California, or any of its political subdivisions or any governmental agency.

"SEC. 62.0202 PROPERTY OWNER'S PERFORMANCE BONDS.

(a) Persons applying for a property owner's permit to do work in the public right-of-way shall furnish a cash deposit or a surety bond in an amount equal to the cost of the work authorized. The cash deposit shall be held by the City Treasurer. If the City Engineer finds that the conditions of the permit authorizing the work have not been met, he shall notify the property owner in writing of such default and the time deemed necessary to correct it. If the property owner fails to correct the default within the established time, the City Engineer may use all or any portion of the property owner's deposit to complete the work satisfactorily. The property owner shall be provided with an accounting of such expenditures. The deposit or any remaining balance shall be returned upon completion of the work by the City Engineer. If the property owner has posted a surety bond, the provisions of Article 62 shall apply.

"SEC. 62.0206 THE AMOUNT OF PERFORMANCE BOND SHALL BE:

The performance bond may be for a specific job or an annual and continuing bond over in force with the City covering the entire year. At least the amount of seven percent of the estimated cost of the work authorized shall be the minimum amount of the bond. The City Engineer shall determine the amount of the bond and the City Treasurer shall receive and hold the same. The City Engineer shall determine the amount of the bond and the City Treasurer shall receive and hold the same. The City Engineer shall determine the amount of the bond and the City Treasurer shall receive and hold the same.

The City Engineer shall take such action as may be necessary to enforce the provisions of this ordinance. This ordinance shall take effect on the 1st day of January, 1957, by the Council of the City of San Diego, California, on the 20th day of January, 1957, by the following vote:

AYES - Councilmen: Barger, Berman, Schaeffer, Quinn, Evenson, ...

NOES - ...

ORDINANCE No. 7332  
(New Series)

AN INTERIM ORDINANCE ESTABLISHING REGULATIONS GOVERNING THE USE OF LAND IN LOT 33, NEW RIVERSIDE AND LOTS 9 AND 10, DAVID'S SUBDIVISION IN THE CITY OF SAN DIEGO, CALIFORNIA.

WHEREAS, the Planning Commission is making a study of a comprehensive zoning plan for Montgomery Airport Area within The City of San Diego, which areas include Lot 33, New Riverside and Lots 9 and 10, David's Subdivision, in The City of San Diego, California, as indicated on Planning Commission Zone Map Drawing No. C-134, attached to Planning Commission communication on file in the office of the City Clerk as Document No. 547242; and

WHEREAS, it is desirable under the authority of section 101.0203.1 of the San Diego Municipal Code to regulate the use of said above described land pending the adoption of a comprehensive zoning plan therefor; and

WHEREAS, the development of the land and use of buildings thereon might be accomplished in a manner adverse to said comprehensive zoning plan; and

WHEREAS, the City Council is of the opinion that the public safety, health and welfare would be promoted by the adoption of such temporary interim zoning ordinance; NOW, THEREFORE,

BE IT ORDAINED, by the Council of The City of San Diego, as follows:

Section 1. That all that territory situated in The City of San Diego, California, within the boundaries of the district designated "R-1" on Planning Commission zone map drawing No.C-134, filed in the office of the City Clerk of said City under Document No. 547242 be, and the same is hereby incorporated into a temporary interim zoning with property use restrictions identical with those described in Section 101.0405 of the San Diego Municipal Code.

AN ORDINANCE AMENDING THE CIVIL SERVICE RULES, AND ARTICLE III, Chapter 2, of THE SAN DIEGO MUNICIPAL CODE RELATING TO CIVIL SERVICE.

WHEREAS, the Civil Service Commission has recommended to the City Council the adoption of the following amendments and repeals to the Civil Service Rules; NOW, THEREFORE,

BE IT ORDAINED by the Council of The City of San Diego, as follows:

Section 1. That Rule I, Section 1, of the Civil Service Rules, be, and the same is hereby repealed. That Section 23.0201 of the San Diego Municipal Code, be, and the same is hereby repealed.

Section 2. That Rule I, Section 2, entitled "CLASSIFICATION PLAN", be, and the same is hereby renumbered and shall become Rule I, Section 1.

Section 3. That Rule I, Section 3, entitled "COMPENSATION SCHEDULE," be, and the same is hereby renumbered and shall become Rule I, Section 2.

Section 4. That Rule II, Section 1, of the Civil Service Rules and Section 23.0301 of the San Diego Municipal Code, be, and the same are hereby amended to read as follows:

GENERAL APPLICATION REQUIREMENTS: Unless waived, all applicants must

- (a) be citizens of the United States;
- (b) be actual residents of the County of San Diego for at least one year immediately preceding the date of filing application; provided, however, that this requirement may be waived by the Commission in order to secure the necessary number of qualified applicants;

- (c) meet the minimum requirements as stated in the examination announcement.

Section 5. That Rule II, Section 2, of the Civil Service Rules, and Section 23.0302 of the San Diego Municipal Code, be, and the same are hereby amended to read as follows:

RESIDENCE:

- (a) In order to attain and retain full-time permanent employment status, all policemen and firemen must reside in that portion of the County of San Diego which is within a twenty-mile radius of the City and County Administration Building.
- (b) In order to attain and retain full-time permanent employment status, all other employees must reside in the County of San Diego.
- (c) When the residence requirement established in Rule II, Section 1 (b) has been waived, persons appointed thereunder shall comply with the residence requirement of this section.

Section 6. That Rule II, Section 6, of the Civil Service Rules, and Section 23, 0306 of the San Diego Municipal Code, be, and the same are hereby amended to read as follows:

ACCEPTANCE AND REJECTION OF APPLICATIONS:

- (1) Filing of Applications:
- (a) All applications shall be in the handwriting of the applicants on forms furnished by the Commission and filed in the manner prescribed. The statements made therein and any attached or supplementary documents shall be subscribed to under oath or affirmation.
- (b) Applications shall not be accepted unless call for examination has been issued by the Commission, except in case of emergency appointments as hereinafter provided.
- (c) Applications shall be stamped with the date and time of filing in the office of the Commission and must be filed within the prescribed time limits.
- (d) There shall be kept in the office of the Civil Service Commission an application register, in which shall be entered the names and addresses and the order

and date of application of all applicants for Civil Service tests and the offices or employment which they seek. All applications shall be on forms prescribed by the Commission.

(e) No question on the application shall relate to race, or political or religious opinions, affiliations or service.

(2) Character and Personal Fitness of Applicants:

Applicants must state under oath or affirmation whether or not they have been arrested or convicted of any crime or infraction of regulatory ordinances or statutes, and the Commission may investigate the circumstances pertaining to the arrest and conviction of all applicants, and may accept or reject such applicants within its discretion.

(3) Required Licenses, Certificates and Registrations:

For a position requiring a license, certificate or registration within the State, as evidence of professional or technical proficiency and such is required by law to practice a trade or profession, the Commission may, in its discretion require the submission thereof at the time of application or may designate other time for submission.

(4) Veterans' Application Provisions:

(a) Definition of Veteran: A veteran is any person who has served in any branch of the Armed Forces of the United States in time of war, insurrection or rebellion, and who has been honorably discharged from service, or been given an honorable certificate of service, or who has been retired from active service under honorable conditions.

(b) Veterans' Preference Claims: A veteran claiming

on a legal holiday, the said meeting shall be held at  
ten o'clock A.M. of the following day.

(b) The Council may by resolution, when necessary,  
change the time and place of regular meetings. The reso-  
lution shall set forth the circumstances necessitating  
such change, the time and place of the meetings and the  
duration of such change. Such resolution shall be pub-  
lished once in the City official newspaper at least  
twenty-four (24) hours prior to the first meeting to be  
held pursuant to such change.

(c) Twenty-four (24) hours prior to the first meet-  
ing to be held pursuant to such change, the City Clerk  
shall give each Councilman written notice, personally or  
by registered mail, of any change from the regular meet-  
ing days established by this section."

Section 2. This ordinance shall take effect and be in  
force on the thirty-first day from and after its passage.

ORDINANCE NO. 7340  
(New Series)

AN ORDINANCE AMENDING ARTICLE 1, CHAPTER X OF THE SAN DIEGO MUNICIPAL CODE BY AMENDING SECTIONS 101.0408 and 101.0628 THEREOF AND BY ADDING THERETO A NEW SECTION TO BE KNOWN AS AND NUMBERED SECTION 101.0408.1, RELATING TO ZONING.

BE IT ORDAINED by the Council of The City of San Diego, as follows:

Section 1. That Sections 101.0408 and 101.0628 of the San Diego Municipal Code be, and the same are hereby amended to read as follows:

"SEC. 101.0408 R-4 ZONE

In an R-4 zone no building or premises shall be erected, converted, constructed, established, altered, and/or enlarged or used except for one or more of the following uses:

- (1) Any use permitted in an R-1 or R-2 zone;
- (2) Apartment houses, multiple dwellings, group dwellings, boarding houses, lodging houses; excluding premises designed or used for the temporary residence of less than one week;
- (3) Fraternity and sorority houses;
- (4) Branch public libraries;
- (5) Electric distribution stations for service of immediate district and provided all equipment is within enclosure walls observing yard and setback requirements and subject to architectural approval of the Planning Commission.
- (6) Offices for psychologists, social workers, religious practitioners, doctors and dentists, (prohibiting overnight patients); provided not more than two of such professional men and not more than three employees of each, shall be permitted on the premises;

00420

(7) Automobile storage garage or parking lots for the exclusive use of patrons of any use in this section enumerated; provided such garages or parking lots are a part of the principal building or located in connection therewith on the same or adjoining lot.

No vehicle parking or parking area shall be permitted between the front property line and setback line, provided that when the building setback line is greater than 15 feet, the parking area shall not be required to be more than 15 feet from the front property line.

All open air auto parking lots shall

(a) be enclosed with a masonry wall and/or tight wood fence, impervious to light, a minimum height of four (4) feet above grade of parking lot, exclusive of areas adjacent to principal building and approved driveways, conforming in all respects to the Municipal Code, provided, however, that some other type of fence or wall may be permitted, adjacent to street frontages if approved by the Architectural Review Board.

(b) be paved with a minimum pavement of two (2) inches of asphaltic or oil and gravel surfacing or other approved pavement;

(c) be installed with appropriate wheel stops.

The area adjacent to parking areas between the setback line and the public sidewalk shall be planted with lawn, shrubs or flowers and an adequate watering system shall be installed for maintenance thereof.

Provided, however, that any uses which were authorized under the provisions of this section as amended by Ordinance No. 5835 (N.S.), which uses are now prohibited by this section, shall be permitted on property which was zoned R-4 on or before ~~January~~ March 24, 1957. The provisions of this paragraph permitting exceptions shall terminate

and be of no effect on and after June 30, 1959."

"SEC. 101.0628 FENCES AND WALL - MAINTENANCE AND REPAIR.

All fences and walls shall be constructed of new or good used material and all fences and walls shall be kept in good repair and adequately maintained; any delapidated, dangerous or unsightly fences or walls shall be removed or repaired."

Section 2. That the San Diego Municipal Code be, and the same is hereby amended by adding thereto a new section to be known as and numbered Section 101.0408.1, and to read as follows:

"SEC. 101.0408.1 R-P ZONE - RESIDENTIAL-PROFESSIONAL.

In an R-P Zone, no building or premises shall be erected, converted, constructed, established, altered, and/or enlarged or used except for one or more of the following uses:

(1) Any use permitted in an R-4 Zone except uses permitted in R-1 Zone;

(2) Doctors' and dentists' offices and clinics (prohibiting overnight patients), and such accessory businesses or services as are intended for the convenience or necessity of the patients or employees, including a prescription room for compounding and dispensing medical prescriptions and the sale of incidental medical and surgical supplies, provided such accessory uses shall not cover or occupy more than 15% of the total floor area of the buildings and that not more than 5% of the ground floor shall be used for such purposes.

(3) Hotels, motels, non-profit private clubs and lodges and similar establishments and such accessory businesses or services as are customarily designed and intended for the convenience or necessity of the guests of the permitted establishments; provided there shall be no entrances to such places of business except from the lobby

or the interior of the building, or patio entrance, not less than fifty (50) feet from public street, and provided the total floor area of all such incidental uses does not exceed 15% of the floor area of the building or buildings used for hotel, motel, non-profit private club and lodge, and similar purposes;

(4) Professional offices for architects, attorneys, accountants, engineers, surveyors, real estate brokers, insurance agencies, contractors and branch banks, savings and loan associations, mortgage loan offices, escrow offices, and stock and bond brokerage offices.

(5) Any similar professions which, in the opinion of the City Zoning Administrator or the City Planning Commission, are similar to and not more obnoxious or detrimental to the welfare of the particular community than the uses herein in this section enumerated;

(6) Every main building hereafter erected or structurally altered shall be provided with a minimum of permanently maintained off-street parking accommodations in a private garage or parking area on the same premises with the main building or on a lot immediately adjacent, as follows:

(a) For duplex, multiple dwellings, group dwellings, apartment houses, there shall be at least one parking space for each living unit up to three in number; for more than three units, parking spaces shall be provided at the ratio of three parking spaces for each four living units;

(b) For hotels and clubs, there shall be at least one parking space for every two individual guest rooms or suites for the first twenty such rooms or suites and one additional parking space for every four guest rooms or suites in excess of twenty; or, one parking space for every 60 square feet of dining

room area and one parking space for every 60 square feet of area of public assembly room, whichever is the greater.

(c) For doctors' and dentists' and other professional offices, there shall be one parking space for every 500 square feet of gross floor area in said building.

No vehicle parking or parking area shall be permitted between the front property line and setback line, provided that when the building setback line is greater than 10 feet, the parking area shall not be required to be more than 10 feet from the front property line.

All parking lots shall

(a) consist of parking spaces each containing not less than 275 square feet, computed by including the driveway area adjacent thereto.

(b) be paved with a minimum pavement of two (2) inches of asphaltic or oil and gravel surfacing, or other approved pavement;

(c) be installed with appropriate wheel stops;

(d) be enclosed with a masonry wall and/or tight wood fence, impervious to light, a minimum height of four (4) feet above grade of parking lot, exclusive of areas adjacent to principal building and approved driveways, conforming in all respects to the Municipal Code, provided, however, that some other type of fence or wall may be permitted adjacent to street frontages if approved by the Architectural Review Board.

The area between the setback line and the public sidewalk shall be planted with lawn, shrubs or flowers and an adequate watering system shall be installed for maintenance thereof."

Section 3. This ordinance shall take effect and be in force on the thirty-first day from and after its passage.

(New Series)

AN ORDINANCE PROPOSING AND SUBMITTING TO THE ELECTORS OF THE CITY OF SAN DIEGO AT THE MUNICIPAL GENERAL ELECTION TO BE HELD IN SAID CITY ON TUESDAY, THE 16TH DAY OF APRIL, 1957, A PROPOSITION TO AMEND THE CHARTER OF THE CITY OF SAN DIEGO.

BE IT ORDAINED, By the Council of The City of San Diego, as follows:

Section 1. Pursuant to the provisions of Section Eight of Article Eleven of the Constitution of the State of California, the Council of The City of San Diego, being the legislative body of said City, hereby proposes and submits to the qualified electors thereof, to be voted on at the Municipal General Election to be held in said City on the 16th day of April, 1957, the following proposition to amend the present Charter of said City:

PROPOSITION NO. \_\_\_\_\_

Amend Section 117 of Article VIII of the Charter of The City of San Diego to read as follows:

"Section 117. CLASSIFICATION. The administrative service of the City is hereby divided into the Unclassified and Classified Service, as follows:

The Unclassified Service shall include all elective positions and the following administrative offices:

Assistant to the Mayor; a confidential secretary to the Mayor; a confidential secretary to the City Council; City Manager, a confidential secretary, one Assistant Manager and two Assistants to the Manager; City Clerk; City Auditor and Comptroller; Park and Recreation Director; Director of Mission Bay Park; City Librarian; Chief of Police; Director of Building Inspection; Director of Operations of Police Depart-

ment; Director of Service of Police Department; a confidential secretary to the Chief of Police; Chief of Fire Department; Budget Officer; Purchasing Agent; Personnel Director; City Engineer; an Assistant to and all Deputies of the City Attorney; City Treasurer; Director of Public Works; Director of the Water Department; Hydraulic Engineer; Superintendent of Maintenance and Operation of the Water Department; Director of Public Health; Director of Social Service; Industrial Coordinator; officers and employees of the San Diego Unified School District; members of all Commissions and Advisory Boards who serve the City without compensation.

The Classified Service shall comprise all positions not specifically included by this Charter in the Unclassified Service."

Said proposition shall be presented and printed upon the ballot, and submitted to the voters, in the manner and form set out in Section 2 of this ordinance.

Section 2. The ballot provided at said Municipal General Election to be held on April 16, 1957, shall be so printed as to state the proposition hereinabove set out in Section One of this ordinance in the manner and form following:

PROPOSITION NO. _____. Amend Section 117 of Article VIII of the Charter of The City of San Diego. AN ORDINANCE OF THE CITY OF SAN DIEGO, CALIFORNIA, ORDERING, CALLING, PROVIDING FOR AND GIVING NOTICE OF A SPECIAL MUNICIPAL ELECTION TO BE HELD IN SAID CITY ON TUESDAY, APRIL 16, 1957, FOR THE PURPOSE OF SUBMITTING TO THE QUALIFIED VOTERS OF SAID CITY A PROPOSITION TO INCUR BONDED INDEBTEDNESS BY SAID CITY FOR A CERTAIN MUNICIPAL IMPROVEMENT, AND CONSOLIDATING SAID SPECIAL MUNICIPAL ELECTION WITH THE MUNICIPAL GENERAL ELECTION TO BE HELD ON SAID DATE.

---

WHEREAS, the Council of The City of San Diego, California, on the 26th day of February, 1957, by a vote of not less than five of the members thereof, adopted Resolution No. 137973 entitled "A resolution of the Council of The City of San Diego, California, determining that the public interest and necessity demand the acquisition and construction of a certain municipal improvement, and making findings relating thereto", which said resolution was duly passed and signed and attested on said 26th day of February, 1957;

NOW, THEREFORE,

BE IT ORDAINED By the Council of The City of San Diego, as follows:

Section 1. That a special municipal election be held, and the same is hereby called and ordered to be held, in The City of San Diego, California, on the 16th day of April, 1957, for the purpose of submitting to the qualified

00503

voters of said city a proposition of incurring bonded indebtedness and issuing bonds of said city therefor, in the amount hereinafter set forth and for the object and purpose set forth in said resolution and hereinafter stated.

Section 2. That the object and purpose for which said indebtedness is to be incurred and bonds issued therefor is as follows:

The acquisition and construction by The City of San Diego of a certain municipal improvement, to wit: a civic theatre, with vehicle parking therefor, to be located within an area in Balboa Park, bounded on the west by Park Boulevard, on the north by Morley Field Drive, on the east by Florida Street, and on the south by Laurel Drive; said civic theatre to be used for operas, musical events, shows, pageants, public gatherings and other public uses, and to include radio and television facilities, movie projection booth, equipment, furniture and furnishings, and all incidental facilities necessary therefor, and said improvement to include the construction of public utilities, paving, drains, sewers, walks, drives, and all other works, structures, and facilities necessary therefor.

Section 3. That the estimated cost of the municipal improvement described in Section 2 hereof is the sum of \$3,500,000 and that the amount of the principal of the indebtedness to be incurred therefor is the sum of \$3,500,000.

That the maximum rate of interest to be paid on said indebtedness shall not exceed five per cent (5%) per annum, payable annually for the first year and semiannually thereafter.

That if the proposition for the incurring of bonded indebtedness so submitted receives the requisite number of votes, to wit, two-thirds of the votes of the qualified electors voting at said election, bonds of said city in not exceeding the principal amount stated in such proposition shall be issued and sold for the object and purpose set forth in said proposition, and the credit of The City of San Diego shall be pledged for the payment of said bonds and the interest thereon.

Section 4. That the polls for said election shall be opened at seven o'clock A.M. of the day of said election and shall remain open continuously from said time until seven o'clock P.M. of the same day, when said polls shall be closed, except as provided in Section 27.0731 of the Election Code of said City.

Section 5. That on the ballots to be used at said special municipal election, in addition to any other matters required by law, there shall be printed substantially the following:

To vote on any measure, stamp a cross in the voting square after the word "Yes" or after the word "No". All marks, except the cross are forbidden. All distinguishing marks or erasures are forbidden and make the ballot void.

If you wrongly stamp, tear or deface this ballot, return it to the inspector of election and obtain another.

A cross (+) placed in the voting square after the word "Yes" in the manner provided by this ordinance shall be counted in favor of the adoption of said proposition. A cross (+) placed in the voting square after the word "No" in the manner provided by this ordinance shall be counted against the adoption of the proposition.

Section 7. That the special municipal election hereby called shall be and is hereby ordered consolidated with The City of San Diego general municipal election to be held on said date, and within The City of San Diego the precincts, polling places, voting booths and officers of election for the special municipal election hereby called shall be the same as those provided for said general municipal election,

and such elections shall be held in all respects as if there were only one election, and only one ticket or ballot shall be used thereat.

The ordinance proclaiming said general municipal election and giving notice thereof is Ordinance No. 7354 (New Series), adopted February 28, 1957, and reference is hereby made to such ordinance for the precincts, polling places and officers of election provided for such municipal election. A list of the polling places and names of officers of election for such general municipal election is on file in the office of the City Clerk of The City of San Diego.

Section 8. That except as otherwise provided in this ordinance, the election called hereby shall be conducted as provided by law for other municipal elections in said city. Only qualified voters of The City of San Diego shall be permitted to vote at the election called by this ordinance.

Section 9. The City Clerk is hereby directed to cause sample ballots and polling place slips to be mailed to the registered qualified electors entitled to vote at the election called by this ordinance. Such mailing shall be in the manner and within the time provided by the Election Code of said city.

Section 10. That the City Clerk shall certify to the passage and adoption of this ordinance by the Council of said City by a vote of more than two-thirds of all of its members, and shall cause this ordinance to be published once a day for at least seven (7) days prior to the time

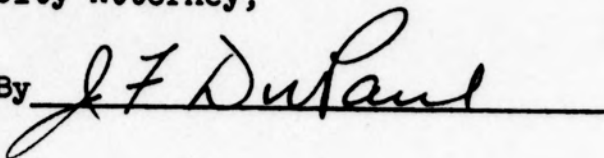

appointed for the holding of said election in the city official newspaper, to wit: THE SAN DIEGO UNION, a newspaper printed and published seven days a week in said city. No notice of such election other than that herein provided need be given.

Section 11. This ordinance shall take effect immediately upon its passage.

Section 1 That a special municipal election be held, and the same is hereby called and ordered to be held, in The City of San Diego, California, on the 16th day of April, 1957, for the purpose of submitting to the qualified voters of said city a proposition of incurring bonded indebtedness and issuing bonds of said city therefor, in the amount hereinafter set forth and for the object and purpose set forth in said resolution and hereinafter stated.

Section 2. That the object and purpose for which said indebtedness is to be incurred and bonds issued therefor is as follows:  
The acquisition and construction by The City of San Diego of a certain municipal improvement, to wit: a civic theatre, with vehicle parking therefor, to be located within an area in Balboa Park, bounded on the west by Park Boulevard, on the north by Morley Field Drive, on the east by Florida Street, and on the south by Laurel Drive; said civic theatre to be used for operas, musical events, shows, pageants, public gatherings and other public uses, and to include radio and television facilities, movie projection booth, equipment, furniture and furnishings, and all incidental facilities necessary therefor, and said improvement to include the construction of public utilities, paving, drains, sewers, walks, drives, and all other works, structures, and facilities necessary therefor.

Section 3. That the estimated cost of the municipal improvement described in Section 2 hereof is the sum of \$3,500,000 and that the amount of the principal of the indebtedness to be incurred therefor is the sum of \$3,500,000.  
That the maximum rate of interest to be paid on said indebtedness shall not exceed five per cent (5%) per annum, payable annually for the first year and semiannually thereafter.  
That if the proposition for the incurring of bonded indebtedness so submitted receives the requisite number of votes, to wit, two-thirds of the votes of the qualified electors voting at said election, bonds of said city in not exceeding the principal amount stated in such proposition shall be issued and sold for the object and purpose set forth in said proposition, and the credit of The City of San Diego shall be pledged for the payment of said bonds and the interest thereon.

Section 4. That the polls for said election shall be opened at seven o'clock A.M. of the day of said election and shall remain open continuously from said time until seven o'clock P.M. of the same day, when said polls shall be closed, except as provided in Section 57.0781 of the Election Code of said City.  
Section 5. That on the ballots to be used at said special municipal election, in addition to any other matters required by law, there shall be printed substantially the following:  
To vote on any measure, stamp a cross (X) in the voting square after the word "Yes" or after the word "No". All marks, except the cross and the word "Yes" or "No", shall be void. All absentee ballots shall be marked in the voting square.

Section 6. That the ballots may be marked as provided in the Election Code of said City of San Diego. A cross (X) placed in the voting square after the word "Yes" in the manner provided by this ordinance shall be counted in favor of the adoption of said proposition. A cross (X) placed in the voting square after the word "No" in the manner provided by this ordinance shall be counted against the adoption of the proposition.  
Section 7. That the special municipal election hereby called shall be and is hereby ordered consolidated with The City of San Diego general municipal election to be held on said date, and within The City of San Diego the precincts, polling places, voting booths and officers of election for the special municipal election hereby called shall be the same as those provided for said general municipal election, and such elections shall be held in all respects as if there were only one election, and only one ticket or ballot shall be used thereat.  
The ordinance proclaiming said general municipal election and giving notice thereof is Ordinance No. 7354 (New Series), adopted February 28, 1957 and reference is hereby made to such ordinance for the precincts, polling places and officers of election provided for such municipal election. A list of the polling places and names of officers of election for such general municipal election is on file in the office of the City Clerk of The City of San Diego.

Section 8. That except as otherwise provided in this ordinance, the election called hereby shall be conducted as provided by law for other municipal elections in said city. Only qualified voters of The City of San Diego shall be permitted to vote at the election called by this ordinance.  
Section 9. The City Clerk is hereby directed to cause sample ballots and polling place slips to be mailed to the registered qualified electors entitled to vote at the election called by this ordinance. Such mailing shall be in the manner and within the time provided by the Election Code of said city.  
Section 10. That the City Clerk shall certify to the passage and adoption of this ordinance by the Council of said City by a vote of more than two-thirds of all of its members, and shall cause this ordinance to be published once a day for at least seven (7) days prior to the time appointed for the holding of said election in the city official newspaper, to wit: THE SAN DIEGO UNION, a newspaper printed and published seven days a week in said city. No notice of such election other than that herein provided need be given.  
Section 11. This ordinance shall take effect immediately upon its passage.

boa Park, bounded on the west by Park Boulevard, on the north by Morley Field Drive, on the east by Florida Street, and on the south by Laurel Drive; said civic theatre to be used for operas, musical events, shows, pageants, public gatherings and other public uses, and to include radio and television facilities, movie projection booth, equipment, furniture and furnishings, and all incidental facilities necessary therefor, and said improvement to include the construction of public utilities, paving, drains, sewers, walks, drives, and all other works, structures, and facilities necessary therefor.

Section 6. That the ballots may be marked as provided in the Election Code of said City of San Diego. A cross (X) placed in the voting square after the word "Yes" in the manner provided by this ordinance shall be counted in favor of the adoption of said proposition. A cross (X) placed in the voting square after the word "No" in the manner provided by this ordinance shall be counted against the adoption of the proposition.

Section 7. That the special municipal election hereby called shall be and is hereby ordered consolidated with The City of San Diego general municipal election to be held on said date, and within The City of San Diego the precincts, polling places, voting booths and officers of election for the special municipal election hereby called shall be the same as those provided for said general municipal election, and such elections shall be held in all respects as if there were only one election, and only one ticket or ballot shall be used thereat.

The ordinance proclaiming said general municipal election and giving notice thereof is Ordinance No. 7354 (New Series), adopted February 28, 1957 and reference is hereby made to such ordinance for the precincts, polling places and officers of election provided for such municipal election. A list of the polling places and names of officers of election for such general municipal election is on file in the office of the City Clerk of The City of San Diego.

Section 8. That except as otherwise provided in this ordinance, the election called hereby shall be conducted as provided by law for other municipal elections in said city. Only qualified voters of The City of San Diego shall be permitted to vote at the election called by this ordinance.

Section 9. The City Clerk is hereby directed to cause sample ballots and polling place slips to be mailed to the registered qualified electors entitled to vote at the election called by this ordinance. Such mailing shall be in the manner and within the time provided by the Election Code of said city.

Section 10. That the City Clerk shall certify to the passage and adoption of this ordinance by the Council of said City by a vote of more than two-thirds of all of its members, and shall cause this ordinance to be published once a day for at least seven (7) days prior to the time appointed for the holding of said election in the city official newspaper, to wit: THE SAN DIEGO UNION, a newspaper printed and published seven days a week in said city. No notice of such election other than that herein provided need be given.

Section 11. This ordinance shall take effect immediately upon its passage.

AN ORDINANCE AMENDING SECTIONS 93.1517,  
93.1518 AND 93.1519 OF THE SAN DIEGO  
MUNICIPAL CODE, REGULATING FUEL GAS IN-  
STALLATIONS.

BE IT ORDAINED By the Council of the City of San Diego  
as follows:

Section 1. That Sections 93.1517, 93.1518 and 93.1519  
of the San Diego Municipal Code, be, and the same are hereby  
amended to read as follows:

"SEC. 93.1517 REQUIRED GAS SUPPLY.

(a) The following regulations as set forth in this  
section and in Sec. 93.1518, 'Required Gas Piping Size'  
shall be the standard for the installation of gas piping.  
All regulations and tables are based on the use of  
natural gas, of 0.65 specific gravity, supplied at ap-  
proximately seven (7") inches water column pressure at  
the inlet of the meter.

(b) The hourly volume of gas required at each  
piping outlet shall be taken as not less than the maxi-  
mum hourly rating, as specified by the manufacturer of  
the appliance or appliances to be connected to each such  
outlet.

(c) Where the manufacturer's input rating of an ap-  
pliance is given in British Therman Units (B.T.U.) per  
hour, this input rating shall be divided by the heating  
value of the gas to be delivered in B.T.U. per cubic  
foot, to obtain the corresponding gas input demand in  
cubic feet per hour.

(d) Where the gas appliances to be installed have  
not been definitely specified, Table A may be used as a  
reference to estimate requirements in cubic feet per hour  
of typical appliances.

(e) The size of the supply piping outlet for any  
gas appliance shall be not less than the size of the inlet

connection of that appliance and in no case smaller than one-half (1/2") inch. The minimum size of any piping outlet for a gas range shall be three fourths (3/4") inch.

EXCEPTION: Appliances burning not more than 35,000 B.T.U. per hour may be connected with not less than a three-eighths (3/8") inch O.D. approved connector.

"SEC. 93.1518 REQUIRED GAS PIPING SIZE

(a) Where the maximum input demand does not exceed two hundred fifty (250) cubic feet per hour and the maximum length of piping between the meter and the most distant outlet is not over two hundred fifty (250') feet, the size of each section and each outlet of any system of gas piping shall be determined by means of Table B of this section. Other systems within the range of Table B may be sized from that table or by means of the methods set forth in

subsection (c) of this section.

(b) To determine the size of each section of pipe in any system within the range of Table B proceed as follows:

(1) Measure the length of the pipe from the gas meter location to the most remote outlet on the system.

(2) In Table B, select the column showing that distance, or the next longer distance, if the table does not give the exact length.

(3) Use this vertical column to locate ALL gas demand figures for this particular system of gas piping.

(4) Starting at the most remote outlet, find<sup>in</sup> the vertical column just selected, the gas demand for that outlet. If the exact figure of demand is not shown, choose the next larger figure below in the column.

(5) Opposite this demand figure, in the first column at the left in Table B will be found the correct size of pipe.

(6) Proceed in a similar manner for each outlet and each section of pipe. For each section of pipe determine the total gas demand supplied by that section.

(c) For conditions other than those covered by subsection (a) hereof, such as longer runs or greater gas demands, the size of each gas piping system shall be determined by standard engineering methods acceptable to the Department of Building Inspection and each such system shall be so designed that the total pressure drop between the meter or other point of supply, and any outlet, when full demand is being supplied to all outlets, will at no time exceed 0.5 inches (1/2") water column pressure.

(d) Where gas of a different specific gravity is delivered, or where the pressure is higher than eleven (11") inches of water column, the size of piping required

shall be calculated by means of standard engineering methods satisfactory to both the Department of Building Inspection and the Gas Utility supplying the gas.

EXAMPLE ILLUSTRATING USE OF TABLES A AND B

FIGURE 1

Problem: Determine the required pipe size of each section and outlet of the piping system shown in Figure 1. Gas to be used has 0.65 specific gravity and 1000 B.T.U. per cubic foot, delivered at seven (7") inch water column pressure.

Figure 1 (Continued)

SOLUTION:

(1) Maximum gas demand of outlet A -- 30 cu. ft. per hour (from Table A).

Maximum gas demand of outlet B -- 3 cu. ft. per hour (from Table A).

Maximum gas demand of outlet C -- 75 cu. ft. per hour (from Table A).

Maximum gas demand of outlet D -- 138.88 cu. ft. per hour (150,000 B.T.U. per hour  $\div$  1080).

(2) The length of pipe from the gas meter to the most remote (outlet A) is 60 ft. This is the only distance used.

(3) Using column marked 60' in Table 2:

Outlet A, supplying 30 c.f.h., requires 1/2" pipe.

Outlet B, supplying 3 c.f.h. requires 1/2" pipe.

Section 1, supplying outlets A and B, or 33 c.f.h., requires 1/2" pipe.

Outlet C, supplying 75 c.f.h., requires 3/4" pipe (due to range connection being 3/4").

Section 2, supplying outlets A, B, and C, or 108 c.f.h., requires 3/4" pipe.

Outlet D, supplying 138.88 c.f.h., requires 1" pipe.

Section 3, supplying outlets A, B, C, and D, or 246.88 c.f.h. requires 1" pipe.

"SEC. 93.1519 NATURAL GAS FUEL IN HOUSE TRAILERS.

1. It shall be unlawful for any person to convert Liquid Petroleum Gas fired heaters, ranges, water heaters or any other device, fixture or unit in any house trailer to the use of natural gas fuel.

2. Before gas piping of any kind is installed in any house trailer a permit must be obtained from the Department of Building Inspection to do so.

3. Upon completion of the installation, alteration, or repair of any gas piping and prior to the use thereof, the Department of Building Inspection shall be notified

that such gas piping is ready for inspection.

4. When the work for which the permit is issued has been approved by the Department of Building Inspection, a certificate so stating shall be issued to the person taking out the permit. Said Certificate of approval must be posted on the trailer in a conspicuous place, visible from outside the trailer at all times.

5. The gas piping supplying natural gas to the house trailer shall comply with all the provisions of this division regulating the installation and use of gas piping.

6. All house trailer gas piping shall be made up of material and pipe sizes and be inspected as specified in this Division.

7. Every gas fired unit in any house trailer shall be mechanically sound; operatively and structurally.

8. All gas space heating equipment and/or water heaters shall be connected to an approved vent extending to a point above the roof and shall not terminate in any roofed over area.

9. The vent may be sized to conform to the size of the vent collar on the unit to be vented.

10. Every gas fired unit in any house trailer shall be approved by the 'American Gas Association' or the 'Underwriters' Laboratory'.

11. An approved vent duct of no less area than that of six (6) inch round pipe, located in the ceiling immediately above the gas range and/or gas actuated refrigerator shall be installed and extended to the outside air.

(a) Separate ducts will be required for each device if located in a separate room.

(b) In lieu of the above an approved forced draft system of ventilation may be provided.

12. Every trailer or trailer coach shall be provided with an individual branch service line delivering gas at not to exceed seven (7) inches of water column pressure.

(a) The outlet shall terminate on the same side of the site as the sewer connection.

13. All gas piping shall be installed below ground except that portion of the branch line riser to which the trailer gas pipe system and the trailer piping is connected.

(a) All such piping to a point on the trailer riser six inches (6") above the surrounding ground shall be protected from corrosion by the use of wrapping equal to San Diego Pipe Wrapping Specifications No. 1-A-56. Such joints and fittings must be inspected and approved before being wrapped or covered.

14. The gas piping branch line to a trailer site shall terminate in an enclosure or at a location where any piping, regulator or valve will be provided with protection from mechanical injury or damage by vehicles. Such protection may consist of posts, fencing or other permanent barriers which would prevent contact by vehicles.

(a) At the termination of the branch line riser, there shall be installed an approved gas service cock or shut off valve in addition to an approved snap off valve equipped with a nipple breakable at not more than 27 foot pounds, to which the house trailer shall be connected.

(b) All shut off valves shall be lubricated plug cocks. Lever handle shut off cocks are prohibited.

(c) The immediate area around such gas piping risers shall be maintained free of rubbish or other stored materials. All valves and regulators shall be readily accessible for repair or inspection.

(d) Between the main shut off cock and the snap off valve there shall be installed an approved dust trap.

15. Responsibility. The trailer park owner or his agent shall be responsible for compliance with the provisions of this Division in the Trailer Park under his jurisdiction.

Section 2. This ordinance shall take effect and be in force on the thirty-first day from and after its passage.

## ORDINANCE NO. 7369

(NEW SERIES)

AN ORDINANCE AMENDING SECTIONS 93.1517, 93.1518 AND 93.1519 OF THE SAN DIEGO MUNICIPAL CODE, REGULATING FUEL GAS INSTALLATIONS.

Be it ordained by the Council of the City of San Diego as follows: Section 1. That Sections 93.1517, 93.1518 and 93.1519 of the San Diego Municipal Code, be, and the same are hereby amended to read as follows:

- SEC. 93.1517 REQUIRED GAS SUPPLY.**
- (a) The following regulations as set forth in this section and in Sec. 93.1518, "Required Gas Piping Size" shall be the standard for the installation of gas piping. All regulations shall be based on the use of natural gas, of 0.65 specific gravity, applied at approximately seven (7") inches water column pressure at the inlet of the meter.
- (b) The hourly volume of gas required at each piping outlet shall be taken as not less than the maximum hourly rating, as specified by the manufacturer of the appliance or appliances to be connected to each such outlet.
- (c) Where the manufacturer's input rating of an appliance is given in British Therman Units (B.T.U.) per hour, this input rating shall be divided by the heating value of the gas to be delivered in B.T.U. per cubic foot, to obtain the corresponding gas input demand in cubic feet per hour.
- (d) Where the gas appliances to be installed have not been definitely specified, Table A may be used as a reference to estimate requirements in cubic feet per hour of typical appliances.
- (e) The size of the supply piping outlet for any gas appliance shall be not less than the size of the inlet connection of that appliance and in no case smaller than one-half (1/2") inch. The minimum size of any piping outlet for a gas range shall be three fourths (3/4") inch.
- EXCEPTION:** Appliances burning not more than 35,000 B.T.U. per hour may be connected with not less than a three-eighths (3/8") inch O.D. approved connector.

### TABLE A APPROXIMATE MAXIMUM DEMAND OF TYPICAL GAS APPLIANCES

(Based on Natural gas of 1000 B.T.U. per Cubic Foot)

Appliance	Demand
Domestic Gas Range	75
Storage Water Heater - up to 30 gal. tank	30
Storage Water Heater - up to 50 gal. tank	45
Domestic Clothes Drier	20
Fireplace Log Lighter	25
Barbecues (Residential)	50
Gas Refrigerator	3
Business Burner	3
Home Trailers (each)	10
Gas Engines (per horsepower)	50
Steam Boilers (per horsepower)	50

### SEC. 93.1518 REQUIRED GAS PIPING SIZE

(a) Where the maximum input demand does not exceed two hundred (200) cubic feet per hour and the maximum length of piping between the meter and the most distant outlet is not over two hundred fifty (250') feet, the size of each section and each outlet of any system of gas piping shall be determined by means of Table B of this section. Other systems within the range of Table B may be sized from that table or by means of the methods set forth in subsection (c) of this section.

(b) To determine the size of each section of pipe in any system within the range of Table B proceed as follows:

(1) Measure the length of the pipe from the gas meter location to the most remote outlet on the system.

(2) In Table B, select the column showing that distance, or the next larger distance, if the table does not give the exact length.

(3) Use this vertical column to locate ALL gas demand figures for this particular system of gas piping.

(4) Starting at the most remote outlet, find in the vertical column just selected, the gas demand for that outlet. If the exact figure of demand is not shown, choose the next larger figure below in the column.

(5) Opposite this demand figure, in the first column at the left in Table B, will be found the correct size of pipe.

(6) Proceed in a similar manner for each outlet and each section of pipe. For each section of pipe determine the total gas demand supplied by that section.

(7) For conditions other than those covered by subsection (a) hereof, such as longer runs or greater gas demands, the size of each gas piping system shall be determined by standard engineering methods acceptable to the Department of Building Inspection and each such system shall be so designed that the total pressure drop between the meter or other point of supply, and any outlet, when full demand is being supplied to all outlets, will at no time exceed 0.6 inches (1/2") water column pressure.

(8) Where gas of a different specific gravity is delivered, or where the pressure is higher than six (6") inches water column, the size of piping required shall be calculated by means of standard engineering methods satisfactory to both the Department of Building Inspection and the Gas Utility supplying the gas.

**NATURAL GAS FUEL IN HOUSE TRAILERS.**

It shall be unlawful for any person to convert Liquid Petroleum Gas heaters, ranges, water heaters or any other device, fixture or unit in any house trailer to the use of natural gas fuel.

Before gas piping of any kind is installed in any house trailer a permit must be obtained from the Department of Building Inspection to cover completion of the installation, alteration, or repair of any gas piping and prior to the use thereof, the Department of Building Inspection shall be notified that such gas piping is ready for inspection.

When the work for which the permit is issued has been approved by the Department of Building Inspection, a certificate so stating shall be issued to the person taking out the permit. Said Certificate of approval shall be posted on the trailer in a conspicuous place, visible to the public at all times.

The gas piping supplying natural gas to the house trailer shall comply with the provisions of this division regulating the installation and use of gas piping.

House trailer gas piping shall be made up of material and shall be inspected as specified in this Division.

Every gas fired unit in any house trailer shall be mechanically supported and structurally secured.

All gas space heating equipment and/or water heaters shall be connected to an approved vent extending to a point above the roof and shall terminate in any roofed over area.

The vent may be sized to conform to the size of the vent collar and shall be tested.

Every gas fired unit in any house trailer shall be approved by the Department of Building Inspection or the Underwriters' Laboratory.

An approved vent shall be of not less area than that of six (6) inch round pipe and shall terminate immediately above the gas range and/or gas water heater and shall be installed and extended to the outside air.

Separate vents will be required for each device if located in a separate room.

In lieu of the above an approved forced draft system of ventilation shall be provided.

Every house trailer or trailer coach shall be provided with an individual vent for the delivery of gas at not to exceed seven (7) inches of diameter.

Vents shall terminate on the same side of the site as the trailer.

Gas piping shall be installed below ground except that portion between the trailer and the riser to which the trailer gas pipe system and the trailer is connected.

Each riser to a point on the trailer riser six inches (6") above the ground shall be protected from corrosion by the application of a wrapping equal to San Diego Pipe Wrapping Specifications No. 1.

Each riser and fittings must be inspected and approved before being covered.

The piping branch line to a trailer site shall terminate in an approved gas service cock or shut off valve in addition to an approved snap off valve equipped with a nipple breakable at not more than 20 feet beyond, to which the house trailer shall be connected.

(c) All shut off valves shall be lubricated plug cocks. Lever handle plug cocks are prohibited.

The immediate area around such gas piping risers shall be maintained free of rubbish or other stored materials. All valves and regulators shall be readily accessible for repair or inspection.

Between the main shut off cock and the snap off valve there shall be installed an approved shut trap.

The trailer park owner or his agent shall be responsible for compliance with the provisions of this Division in the installation of gas piping.

This ordinance shall take effect and be in force on the 1st day of March, 1957.

ORDINANCE NO. \_\_\_\_\_  
(New Series)

AN ORDINANCE OF THE CITY OF SAN DIEGO, CALIFORNIA, ORDERING, CALLING, PROVIDING FOR AND GIVING NOTICE OF A SPECIAL MUNICIPAL ELECTION TO BE HELD IN SAID CITY ON TUESDAY, APRIL 16, 1957 FOR THE PURPOSE OF SUBMITTING TO THE QUALIFIED VOTERS OF SAID CITY A CERTAIN PROPOSITION FOR THE RATIFICATION OF AN ORDINANCE AUTHORIZING THE SALE AND CONVEYANCE OF A PORTION OF PUEBLO LOT 1275 AND ALL OF UNNUMBERED PUEBLO LOT SOMETIMES REFERRED TO AS PUEBLO LOT 1185 OF THE PUEBLO LANDS OF SAN DIEGO, IN SAID CITY; AND CONSOLIDATING SAID SPECIAL MUNICIPAL ELECTION WITH THE MUNICIPAL GENERAL ELECTION TO BE HELD ON SAID DATE.

BE IT ORDAINED, By the Council of The City of San Diego, as follows:

Section 1. That a Special Municipal Election be held, and the same is hereby called and ordered to be held, in The City of San Diego, California, on the 16th day of April, 1957 for the purpose of submitting to the qualified voters of said City a proposition for the ratification of Ordinance No. 7360 (New Series) hereinafter set forth, and for the objects and purposes set forth in said ordinance and hereinafter stated.

Section 2. That the following ordinance be, and the same is hereby submitted to the electors of The City of San Diego at the Special Municipal Election to be held in said City on the 16th day of April, 1957:

"ORDINANCE NO. 7360  
(New Series)

AN ORDINANCE AUTHORIZING THE SALE AND CONVEYANCE OF THE WESTERLY 150 FEET OF PUEBLO LOT 1275 AND ALL OF UNNUMBERED PUEBLO LOT SOMETIMES REFERRED TO AS PUEBLO LOT 1185 OF THE PUEBLO LANDS OF THE CITY OF SAN DIEGO, UPON SUCH TERMS AND CONDITIONS AS MAY BE DEEMED BY THE CITY COUNCIL TO BE IN THE BEST INTERESTS OF THE PEOPLE OF THE CITY OF SAN DIEGO.

BE IT ORDAINED, By the Council of The City of San Diego, as follows:

Section 1. That the Manager of The City of San Diego be, and he is hereby authorized and empowered to sell and convey the following portion of Pueblo Lot and Pueblo Lot lying north of the San Diego River, to-wit:

The westerly 150 feet of Pueblo Lot 1275 of the Pueblo Lands of The City of San Diego, in the County of San Diego, State of California, according to map thereof made by James Pascoe in 1870, a copy of which said map was filed in the office of the San Diego County Recorder November 14, 1921 and is known as Miscellaneous Map No. 36; and

That certain Unnumbered Pueblo Lot of the Pueblo Lands of The City of San Diego, in the County of San Diego, State of California, sometimes referred to as Pueblo Lot 1185, bounded on the east by the easterly boundary of the said Pueblo Lands, on the west by the east line of Pueblo Lot 1186, and on the south by the north line of Pueblo Lot 1184, according to Map thereof made by James Pascoe in 1870, a copy of which said map was filed in the office of the San Diego County Recorder November 14, 1921 and is known as Miscellaneous Map No. 36.

Section 2. Such sale and conveyance shall be made upon such terms and conditions as may be deemed by the City Council to be in the best interests of the people of The City of San Diego.

Section 3. This ordinance shall become effective only after it is affirmatively approved by a majority vote of the qualified electors of The City of San Diego voting at the Special Municipal Election to be held in said City on the 16th day of April, 1957, at which election such proposition ratifying this ordinance is submitted.

Said ordinance shall be presented and printed upon the ballot, and submitted to the voters, in the manner and form set out in Section 3 of this ordinance.

Section 3. That the ordinance set out in Section 2 of this ordinance shall be printed upon the ballot and submitted to the voters at said Special Municipal Election to be held in said City on April 16, 1957, in the manner and form following:

To vote on any measure, stamp a cross in the voting square after the word "Yes" or after the word "No". All marks, except the cross are forbidden. All distinguishing marks or erasures are forbidden and make the ballot void.

If you wrongly stamp, tear or deface this ballot, return it to the inspector of election and obtain another.

PROPOSITION _____. Shall Ordinance No. 7360 (New Series) of the ordinances of The City of San Diego, entitled, "An Ordinance authorizing the sale and conveyance of the westerly 150 feet of Pueblo Lot 1275 and all of unnumbered Pueblo Lot sometimes referred to as Pueblo Lot 1185 of the Pueblo Lands of The City of San Diego, upon such terms and conditions as may be deemed by the City Council to be in the best interests of the people of The City of San Diego," adopted by the Council of said City March 5, 1957, be ratified?	YES	
	NO	

Section 4. That the polls for said election shall be opened at seven o'clock A.M. of the day of said election and remain open continuously from said time until seven o'clock P.M. of the same day, when said polls shall be closed, except as provided in Section 27.0731 of the Election Code of said City.

Section 5. Absent Voter Ballots may be marked as provided in the Election Code of said City of San Diego. A cross (+) placed in the voting square after the word "Yes" in the manner provided by this ordinance shall be counted in favor of the adoption of said proposition. A cross (+) placed in the voting square after the word "No" in the manner provided by this ordinance shall be counted against the adoption of the proposition.

Section 6. That the special municipal election hereby called shall be and is hereby ordered consolidated with The City of San Diego general municipal election to be held on said date, and within The City of San Diego the precincts, polling places, voting booths and officers of election for the special municipal election hereby called shall be the same as those provided for said general municipal election, and such elections shall be held in all respects as if there were only one election, and only one ticket or ballot shall be used thereat.

The ordinance proclaiming said general municipal election and giving notice thereof is Ordinance No. 7354 (New Series), adopted February 28, 1957, and reference is hereby made to such ordinance for the precincts, polling places and officers of election provided for such municipal election. A list of the polling places and names of officers of election for such general municipal election is on file in the office of the City Clerk of The City of San Diego.

Section 7. That except as otherwise provided in this ordinance, the election called hereby shall be conducted as provided by law for other municipal elections in said city. Only qualified voters of The City of San Diego shall be permitted to vote at the election called by this ordinance.

Section 8. The City Clerk is hereby directed to cause sample ballots and polling place slips to be mailed to the

registered qualified electors entitled to vote at the election called by this ordinance. Such mailing shall be in the manner and within the time provided by the Election Code of said City.

Section 9. The City Clerk of said City is hereby directed to cause this ordinance to be published once in The San Diego Union, being the official newspaper of said City; and said City Clerk is further directed to cause the said ordinance hereinabove set out to be printed, and he shall mail a copy thereof, enclosed in an envelope with a sample ballot, to each voter at least ten days prior to the said election.

Section 10. This ordinance shall take effect and be in force from and after its passage.

Section 4. That the polls for said election shall be opened at seven o'clock A.M. of the day of said election and remain open continuously from said time until seven o'clock P.M. of the same day, when said polls shall be closed, except as provided in Section 27.0731 of the Election Code of said City.

Section 5. Absent Voter ballots may be marked as provided in the Election Code of said City of San Diego. A cross (X) placed in the voting square after the word "Yes" in the manner provided by this ordinance shall be counted in favor of the adoption of said proposition. A cross (X) placed in the voting square after the word "No" in the manner provided by this ordinance shall be counted against the adoption of the proposition.

Section 6. That the special municipal election hereby called shall be and is hereby ordered consolidated with The City of San Diego general municipal election to be held on said date, and within The City of San Diego the precincts, polling places, voting booths and officers of election for the special municipal election hereby called shall be the same as those provided for said general municipal election, and such elections shall be held in all respects as if there were only one election, and only one ticket or ballot shall be used thereat.

The ordinance proclaiming said general municipal election and giving notice thereof is Ordinance No. 7354 (New Series), adopted February 28, 1957, and reference is hereby made to such ordinance for the precincts, polling places and officers of election provided for such municipal election. A list of the polling places and names of officers of election for such general municipal election is on file in the office of the City Clerk of The City of San Diego.

Section 7. That except as otherwise provided in this ordinance, the election called hereby shall be conducted as provided by law for other municipal elections in said city. Only qualified voters of The City of San Diego shall be permitted to vote at the election called by this ordinance.

Section 8. The City Clerk is hereby directed to cause sample ballots and pollingplace slips to be mailed to the registered qualified electors entitled to vote at the election called by this ordinance. Such mailing shall be in the manner and within the time provided by the Election Code of said City.

Section 9. The City Clerk of said City is hereby directed to cause this ordinance to be published once in The San Diego Union, being the official newspaper of said City; and said City Clerk is further directed to cause the said ordinance hereinafter set out to be printed, and he shall mail a copy thereof, enclosed in an envelope with a sample ballot, to each voter at least ten days prior to the said election.

Section 10. This ordinance shall take effect and be in force from and after its passage.

Approved as to form by J. F. DuPAUL,  
City Attorney.

By ALAN M. FIRESTONE,  
Chief Deputy.

ORDINANCE No. 7072  
(New Series)

AN ORDINANCE AMENDING CHAPTER IX, DIVISION 5 OF THE SAN DIEGO MUNICIPAL CODE BY AMENDING SECTION 95.0103 THEREOF, AND BY ADDING THERETO, SEVEN NEW SECTIONS TO BE KNOWN AS AND NUMBERED SECTIONS 95.0103.1, 95.0103.2, 95.0103.3, 95.0103.4, 95.0103.5, 95.0103.6 AND 95.0103.7, REGULATING SIGNS IN CERTAIN ZONES.

BE IT ORDAINED, by the Council of The City of San Diego, as follows:

Section 1. That Section 95.0103 of the San Diego Municipal Code be, and the same is hereby amended to read as follows:

"Sec. 95.0103 SPECIFIC REGULATIONS FOR CERTAIN ZONES - VARIANCES.

No person shall install or maintain any sign in the zones listed in the following subsections, except as there-in permitted; provided however, that such requirements or restrictions may be waived, in whole or in part, upon such conditions as are deemed necessary, by a separate variance or as part of a zone variance, subject to all the procedures, requirements and rights established for variances in Chapter X, Division 5 of this Code."

Section 2. That the San Diego Municipal Code be, and the same is hereby amended by adding thereto seven new sections to be known as and numbered Sections 95.0103.1, 95.0103.2, 95.0103.3, 95.0103.4, 95.0103.5, 95.0103.6, and 95.0103.7.

"Sec. 95.0103.1 Zone R-1A. One (1) unlighted name plate of a maximum of four (4) square feet and one (1) unlighted sign of a maximum of eight (8) square feet offering the premises for sale or lease may be displayed.

"Sec. 95.0103.2 Zone R-1. One (1) unlighted name plate of a maximum of one (1) square foot in area attached to and parallel with the exterior wall of the building,

or one (1) unlighted name plate of a maximum of four (4) square feet in area identifying farms, nurseries, parks, playgrounds and golf courses, and one (1) unlighted sign of a maximum of eight (8) square feet offering the premises for sale or lease may be displayed. Such signs shall be located back of the setback lines.

"Sec. 95.0103.3 Zone R-2. Any sign permitted in Zone R-1 shall be permitted in Zone R-2. One sign of a maximum of eight (8) square feet in area may be displayed back of the setback line by churches, schools and telephone exchanges.

"Sec. 95.0103.4 Zone R-4. One (1) sign, visible from the exterior of the building and designating the permitted principal use of the premises, shall be permitted fronting each street.

The sign for each street frontage shall not exceed forty (40) square feet in area, nor exceed one tenth of a square foot for each lineal foot of street frontage of the premises, whichever is the lesser area, provided that the sign on any one premise need not be less than eight (8) square feet in area.

Signs shall be attached to but not project more than sixteen (16) inches beyond the face of the building, nor project above the parapet or eaves of the building. Face of signs shall be parallel to the face of the building.

"Sec. 95.0103.5 Zone RP. One (1) sign, visible from the exterior of the building and designating the permitted principal use of the premises, shall be permitted fronting each street.

The sign for each street frontage shall not exceed twenty feet by four feet (20' x 4') maximum dimension, nor exceed three-tenths of a square foot for each lineal

foot of street frontage of the premises, whichever is the lesser area, provided that the sign on any one premise need not be less than eight (8) square feet in area.

Signs shall be attached to but not project more than sixteen (16) inches beyond the face of the building, not project above the parapet or eaves of the building. Face of signs shall be parallel to the face of the building.

"Sec. 95.0103.6 Zone RC. The aggregate area of all signs permitted on the premises in Zone RC shall not exceed five-tenths of a square foot for each lineal foot of the street frontage occupied by the premises, provided that the aggregate area of all signs used by a single place of business need not be less than fifteen (15) square feet.

No sign shall exceed twenty-five feet by five feet (25' x 5') in maximum dimensions.

Signs shall be attached to but not project more than sixteen (16) inches beyond the face of the building nor project above the parapet or eaves of the building.

"Sec. 95.0103.7 Zone SC.

(1) Signs shall be attached to, but not project more than sixteen (16) inches beyond the face of the building, nor project above the parapet, roof or ridgeline of the building, whichever is the highest. The face of the sign and the lettering shall be parallel to the face of the building.

(2) The total size of signs on any one street frontage of a building is limited to twenty-five (25) square feet or one (1) square foot for each lineal foot of the street frontage of the premises, whichever is larger.

(3) Where the face of the building sets back from the street property line in excess of twenty (20) feet, all or part of the permissible area of signs required to

be attached to the face of the building may, in lieu thereof, be placed upon or over the roof, provided that:

(a) The overall distance between the highest and lowest part of any sign or group of signs shall not exceed three (3) feet, and

(b) The highest part of any sign shall not be more than three feet six inches (3' 6") above the highest part of the roof nor more than twenty (20) feet above the ground surface.

(4) Where the face of the building sets back from the property line in excess of twenty (20) feet, single or double faced identifying signs (in addition to those on the building itself) are permitted to be placed on a pole or poles, provided that:

(a) No part of such signs shall extend over public property or be more than twenty (20) feet above the ground surface.

(b) The total area of such signs on any one street frontage of the premises shall not exceed four-tenths of a square foot per lineal foot of such street frontage or thirty-seven and one-half (37-1/2) square feet, whichever is smaller. Corner signs must be allocated by the proprietor to one street frontage or the other, for the purpose of applying this formula, all such signs being allocated to the same street. A corner sign is defined to be any sign placed near the intersection of the two street frontages and designed to be visible from both streets.

(c) For the purpose of this subsection (4), a double faced sign is one where the two sides of the sign face in opposite directions, in which case, only one face shall be included in the computation of the permissible area.

(5) All lighting for signs shall be constant light. No flashing or animated signs shall be permitted."

Section 3. This ordinance shall take effect and be in force on the thirty-first day from and after its passage.

ORDINANCE NO. \_\_\_\_\_  
(New Series)

AN ORDINANCE AMENDING SECTION 101.0505  
OF THE SAN DIEGO MUNICIPAL CODE RELATING  
TO CONDITIONAL USE PERMITS.

BE IT ORDAINED by the Council of The City of San Diego,  
as follows:

Section 1. That Section 101.0505 of the San Diego  
Municipal Code, be, and the same is hereby amended to read as  
follows:

"SEC. 101.0505. CONDITIONAL USE PERMITS AUTHORIZED BY  
PLANNING COMMISSION. §

(a) The Planning Commission shall have authority  
under conditions herein provided to permit by conditional  
use permit, the following uses in any zone:

- (1) Golf course (excepting driving tees or ranges,  
pitch and putt golf courses, miniature courses  
and similar uses operated for commercial  
purposes)
- (2) Hospitals or sanitariums
- (3) Mausoleums
- (4) Radio or television transmission stations
- (5) Educational institutions
- (6) Airports
- (7) Cemeteries
- (8) Institutions of philanthropic or eleemosynary  
nature.
- (9) Public utilities and public service uses or  
structures
- (10) Establishment of enterprises involving large  
assemblages of people or automobiles, provided  
such establishments are located a minimum of  
500 feet from an existing house or subdivision  
and served by separate approved access roads to  
main highways, including, but not limited to:

00557

- a. Amusement parks
- b. Circuses
- c. Fairgrounds
- d. Open-air theatres
- e. Race tracks
- f. Recreational centers privately operated

(11) Natural resources, development of, together with necessary buildings, apparatus or appurtenances incident thereto, except the drilling or production of oil, gas or other hydrocarbon substances.

(12) Trailer parks

(13) Housing projects or hotel development in which incidental businesses or recreational facilities for the convenience of the occupants may be located provided the property has a gross acreage of not less than five acres.

(14) Permit any use in an R-4 zone which was authorized under the provisions of Section 101.0508 as amended by Ordinance No. 5835 (New Series), and which use is now prohibited by section 101.0508 on property which was zoned R-4 on or before April 12, 1957. The provisions of this subsection shall terminate and be of no effect on or after April 12, 1962.

(b) Application - Form and Contents. Application to permit any conditional use referred to in this section may be made by the owner of the property affected, or it may be initiated by the Planning Commission. Application shall be verified and filed with the Planning Department upon forms provided by it and shall state fully the circumstances and conditions relied upon as grounds for the application and shall be accompanied by adequate plans and legal description of the property involved and an outline of the proposed use.

(c) Hearing Date - Notice. Upon filing the application, the Planning Commission shall set the matter for public hearing. Notice of the time and place and purpose of such hearing shall be given as follows:

- (1) By at least one publication in the official newspaper of The City of San Diego, not less than ten (10) days prior to date of hearing.

00558

(2) By mailing notices at least ten (10) days prior to the date of such hearing to the owners of all property within 300 feet of the exterior boundaries of the property involved. The last known name and address of each owner as shown on the records of the County Assessor may be used for the aforementioned notice.

Where any property within 300 feet of the exterior boundaries of the property involved in the application is under the same ownership as the subject property, the owners of the property adjoining and within 300 feet of the boundaries of the additional property owned by the applicant shall be notified in the same manner as herein provided.

If the owner of property within 300 feet of the exterior boundaries of the property involved, or owned by the applicant as aforesaid, signs the applicant's petition approving the conditional use permit, no notice need be sent to said property owner unless he requests in writing to be so notified.

The application, together with plans and other data submitted shall be available for public inspection in the office of the City Planning Department.

(d) Hearing Date - Continuances. Upon the date set for the hearing, the Planning Commission shall hear the application, unless for cause the Planning Commission shall, on the date, continue the matter. If a date certain for the continued hearing is thereupon announced in open meeting, no further notice thereof need be given.

(e) Decision upon Application for Conditional Use Permit.

After the public hearing, the Planning Commission may, by resolution, grant a conditional use permit, if the Planning Commission finds from the evidence presented at the hearing, that all the following facts exist:

(1) That the proposed use at the particular location is necessary or desirable to provide a service or facility which will contribute to the general well-being of the

neighborhood or the community; and

- (2) That such use will not, under the circumstances of the particular case, be detrimental to the health, safety or general welfare of persons residing or working in the vicinity, or injurious to property or improvements in the vicinity; and
- (3) That the proposed use will comply with the regulations and conditions specified in the Code for such use.
- (4) That the granting of this conditional use will not adversely affect the Master Plan of the City or the adopted plan of any governmental agency.

In granting any conditional use the Planning Commission may impose such conditions as it deems necessary and desirable to protect the public health, safety or welfare in accordance with the purpose and intent of the zoning ordinance.

(f) Planning Commission to make finding of facts. In granting or denying a conditional use permit, the Planning Commission shall make a written finding which shall specify all facts relied upon by said Planning Commission in rendering its decision and in attaching conditions and safeguards, and shall fully set forth wherein the facts and circumstances fulfill or fail to fulfill the requirements of this section.

A copy of the resolution together with the written finding of facts shall be filed with the City Clerk, in the office of the City Planning Department, in the office of the Director of Building Inspection, and mailed to the applicant.

The decision of the Planning Commission shall be final on the eleventh day following its filing in the office of the City Planning Department, except when appeal is taken to the City Council, as provided in Section 101.0508.

Section 2. This ordinance shall take effect and be in force on the thirty-first day from and after its passage.

AN ORDINANCE AMENDING SECTION 101.0503 OF THE SAN DIEGO MUNICIPAL CODE, RELATING TO CONDITIONAL USE PERMITS.

BE IT ORDAINED by the Council of The City of San Diego, as follows: Section 1. That Section 101.0503 of the San Diego Municipal Code, be, and the same is hereby amended to read as follows:

### SEC. 101.0503. CONDITIONAL USE PERMITS AUTHORIZED BY PLANNING COMMISSION.

(a) The Planning Commission shall have authority under conditions herein provided to permit by conditional use permit, the following uses in any zone:

- (1) Golf course (excepting driving tees or ranges, pitch and putt-golf courses, miniature courses and similar uses operated for commercial purposes).
- (2) Hospitals or sanitariums
- (3) Mausoleums
- (4) Radio or television transmission stations
- (5) Educational institutions
- (6) Airports
- (7) Cemeteries
- (8) Institutions of philanthropic or eleemosynary nature.
- (9) Public utilities and public service uses or structures
- (10) Establishments of enterprises involving large assemblages of people or automobiles, provided such establishments are located a minimum of 500 feet from an existing house or subdivision and served by separate approved access roads to main highways, including, but not limited to:
  - a. Amusement parks
  - b. Circuses
  - c. Fairgrounds
  - d. Open-air theatres
  - e. Race tracks
  - f. Recreational centers privately operated
- (11) Natural resources, development of, together with necessary buildings, apparatus or appurtenances incident thereto, except the drilling or production of oil, gas or other hydrocarbon substances.
- (12) Trailer parks
- (13) Housing projects or hotel development in which incidental businesses or recreational facilities for the convenience of the occupants may be located provided the property has a gross acreage of not less than five acres.
- (14) Permit any use in an R-4 zone which was authorized under the provisions of Section 101.0503 as amended by Ordinance No. 8838 (New Series), and which use is now prohibited by section 101.0503 on property which was zoned R-4 on or before April 12, 1957. The provisions of this subsection shall terminate and be of no effect on or after April 12, 1962.

(b) APPLICATION—FORM AND CONTENTS. Application to permit any conditional use referred to in this section may be made by the owner of the property affected, or it may be initiated by the Planning Commission. Application shall be verified and filed with the Planning Department upon forms provided by it and shall state fully the circumstances and conditions relied upon as grounds for the application and shall be accompanied by adequate plans and legal description of the property involved and an outline of the proposed use.

(c) HEARING DATE—NOTICE. Upon filing the application, the Planning Commission shall set the matter for public hearing. Notice of the time and place and purpose of such hearing shall be given as follows:

- (1) By at least one publication in the official newspaper of The City of San Diego, not less than ten (10) days prior to date of hearing.
- (2) By mailing notices at least ten (10) days prior to the date of such hearing to the owners of all property within 300 feet of the exterior boundaries of the property involved. Section 1. That the title to Division 1, Article 3, Chapter IX of the San Diego Municipal Code be, and the same is hereby amended to read as follows:

"ADMINISTRATION AND AUTHORITY"

Section 2. That Sections 93.0101 and 93.0102 and 93.0103 of the San Diego Municipal Code be, and the same are hereby amended to read as follows:

"SEC. 93.0101 STANDARDS FOR INSTALLATIONS AND MATERIALS

All installations and materials shall be in conformity with the provisions of this article and with approved standards of safety as to life and property. All installations on any public or private piers or on the tidelands shall be in conformity with the provisions of this article. The disposal of the effluent must meet with the approval of the Director of Public Health.

"SEC. 93.0102 DUTIES OF DIRECTOR OF BUILDING INSPECTION

It shall be the duty of the Director of Building Inspection to enforce the provisions of this code. He shall, upon application, grant permits for the installation or alteration of plumbing installations, devices, appliances, and equipment and shall make inspections of all new plumbing installations and re-inspection of all plumbing installations, all as provided in this Article. He shall keep complete records of all permits issued, inspections, and re-inspections made and other official work performed in accordance with the provisions of this Article."

"SEC. 93.0103 AUTHORITY OF DIRECTOR OF BUILDING INSPECTION

(a) The Director of Building Inspection shall have the right during reasonable hours or at any time when extreme danger exists to enter any building in the discharge of his official duties or for the purpose of making an inspection, re-inspection, or test of the plumbing installations, devices, fixtures, appliances, and equipment contained therein. The Director of Building Inspection shall have the authority to cut or disconnect any

SEC..93.0103 (Cont.)

installations in cases of emergencies where necessary to safety of life or property or where such installations may interfere with the work of the Fire Department. The Director of Building Inspection is hereby authorized to disconnect or order discontinuance or removal of plumbing installations, fixtures, devices, appliances, or equipment found to be dangerous to life or property because they are defective or defectively installed.

(b) The Director of Building Inspection may delegate any of his powers or duties to any of his assistants.

Section 3. That Division 1, Article 3, Chapter IX of the San Diego Municipal Code be, and the same is hereby amended by adding thereto new sections to be known as and numbered Sections 93.0104, 93.0105, 93.0106, 93.0107, 93.0108, 93.0109, 93.0110 and 93.0111, and to read as follows:

SEC. 93.0104 BOARD OF PLUMBING EXAMINERS

(a) In order to examine applicant for the Certificate of Competency, there shall be and is hereby created a Board of Plumber Examiners consisting of five (5) members who have qualified by experience and training to pass upon matters pertaining to plumbing installations. The Board shall consist of the Chief Plumbing Inspector, two licensed Plumbing Contractors, and two Journeyman Plumbers holding a valid Certificate of Competency. The Director of Building Inspection or his authorized deputy shall serve as secretary of the Board. The Board shall be appointed by the City Manager and shall hold office at his pleasure. All members of the Board shall serve without pay.

(b) The Board shall adopt reasonable rules and regulations for conducting investigations and examinations, and shall render all decisions and findings in writing to the Director of Building Inspection, with a duplicate copy to the applicant.

(c) The Board shall meet when required for the purpose of conducting business, on a date selected by the Board. A majority of the members shall constitute a quorum.

SEC. 93.0105 ALTERNATE MATERIALS AND METHODS OF CONSTRUCTION.

The provisions of this Code are not intended to prevent the use of any material or method of construction not specifically prescribed by this Code, provided any such alternate has been approved.

The Director of Building Inspection may approve any such alternate, provided he finds that the material, method or work offered is for the purpose intended or at least the equivalent of that prescribed in this Code in

SEC. 93.0105 (Contd.)

quality, strength, effectiveness, durability and safety. Such determination shall be made in writing and a record kept which shall be open to the public.

The Building Official shall require that sufficient evidence or proof be submitted, that substantiates any claims that may be made regarding the use of such materials, methods or work.

SEC. 93.0106 APPEALS

When a question involving the interpretation of the intent and purposes of any provision of this Article, or the suitability of alternate materials and types of construction is presented to the Director of Building Inspection, he may request the Board of Appeals and Advisors to investigate such matters under the procedure established in Section 91.03 of this Code.

SEC. 93.0107 RESPONSIBILITY

This Code shall not be construed to relieve from, or lessen the responsibility of any party owning, operating, controlling, or installing any plumbing installation, fixtures, device, or materials, for damage to person or property caused by any defect therein; nor shall the City of San Diego or any officer or employee thereof enforcing this Code be held as assuming any such liability by reason of the inspections authorized herein, or certificate of inspection issued in accordance with the provisions of this Article.

SEC. 93.0108 PROHIBITIONS

It is unlawful for any person, either as owner, architect, contractor, artisan, or otherwise, to do or knowingly to cause to permit to be done any plumbing in such manner that the same shall not conform to all of the provisions of this Code.

SEC. 93.0109 DEPARTMENT OF PUBLIC HEALTH - JURISDICTION AND AUTHORITY

It shall be the duty of the Director of Public Health, and he is hereby directed, to enforce and administer the provisions of the following sections of the Plumbing Code:

Sections 93.0110 and 93.0111 regulating premises unfit for human occupancy.

Division 17, regulating Cesspools, Septic tanks and Subsurface Disposal Systems.

Before any permits for the construction of a septic tank or cesspool shall be issued under the provisions of Section 93.1701, fees in accordance with Section 93.0401 shall be collected therefor by the Department of Public Health.

SEC. 93.0110 DEPARTMENT OF BUILDING INSPECTION - AUTHORITY TO CONDEMN PROPERTY

When any building or premises has been inspected by the Department of Building Inspection and the plumbing is found to be defective or in violation of this division, notice to that effect shall be served upon the owner, or his agent.

SEC. 93.0110 (Cont'd.)

and the said notice shall specify the character of repairs and alterations or improvements to be made. If such repairs and alterations, as specified in said notice, are not commenced in good faith within five (5) days from the date of the service of such notice, and completed within the time specified therein, the Department of Building Inspection may condemn the said property as being unsanitary and unfit for human habitation, and its occupancy thereafter is prohibited.

SEC. 93.0111 DEPARTMENT OF BUILDING INSPECTION - CONDEMNATION NOTICE

When a building has been condemned by the Department of Building Inspection of said City, the occupant or lessee, if there be any, shall immediately vacate the premises until such time as all repairs and alterations required by the Department of Building Inspection have been made. When a building has been condemned for any cause by the Department of Building Inspection, there shall be placed thereon a placard, which shall read as follows:

"WARNING"  
"THIS BUILDING HAS BEEN CONDEMNED AS BEING UNSANITARY  
AND UNFIT FOR HUMAN HABITATION, AND IT IS UNLAWFUL  
FOR ANY PERSON TO RESIDE IN OR OCCUPY THE SAME.

(a) All certificates issued by the Board of Plumber Examiners shall expire on the last day of June of each year.

(b) Every plumber holding a Certificate of Competency may during the month of June of each year make application either by mail or in person at the office of the Building Inspection Department for a renewal of such certificate for an additional year. Every application for renewal shall be accompanied by the following renewal fee:

Journeyman Plumber . . . . . \$2.00

(c) If satisfied that the holder of such certificate is competent to do plumbing work, the Board of Plumber Examiners shall grant a renewal of such certificate

SEC. 93.0208 (Cont'd.)

for an additional year without an examination.

(d) It shall be unlawful for a plumber who has failed to make application for renewal of his certificate before July first of any year, to do any plumbing work without passing another examination, and paying the fee provided in Section 93.0207.

SEC. 93.0209 SUSPENSION OR REVOCATION OF CERTIFICATE

The Board of Plumber Examiners shall have the power and authority to suspend or revoke any Certificate of Competency for such period as the Board may deem advisable for any of the following causes:

1. If a certificate was obtained by fraud or misrepresentation.
2. If any reason exists which would have been cause for denial of such certificate.
3. For violation of any provision of the Municipal Code or any law of the State of California pertaining to plumbing construction.
4. For permitting any other person to use such certificate or perform any act or work of a kind authorized by such certificate for the purpose of avoiding compliance with any provision of this Article.

SEC. 93.0210 PUBLIC HEARING

Before any Certificate of Competency is suspended or revoked, the Board of Plumber Examiners shall hold a public hearing and give the holder of the certificate a fair and reasonable opportunity to show cause why his certificate should not be suspended or revoked. The certificate holder shall be notified at least five (5) days in advance of the place and date of the hearing. The decision of the Board shall be final and shall take effect immediately.

SEC. 93.0211 SPECIAL OWNER'S CERTIFICATE

An owner, or a member of his immediate family, may obtain a Special Owner's Certificate after a satisfactory examination by the Board of Plumber Examiners authorizing him to install plumbing work and fixtures as provided in Section 93.0303. The fee for such examination shall be two dollars (\$2.00).

SEC. 93.0212 APPRENTICE PLUMBER

An apprentice plumber is a person at least 16 years of age who has entered into a written apprentice agreement, which apprentice agreement provides for participation in an approved program of training as a plumber through employment

SEC. 93.0212 (cont'd.)

and education in related and supplementary subjects, and which conforms to the rules and regulations of the State Apprenticeship Council, and to the provisions of the Apprentice Standards Act of the State of California.

Any person desiring to work or labor as an apprentice plumber shall obtain a permit from the Board of Plumber Examiners, which will be issued for a fee of \$1.00. An apprentice shall only be allowed to do plumbing work under the direct supervision of and with a person holding a valid Certificate of Competency who shall be held responsible for the work of such apprentice."

Section 5. That Division 3 of Article 3 of Chapter IX of the San Diego Municipal Code be, and the same is hereby amended to read as follows:

"DIVISION 3

PERMITS

SEC. 93.0301 PERMITS REQUIRED

(a) No plumbing installations, fixtures, devices, appliances or equipment shall be installed within or on any building, structure or premises, nor shall any alteration or addition be made in any such existing installations, devices, appliances or equipment unless a permit therefor has first been issued by the Department of Inspection, except as stated in Section 93.0302.

(b) Permits shall be obtained before or at the time work is started, except in cases where emergency or urgent necessity can be shown to exist, provided a permit is obtained within twenty-four (24) hours, exclusive of Saturdays, Sundays, and holidays.

(c) A separate permit shall be required for each building or structure which stands alone.

(d) No privately owned lines or other facilities shall be installed over, under or across any public property without first complying with the requirements established in Section 62.0103 of this Code.

(e) Except as provided in Section 93.0303, permits shall be issued only to Contractors licensed by the State of California to engage in the business or act in the capacity of a contractor relating to plumbing installation.

SEC. 93.0302 WORK NOT REQUIRING PERMIT

No permit shall be required in the case of any repair work as follows:

The stopping of leaks in drains, soil, waste or vent pipe, provided however, that should any drainpipe, soil, waste or vent pipe be or be-

SEC. 93.0302 (Cont'd.)

come defective, and it becomes necessary to remove and replace the same with new material in any part or parts, the same shall be considered as such new work and a permit shall be procured and inspection made as hereinbefore provided. No permit shall be required for the clearing of stoppages, or the repairing of leaks in pipes, valves or fixtures, when such repairs do not involve or require the replacement or rearrangement of valves, pipes, or fixtures.

SEC. 93.0303 SPECIAL OWNER'S PERMIT

The Director of Building Inspection may issue to an individual holding a valid Special Owner's Certificate, a special owner's permit authorizing said individual to install, alter, change or repair plumbing equipment in, on or about his own home, but not elsewhere; provided, that no plumbing work authorized under any such special owner's permit shall be done, nor shall the owner holding any such permit allow any such work to be done, except personally by the owner to whom the permit is issued; and if this or any other provision hereof shall be violated by the holder of such special owner's permit, such permit shall be subject to immediate cancellation by the Director, and the holder thereof shall be liable for the penalties provided for violation of this Code.

SEC. 93.0304 TEMPORARY PERMITS

(a) If the Director of Building Inspection finds that the safety of life and property will not be jeopardized, he may issue permits for temporary plumbing installations for use during the construction of buildings or for other temporary uses. Permission to use such temporary installations shall not be granted for a greater length of time than thirty (30) days except that a permit for a temporary installation to be used for the construction of a building may be issued for the period of construction. Should such temporary plumbing be over the street area or other public property, the proper authority for such use of the street must first be obtained. All such temporary installations shall be made in a manner as nearly as practicable in conformance with the requirements of this Article for permanent work, provided that the Director of Building Inspection may permit deviations which will not cause hazard to life and property, and further provided that whenever such hazards are deemed by the Director to exist, he may at once revoke or cancel the permit covering such installation and disconnect or order the disconnection and removal of such plumbing installation.

Division 3 (Cont'd.)

SEC. 93.0305 EXPIRATION OF PERMIT

(a) If the work authorized by a permit is not commenced within a period of sixty (60) days after issuance, or if the work authorized by a permit is suspended or abandoned at any time after the work is commenced for a period of sixty (60) days, the permit shall become void.

(b) Permits shall expire one (1) year after the date of issuance unless the permit is issued for a longer period of time.

(c) Permits for a period longer than one (1) year must be requested at the time of application for the original permit. Said permits will be issued for the period of time determined by the Director of Building Inspection to be reasonably necessary to complete the work for which a permit is requested.

(d) An expired permit may be renewed upon payment of a fee to cover the unfinished work according to the fee schedule in Division 4 of this Article.

SEC. 93.0306 INCOMPLETED INSTALLATIONS

Should any person to whom a permit has been issued quit an installation, for any reason, he shall notify the Inspection Department within 48 hours and request an inspection of work installed. No person shall resume work on a incompleted installation until such installation shall have been approved by the Inspection Department and necessary permit obtained.

SEC. 93.0307 SCOPE OF PERMIT

The permit when issued shall be for such installation as is described in the application and no deviation shall be made from the installation so described without the written approval of the Director of Building Inspection.

SEC. 93.0308 APPLICATION FOR PERMIT

Application for a permit, describing the work to be done, shall be made in writing to the Director of Building Inspection. The application shall be accompanied by such plans, specifications and schedules as may be necessary to determine whether the installation as described will be in conformity with the requirements of this Article. If it shall be found that the installation as described will in general conform with the requirements of this Article, and if the applicant has complied with all provisions of this Article, a permit for such installation shall be issued upon payment of the required fee as hereinafter fixed; provided, however, that the issuance of the permit shall not be taken as permission to violate any of the requirements of this Article.

SEC. 93.0308 (Cont'd.)

Sec. 6. That Division 4 of Article 3 of Chapter IX of the San Diego Municipal Code be, and the same is hereby amended to read as follows:

"DIVISION 4"

FEEES FOR PERMITS AND INSPECTIONS

SEC. 93.0401 PERMIT FEES REQUIRED

Each application for a plumbing permit shall be submitted in writing, shall state the location of the work proposed to be installed and the amount and kind of plumbing in connection therewith. Each such application shall be signed by the person qualified to obtain such permit and shall be accompanied by a permit fee in accordance with the schedule of fees hereinafter established.

SCHEDULE OF FEES

For issuing each permit (not refundable) . . . . . ~~\$3.00~~ 2.00

In addition:

- For each plumbing fixture or trap and necessary drainage or vent piping connected thereto . . . . . 0.80
- For each house sewer . . . . . 0.80
- For each moved building plumbing system, including existing fixtures which are relocated and not replaced or altered. (Not including house sewer) . . . . . 3.00
- For each replacement, alteration or installation of drainage or vent piping not serving a fixture for which a permit has been issued . . . . . 0.80
- For each water heater and/or vent . . . . . 0.80
- For capping or disconnecting and removal of house sewer on the site from which a building has been relocated or removed . . . . . 0.80
- For each waste food grinder or disposal unit installed in a plumbing system . . . . . 0.80
- For each industrial waste interceptor or device . . . . . 3.00
- For each grease interceptor . . . . . 0.80

SEC. 93.0402 PENALTY FEE

Any person who shall commence any plumbing work for which a permit is required by this Code without first having obtained a permit therefor shall, if subsequently permitted to obtain a permit, pay double the permit fee fixed by this section for such work, provided however, that this provision shall not apply to emergency work when it shall be proved to the satisfaction of the Administrative Authority that such work was urgently necessary and that it was not practical to

SEC. 93.0402 (Cont'd.)

obtain a permit therefor before the commencement of the work. In all such cases a permit must be obtained as soon as it is practical to do so, and if there be an unreasonable delay in obtaining such permit, a double fee as herein provided shall be charged.

Section 7. That Division 5 of Article 3 of Chapter IX of the San Diego Municipal Code be, and the same is hereby amended to read as follows:

"DIVISION 5"

INSPECTION TESTING AND APPROVAL

SEC. 93.0501 INSPECTIONS

(a) Scope.- All new plumbing work, and such portions of existing systems as may be affected by new work or any changes, shall be inspected by the Director of Building Inspection to insure compliance with all the requirements of this Code and to assure that the installation and construction of the plumbing system is in accordance with approved plans.

(b) Advance Notice.- It shall be the duty of the person doing the work authorized by the permit to notify the Director of Building Inspection orally or in writing that said work is ready for inspection. Such notification shall be given not less than twenty-four (24) hours before the work is to be inspected.

(c) Responsibility.- It shall be the duty of the holder of a permit to make sure that the work will stand the test prescribed before giving the notification.

(d) Retesting.- If the Director of Building Inspection finds that the work will not pass the test, necessary corrections shall be made and the work shall then be resubmitted for test or inspection.

(e) Test.- Tests shall be conducted in the presence of the Administrative Authority or of his duly appointed representative.

(f) Corrections.- Notices of correction or violation shall be written by the Director of Building Inspection and may be posted at the site of the work or mailed or delivered to the permittee or his authorized representative. Refusal, failure or neglect to comply with any such notice or order shall be considered a violation of this Code, and shall be subject to the penalties set forth elsewhere in this Code for violations.

SEC. 93.0501 (Continued)

(g) Approval.- Upon the satisfactory completion and final test of the plumbing system a certificate of approval shall be issued by the Director of Building Inspection to the permittee on demand.

(h) Covering or Using.- No plumbing or drainage system, house sewer, private sewer disposal system or part thereof shall be covered, concealed, or used until it has been tested, inspected, and accepted as prescribed in this Code.

(i) Uncovering.- If any drainage or plumbing system, house sewer, or part thereof which is installed, altered, or repaired is covered or concealed before being inspected, tested, and approved, as prescribed in this code, it shall be uncovered for inspection after notice to uncover the work has been issued to the responsible person by the Director of Building Inspection.

SEC. 93.0502 TESTING

(a) Responsibility.- The equipment, material, and labor necessary for inspection or tests shall be furnished by the person to whom the permit is issued or by whom inspection is requested.

(b) Media.- The piping of the plumbing, drainage, and venting systems shall be tested with water or air. The Director of Building Inspection may require the removal of any cleanouts, etc., to ascertain if the pressure has reached all parts of the system. After the plumbing fixtures have been set and their traps filled with water, they shall be submitted to a running test or such other test as may be necessary to establish compliance.

(c) Water test.- The water test shall be applied to the drainage system either in its entirety or in sections. If applied to the entire system, all openings in the piping shall be tightly closed, except the highest opening, and the system filled with water to point of overflow. If the system is tested in sections, each opening shall be tightly plugged except the highest opening of the section under test, and each section shall be filled with water, but no section shall be tested with less than a 10-foot head of water. In testing successive sections at least the upper 10 feet of the next preceding section shall be tested, so that no joint or pipe in the building (except the uppermost 10 feet of the system) shall have been submitted to a test of less than a 10-foot head of water. The water shall be kept in the system, or in the portion under test, for at least 15 minutes before inspection starts; the system shall then be tight at all points.

SEC. 93.0502 (Continued)

(d) Air Test.- The air test shall be made by attaching an air compressor testing apparatus to any suitable opening, and, after closing all other inlets and outlets to the system, forcing air into the system until there is a uniform gage pressure of 5 pounds per square inch or sufficient to balance a column of mercury 10 inches in height. This pressure shall be held without introduction of additional air for a period of at least 15 minutes.

(e) House Sewer Test.- A "Y" shall be placed at the property line for the purpose of testing the house sewerline. Such test shall consist of filling the system with water to a point producing not less than a ten foot head on the house sewer.

(f) Moved Structures.- All plumbing, whether old or new installations, in all buildings or parts thereof that are moved from one foundation to another, regardless of their location on any property or properties, shall be tested to the water level of the highest fixture.

(g) Test plugs, rubber test plugs or other approved methods shall be used to seal openings of plumbing outlets for testing.

(h) Flooring Removable: Where there is less than 3 ft. clearance below the floor joists of a building, where plumbing is to be installed, no flooring shall be laid over the soil, waste or vent piping until after the plumbing has been installed, inspected and approved. Provided however flooring may be cut and loose laid, over such pipe, in a manner to permit easy removal for installation and inspection.

SEC. 93.0503 FINISH PLUMBING INSPECTION

Immediately upon the completion of all finished plumbing installed in any building, or in any premises, the permittee or his authorized agent shall notify the Plumbing Inspector that such work is ready for a final plumbing inspection. The Plumbing Inspector shall then cause an inspection to be made, and if any faulty or defective plumbing is found, the person installing the same shall be notified of the changes necessary to be made in order that such work shall conform to the requirements of this Code and the rules and regulations of the Department of Building Inspection. If such plumbing work is found to be ~~incorrectly~~ installed, the Plumbing Inspector shall endorse his approval on the Inspection record card or certificate issued when the rough plumbing work is approved.

SECTION 8. That Division 6 of Article 3 of Chapter IX of the San Diego Municipal Code be and the same is hereby amended to read as follows:

"DIVISION 6"

DEFINITIONS, GENERAL INSTRUCTIONS AND REQUIREMENTS

SEC. 93.0601 DEFINITION AND INTERPRETATION

The following words and phrases whenever used in this Article shall be construed as defined in the following sections, unless from this context a different meaning is intended, or unless a different meaning is specifically defined.

SEC. 93.0601.1 - ACCESSIBLE: Plumbing pipe, fixtures or equipment so installed that ready access may be obtained, with minimum effort.

SEC. 93.0601.2 - ADMINISTRATIVE AUTHORITY: Shall mean the Director of Building Inspection.

SEC. 93.0601.3 - AIR GAP: An air gap in a water-supply system is the unobstructed vertical distance through the free atmosphere between the lowest opening from any pipe or faucet supplying water to tank, plumbing fixture, or other device and the floodlevel rim of the receptacle.

SEC. 93.0601.4 - APPLIANCE: Any fixture or piece of equipment in connection with a plumbing system that is not otherwise defined.

SEC. 93.0601.5 - APPROVED: Accepted or acceptable under an applicable specification stated or cited in this Code, or accepted as suitable for the proposed use under procedures and powers of the Director of the Department of Building Inspection.

SEC. 93.0601.6 - AREA DRAIN: A receptacle designed to collect surface or rain water from a surface not covered by a roof or which receives surface runoff.

SEC. 93.0601.7 - BACKFLOW: Backflow is the flow of water or other liquids, mixtures or substances into the distributing pipes of a potable supply of water from any source or sources other than its intended source. (See Back-siphonage.)

SEC. 93.0601.8 BACKFLOW CONNECTION: Backflow connection or condition is any arrangement whereby backflow can occur.

SEC. 93.0601.9 BACKFLOW PREVENTER: A backflow preventer is a device or means to prevent backflow into the potable water system.

SEC. 93.0601.10 - BACK-SIPHONAGE: Back-siphonage is the flowing back of used, contaminated, or polluted water from a plumbing fixture or vessel into a water-supply pipe due to a negative pressure in such pipe. (See Backflow)

SEC. 93.0601.11 - BOILER BLOW-OFF: A boiler blow-off is an outlet on a boiler to permit emptying or discharge of sediment.

SEC. 93.0601 Definitions (Continued)

SEC. 93.0601.12 - BACK WATER VALVE: A device to prevent sewage, liquid, industrial or other wastes from backing into soil or waste lines, contrary to gravity flow.

SEC. 93.0601.13 - BRANCH: A branch is any part of the piping system other than a main, riser, or stack.

SEC. 93.0601.14 - BRANCH VENT: A branch vent is a vent connecting one or more individual vents with a vent stack or stack vent.

SEC. 93.0601.14 a.- BUILDING: A structure built for the shelter, support or enclosure of persons, animals, chattels or property of any kind.

SEC. 93.0601.15 - BUILDING DRAIN: The building (house) drain is that part of the lowest piping of a drainage system which receives the discharge from soil, waste and other drainage pipes inside the walls of the building and conveys it to the building (house) sewer beginning 3 feet outside the building wall.

SEC. 93.0601.16 - BUILDING SEWER: The building (house) sewer is that part of the horizontal piping of a drainage system which extends from the end of the building drain and which receives the discharge of the building drain and conveys it to a public sewer, private sewer, individual sewage-disposal system, or other point of disposal.

SEC. 93.0601.17 - BUILDING SUB-DRAIN: That part of a plumbing system which cannot drain by gravity to the public sewer.

SEC. 93.0601.18 - CIRCUIT VENT SYSTEM: An installation that serves water closets, arranged in one continuous line and includes the vent pipes at the beginning and near the end of the soil line. The two main four (4") inch stacks shall determine the beginning and the end of a circuit vent system.

SEC. 93.0601.19 - CLINIC SINK: A sink the primary purpose of which is to receive and discharge fecal matter.

SEC. 93.0601.20 - CODE: The word code when used alone shall mean these plumbing regulations subsequent amendments thereto, or any emergency rule or regulation of plumbing which the Director may lawfully adopt.

SEC. 93.0601.21 - COMBINATION FIXTURE: A fixture combining a sink and a tray or a two or three compartment sink or a two or three compartment tray as one fixture.

SEC. 93.0601.22 - COMBINATION WASTE AND VENT SYSTEM (DIRECT): A combination waste and vent system is a specially designed system of waste piping embodying the horizontal wet venting of one or more sinks or floor drains by means of a common

SEC. 93.0601 Definitions (Cont'd.)

waste and vent pipe adequately sized to provide free movement of air above the flow line of the drain.

SEC. 93.0601.23- COMBINATION WASTE AND VENT SYSTEM (INDIRECT): A common waste and vent system designed so that one pipe is used jointly for wasting and venting indirect fixtures, adequately sized to permit free flow of air above the flow in the drain.

SEC. 93.0601.24 - COMMON: Means that part of a plumbing system which is so designed and installed as to serve more than one appliance, fixture, building or system.

SEC. 93.0601.25- COMMON VENT: A vent connecting at the junction of two fixture drains and serving as a vent for both.

SEC. 93.0601.26 - CONDUCTORS: Pipe which conveys rain water from roofs of building or other locations such as downspouts or leaders.

SEC. 93.0601.27 - CONTINUOUS VENT: A continuous vent is a vertical vent that is a continuation of the drain to which it connects.

SEC. 93.0601.28 - CONTINUOUS WASTE: A continuous waste is a drain connecting the compartments of a combination fixture to its trap or connecting other permitted fixtures to a common trap.

SEC. 93.0601.29 - CORNER LOT: Is a lot or parcel of land at the intersection of two streets.

SEC. 93.0601.30 - COUNTY: The County of San Diego, State of California.

SEC. 93.0601.31 - CROSS CONNECTION: A cross connection is any connection or arrangement, physical or otherwise, between a potable water supply system and any plumbing fixture, or any tank, receptacle, equipment or device, through which it may be possible for non-potable, used, unclean, polluted or contaminated water or other substances to enter any part of such potable water system under any condition.

SEC. 93.0601.32 - DEAD END: Dead ends of a plumbing system shall mean all horizontal vent lines into which the sewage will float or wash and obstruct the vent line.

SEC. 93.0601.33 - DEPARTMENT: Department of Building Inspection.

SEC. 93.0601.34 - DEVELOPED LENGTH: The developed length of a pipe is its length along the center line of the pipe and fittings.

SEC. 93.0601.35 - DEPARTMENT HAVING JURISDICTION: The administrative authority having jurisdiction is the Department of Building Inspection.

SEC. 93.0601.36 - DEVICE: Any part of a plumbing or drainage system which is not a plumbing fixture or piece of equipment not specifically mentioned in this Code.

SEC. 93.0601.37 - DIAMETER: Unless specifically stated, the term "diameter" is the nominal diameter as designated commercially.

SEC. 93.0601.38 - DIRECT CONNECTION: A connection for plumbing fixtures made directly with the waste or soil line (other than Indirect Connection).

SEC. 93.0601.39 - DIRECTOR: The Director of Building Inspection.

SEC. 93.0601.40 - DOMESTIC SEWAGE: Means the water borne wastes derived from the ordinary living processes and of such character as to permit satisfactory disposal, without special treatment, into the public sewer or by means of a private sewage disposal system.

SEC. 93.0601.41 - DOWNSPOUT: See "Conductor."

SEC. 93.0601.42 - DRAIN: A drain is any pipe which carries waste or water-borne wastes in a building drainage system.

SEC. 93.0601.43 - DRAINAGE FITTING: A fitting designed so as to provide sanitary curves and other features, that permit the free, unobstructed passage of air and liquids through waste and soil lines.

SEC. 93.0601.44 - DRAINAGE SYSTEM: A drainage system (drainage piping) includes all the piping within public or private premises, which conveys sewage, or other liquid wastes to a legal point of disposal, but does not include the mains of a public sewer system or a public sewage-treatment or disposal plant.

SEC. 93.0601.45 - DRUM TRAP: A trap which is so constructed as to lessen the possibility of siphonage and to retain certain solids which may interfere with free flow of waste matter in the waste line.

SEC. 93.0601.46 - DURHAM SYSTEM: Durham system is a term used to describe soil or waste systems where all piping is of threaded pipe, tubing, or other such rigid construction, using recessed drainage fittings to correspond to the types of piping.

SEC. 93.0601.47 - EJECTOR: An electrically operated pump designated to raise sewage or wastes to a higher level, for proper disposal by gravity flow.

SEC. 93.0601.48 - EXISTING BUILDING: A building which was erected and completed for occupancy before the adoption of this Code and which was a legal structure prior

SEC. 93.0601 Definitions (Cont'd.)

to said passage.

SEC. 93.0601.42 - EXISTING WORK: Existing work is a plumbing system or any part thereof which has been installed legally prior to the effective date of this Code.

SEC. 93.0601.50- FIXTURE: See "Plumbing Fixtures." (A trap is a fixture.)

SEC. 93.0601.51 - FINISH PLUMBING: The setting and connecting of fixture, to openings left in the rough plumbing.

SEC. 93.0601.52 - FIXTURE BRANCH: A fixture branch is a pipe connecting several fixtures.

SEC. 93.0601.53 - FIXTURE DRAIN: A fixture drain is the drain from the trap of a fixture to the junction of that drain with any other drain pipe.

SEC. 93.0601.54 - FIXTURE UNIT: A fixture unit is a quantity in terms of which the load-producing effects on the plumbing system of different kinds of plumbing fixtures are expressed on some arbitrarily chosen scale.

SEC. 93.0601.55 - FIXTURE - UNIT FLOW RATE: Fixture-unit flow rate is the total discharge flow in g.p.m. of a single fixture divided by 7.5 which provides the flow rate of that particular plumbing fixture as a unit of flow. Fixtures are rated as multiples of this unit of flow.

SEC. 93.0601.56 - FLAG POLE: A vent pipe extended above the roof in a conspicuous manner, higher than is required by this Code.

SEC. 93.0601.57 - FLOOD LEVEL: See "Flooded."

SEC. 93.0601.58 - FLOOD-LEVEL RIM: The flood-level rim is the top edge of the receptacle from which water overflows.

SEC. 93.0601.59 - FLOODED: A fixture is flooded when the liquid therein rises to the flood-level rim.

SEC. 93.0601.60 - FLOOR SINK: A sink or receptacle placed in or slightly above the floor to receive the discharge from indirect fixtures and appliances.

SEC. 93.0601.61 - FLUSH TANK: A tank, placed above one or more plumbing fixtures, supplied with water so as to properly flush said fixtures either manually or automatically.

SEC. 93.0601.62 - FLUSH VALVE: A flush valve is a device located at the bottom of the tank for the purpose of flushing water closets and similar fixtures.

SEC. 93.0601.63 - FLUSHOMETER VALVE: A flushometer valve is a device which discharges a predetermined quantity of water to fixtures for flushing purposes and is actuated by direct water pressure.

SEC. 93.0601 Definitions (Cont'd.)

SEC. 93.0601.64 - FOOT VENT: Applies to a vent and waste arrangement to prevent trap siphonage on fixtures where no other type of vent can be installed and consisting of a system of piping wherein waste pipe sizes are increased one pipe size, waste fittings are placed in end risers to avoid dead ends and vents rise to a point four (4") inches above the rim of the fixture served before returning to the oversized waste lines.

SEC. 93.0601.65 - GATE VALVE: A valve to control or shut off the flow of waste or sewage and so constructed as to permit a full size opening with no obstructions.

SEC. 93.0601.66 - GRADE: Grade is the slope or fall of a line of pipe in reference to a horizontal plane. In drainage it is usually expressed as the fall in a fraction of an inch per foot of pipe.

SEC. 93.0601.67 - GREASE INTERCEPTOR: See "Interceptor."

SEC. 93.0601.68 - GREASE TRAP: See "Interceptor."

SEC. 93.0601.69 - GROUND LEVEL: Means the surrounding ground level within a reasonable distance in all directions from a given point.

SEC. 93.0601.70 - HANGERS: See "Supports": Supports, hangers and anchors are devices for supporting and securing pipe and fixtures to walls, ceilings, floor or structural members.

SEC. 93.0601.71 - HOME OWNER: The word "Home Owner" as applied herein designates the person who has the legal title or estate to or in the home and land, and not one who has a lesser estate, as a lessee, or mere possession thereof, and who is constructing or repairing a single family residence which he is to occupy.

SEC. 93.0601.72 - HORIZONTAL BRANCH: A horizontal branch is a drain pipe extending laterally from a soil or waste stack or building drain, with or without vertical sections or branches, which receives the discharge from one or more fixture drains and conducts it to the soil or waste stack or to the building (house) drain.

SEC. 93.0601.73 - HORIZONTAL PIPE: Any line rising from the true horizontal to a pitch less than one-sixth bend shall be considered a "Horizontal Pipe."

SEC. 93.0601.74 - HOUSE DRAIN: See "Building Drain."

SEC. 93.0601.75 - HOUSE SOIL LINE: See "Building Soil Line."

SEC. 93.0601.76 - INDIRECT WASTE PIPE: An indirect waste pipe is a pipe that does not connect directly with the drainage system but conveys liquid wastes by discharging into a plumbing fixture, interceptor or receptacle which is directly connected to the drainage system.

SEC. 93.0601 Definitions (Cont'd.)

SEC. 93.0601.77 - INDIVIDUAL VENT: An individual vent is a pipe installed to vent a fixture trap and which connects with the vent system above the fixture served or terminates in the open air.

SEC. 93.0601.78 - INDUSTRIAL WASTE: Industrial Waste means any and all liquid or water borne waste from industrial or commercial processes except domestic sewage.

SEC. 93.0601.79 - INSANITARY: Contrary to sanitary principles -- injurious to health. Conditions to which the word "Insanitary" shall apply, include the following:

- (a) Any trap which does not maintain a proper trap seal.
- (b) Any opening in a Drainage System, except where lawful, which is not provided with an approved water-sealed trap.
- (c) Any plumbing fixture, or other waste discharging receptacle or device, which is not supplied with water sufficient to flush it and maintains it in a clean condition.
- (d) Any defective fixture, trap or pipe.
- (e) Any trap, except where in this Code exempted, directly connected to a Drainage System the seal of which is not protected against siphonage and back pressure by a vent pipe.
- (e) Any trap, except where in this Code exempted, directly connected to a Drainage System the seal of which is not protected against siphonage and back pressure by a vent pipe.
- (f) Any connection, cross-connection, construction or condition, temporary or permanent, which would permit or make possible, by any means whatsoever for any unapproved foreign matter to enter a water distribution system used for domestic purposes.
- (g) The foregoing enumeration of conditions to which the term "insanitary" shall apply, shall not preclude the application of that term to conditions that are in fact insanitary.

SEC. 93.0601.80 - INTERCEPTOR: An interceptor is a device designed and installed so as to separate and retain deleterious, hazardous, or undesirable matter from normal wastes and permit normal sewage or liquid wastes to discharge into the disposal terminal by gravity.

SEC. 93.0601.81 - INSIDE LOT: Any lot which is not a corner lot. See corner lot.

SEC. 93.0601.82 - INSPECTION: That which the inspector performs in line of duty as an inspector of plumbing as described in this Code.

SEC. 93.0601 Definitions (Cont'd.)

SEC. 93.0601.83 - LIQUID WASTE: Liquid waste is the discharge from any fixture, appliance, or appurtenance, in connection with a plumbing system which does not receive fecal matter.

SEC. 93.0601.84 - LOCAL VENTILATING PIPE: A local ventilating pipe is a pipe on the fixture side of the trap through which vapor or foul air is removed from a room or fixture.

SEC. 93.0601.85 - LOT: Lot means a single or individual parcel or area of land legally recorded or validated by other means-acceptable to the Director of Building Inspection, on which is situated a building or which is the site of any work regulated by this Code, together with the yards, courts, and unoccupied spaces legally required for the building or works, and which is owned by or is in the lawful possession of the owner of the building or works. Lot or premises shall be considered to include all portions of the lot whereon a building is erected, together with all excavated or occupied areas such as cellars, basements or pipe channels that extend beyond the lot line limits and under any sidewalk, street, alley, public or private thoroughfare. All plumbing installed therein shall conform to this Code.

SEC. 93.0601.86 - LOOP VENT: A loop vent is the same as a circuit vent except that it loops back and connects with a vent stack.

SEC. 93.0601.87 - MAIN: The main of any system of continuous piping is the principal artery of the system, to which branches may be connected.

SEC. 93.0601.88 - MAIN SEWER: See "Public Sewer."

SEC. 93.0601.89 - MAIN VENT: The main vent is the principal artery of the venting system, to which vent branches may be connected.

SEC. 93.0601.90 - MECHANICAL VENTILATION: A means of moving fresh air into a room and removing the existing air by use of a duct or ducts connected with an electrically driven supply or exhaust fan.

SEC. 93.0601.91 - MULTIPLE CIRCUIT VENT SYSTEM: A series of circuit vent systems immediately one above the other on separate floors.

SEC. 93.0601.92 - NUISANCE: The word "nuisance" embraces public nuisance; and whatever is dangerous to human life or detrimental to health, whatever building, structure or premises is not sufficiently ventilated, sewered, drained, cleaned or lighted, in reference to its intended or actual use; and whatever renders the air or human food or drink or water supply unwholesome, are also severally, in contemplation of this Code nuisances.

SEC. 93.0601 Definitions (Cont'd.)

SEC. 93.0601.93 - OFFSET: An offset in a line of piping is a combination of elbows or bends which brings one section of the pipe out of line but into a line parallel with the other section.

SEC. 93.0601.94 - PLUMBING: Plumbing means the business, trade and/or work having to do with the installation, removal, alteration and/or repair of Plumbing and Drainage Systems or parts thereof.

SEC. 93.0601.95 - PLUMBING FIXTURES: Plumbing fixtures are approved type installed receptacles, devices, or appliances which are supplied with water or which receive liquid or liquid borne wastes and discharge such wastes into the drainage system to which they may be directly or indirectly connected. Industrial or commercial tanks, vats and similar processing equipment are not plumbing fixtures but may be connected to or discharged into approved traps or plumbing fixtures when and as otherwise provided for elsewhere in this Code.

SEC. 93.0601.96 - PLUMBING SYSTEM: The plumbing system means and includes all potable water supply and distribution pipes, all plumbing fixtures and traps, all drainage and vent pipes, and all house drains, including their respective joints and connections, devices receptacles, and appurtenances within the property lines of the premises, and shall include water treating or using equipment, water heaters and vents for same.

SEC. 93.0601.97 - POT TRAP: See "Drum Trap."

SEC. 93.0601.98 - POTABLE WATER: Potable water is water which is satisfactory for drinking, culinary, and domestic purposes, and meets the requirements of the Department of Public Health.

SEC. 93.0601.99 - PRIVATE OR PRIVATE USE: In the classification of plumbing fixtures, private applies to fixtures in residences and apartments and to fixtures in private bathrooms of hotels and similar installations where the fixtures are intended for the use of a family or an individual.

SEC. 93.0601.100 - PRIVATE SUBSURFACE SEWAGE DISPOSAL SYSTEM: Is a septic tank with the effluent discharging into a subsurface disposal field, into one or more seepage pits or into a combination of subsurface disposal field and seepage pit; or of such other facilities as may be permitted under the procedures set forth by the Department of Public Health.

SEC. 93.0601.101 - PRIVATE SEWER: A private sewer is a sewer privately owned and not directly controlled by public authority.

SEC. 93.0601 Definitions (Continued)

SEC. 93.0601.102 - PUBLIC OR PUBLIC USE: In the classification of plumbing fixtures, "public" applies to fixtures in commercial and industrial establishments, in restaurants, bars, public buildings, comfort stations, schools, gymnasiums, railroad stations, or places to which the public is invited or which are frequented by the public without special permission or special invitation, and other installations (whether pay or free) where a number of fixtures are installed so that their use is similarly unrestricted.

SEC. 93.0601.103 - PUBLIC SEWER: A public sewer is a common sewer directly controlled by public authority.

SEC. 93.0601.104 - RECEPTOR: An approved plumbing fixture or device of such material, shape and capacity as to adequately receive the discharge from indirect waste pipes; so constructed and located as to be readily cleaned.

SEC. 93.0601.105 - RE-INSPECTION: An inspection, by the inspector, subsequent to a previous inspection, necessitated by conditions of the plumbing installation, which could not be approved by the inspector.

SEC. 93.0601.106 - RELIEF VENT: A relief vent is a vent the primary function of which is to provide circulation of air between drainage and vent systems.

SEC. 93.0601.107 - RETURN OFFSET: A return offset is a double offset installed so as to return the pipe to its original alignment.

SEC. 93.0601.108 - REVENT PIPE: A revent pipe (sometimes called an individual vent) is that part of a vent pipe line which connects directly with an individual waste or group of wastes, underneath or back of the fixture, and extends either to the main or branch vent pipe.

SEC. 93.0601.109 - ROUGHING-IN Roughing-in is the installation of all parts of the plumbing system which can be completed prior to the installation of fixtures. This includes drainage, water-supply, and vent piping, and the necessary concealed portions of fixture supports and backing.

SEC. 93.0601.110 - SANITARY SEWER: A sanitary sewer is a pipe which carries sewage and excludes storm, surface and ground water, except area drains where permitted.

SEC. 93.0601.111 - SECOND HAND! Second hand as applied to material or plumbing equipment is that which has been installed, and has been used, removed, and passed to another ownership or possession.

SEC. 93.0601.112- SEWAGE: Sewage is any liquid waste containing animal or vegetable matter in suspension or solution, and may include liquids containing chemicals in solution.

SEC. 93.0601 Definitions (Continued)

SEC. 93.0601.113 -SEWAGE EJECTOR: An electrically driven pump designed to raise sewage, from all types of plumbing fixtures, to a higher level, for proper disposal.

SEC. 93.0601.114 - SHOWER RECEPTOR: A pan shaped receptacle of a shower for the purpose of receiving shower water and to protect the structure from water and dampness.

SEC. 93.0601.115 - SOIL PIPE: A soil pipe is any pipe which conveys the discharge of water closets, urinals, or fixtures having similar functions, with or without the discharge from other fixtures, to the building drain or building sewer.

SEC. 93.0601.116 - SPECIAL WASTES: Special wastes are wastes which require some special method of handling such as the use of indirect waste piping and receptors, corrosion resistant piping, sand, oil or grease interceptors, condensers or other pre-treatment facilities. See Division 10.

SEC. 93.0601.117 - STACK: A stack is the vertical main of a system of soil, waste, or vent piping extending through one or more stories.

SEC. 93.0601.118 - STORM DRAIN: A pipe or a series of pipes installed to carry off rain water.

SEC. 93.0601.119 - STRUCTURE: See "Building."

SEC. 93.0601.120 - SUMP: A sump is an approved airtight tank or pit which receives sewage or liquid waste, and which is located below the normal grade of the gravity system and which must be emptied by mechanical means.

SEC. 93.0601.121 - SUPPORTS: Supports, hangers, and anchors are devices for properly supporting and securing pipe, fixtures and equipment.

SEC. 93.0601.122 - TRAP: A trap is a fitting or device so designed and constructed as to provide, when properly vented, a liquid seal which will prevent the back passage of air without materially affecting the flow of sewage or waste water through it.

SEC. 93.0601.123- TRAP SEAL: The trap seal is the maximum vertical depth of liquid that a trap will retain, measured between the crown weir and the top of the dip of the trap.

SEC. 93.0601.124 - TRIBUTARY FLOOR DRAIN: A floor drain so installed as to convey water to a main floor drain in an indirect manner.

SEC. 93.0601.125 - VACUUM BREAKER: See "Backflow preventer."

SEC. 93.0601.126 - VENT PIPE: See "Vent System."

SEC. 93.0601.127 - VENT STACK: A vent stack is a vertical vent pipe installed primarily for the purpose of providing circulation of air to and from any part of the drainage system.

SEC. 93.0601 Definitions (Continued)

SEC. 93.0601.128 - VENT SYSTEM: A vent system is a pipe or pipes installed to provide a flow of air to or from a drainage system or to provide a circulation of air within such system to protect trap seals from siphonage and back pressure.

SEC. 93.0601.129 - VERTICAL PIPE: Any line leaving a true vertical at an angle of sixty (60°) degrees or less shall be considered vertical.

SEC. 93.0601.130 - WASTE: See "Liquid Waste" and "Industrial Wastes."

SEC. 93.0601.131 - WASTE FOOD DISPOSER: An electrically driven device, constructed so as to reduce waste food to a pulp or consistency which permits the forcing of the pulp into the plumbing system, for disposal.

SEC. 93.0601.132 - WASTE PIPE: A waste pipe is a pipe which conveys only liquid waste, free of fecal matter.

SEC. 93.0601.133 - WATER-DISTRIBUTING PIPE: A water-distributing pipe in a building or premises is a pipe which conveys potable water from the water-service pipe to the plumbing fixtures and other water outlets.

SEC. 93.0601.134 - WATER MAIN: The water (street) main is a water-supply pipe for public or community use.

SEC. 93.0601.135 - WATER SERVICE PIPE: The water service pipe is the pipe carrying potable water from the water main, meter or other source of water supply to the building served.

SEC. 93.0601.136 - WET VENT: A wet vent is a vent which also serves as a drain.

SEC. 93.0601.137 - YOKE VENT: A yoke vent is a pipe connecting upward from a soil or waste stack to a vent stack for the purpose of preventing pressure changes in the stacks.

Sec. 93.0602 - Disposal of Liquid Waste

It shall be unlawful for any person to cause, suffer or permit the disposal of sewage, human excrement or other liquid wastes, in any place or manner except through and by means of an approved plumbing and drainage system, installed and maintained in accordance with the provisions of the Municipal Code.

Sec. 93.0603 - Connections to Plumbing Systems Required

All plumbing fixtures, drains, appurtenances, and appliances used to receive or discharge liquid wastes or sewage shall be connected properly to the drainage system of the building or premises, in accordance with the requirements of this Code.

SEC. 93.0604 - Industrial Wastes

(a) Wastes detrimental to the public sewer systems or detrimental to the functioning of the sewage-treatment plant shall be treated and disposed of as required by the provisions of the Municipal Code.

(b) Sewage or other waste, from a plumbing system which may be deleterious to surface or subsurface waters shall not be discharged into the ground or into any waterway unless it has first been rendered innocuous through subjection to some form of treatment acceptable to the Department of Public Health.

SEC. 93.0605 - Plans Required

The Director of Building Inspection may require the submission of plans, specifications, drawings, and such other information as he may deem necessary, prior to the commencement of, and at any time during the progress of, any work regulated by this Code.

The issuance of a permit upon plans and specifications shall not prevent the Director of Building Inspection from thereafter requiring the correction of errors in said plans and specifications or from preventing construction operations being carried on thereunder when in violation of this code or of any other applicable law or from revoking any certificate of approval when issued in error.

SEC. 93.0606 - Location

Except where specifically required by the Administrative Authority, and where legal easement has been obtained, and plans are approved by the Administrative Authority, no plumbing system, drainage system, house sewer, private sewage disposal system or portion thereof shall be located in or upon any lot or parcel of ground other than the site of the building, structure, or premises served by such facilities.

Sec. 93.0607 - Improper Location

Piping, fixtures, or equipment shall not be located in such a manner as to interfere with the normal operation of windows, doors or other required means of access, egress or ventilation.

Sec. 93.0608 - Workmanship

(a) All plumbing design, construction, installation and workmanship shall conform to the requirements of this Code.

(b) It is unlawful to conceal cracks, holes or imperfections by welding, brazing

SEC. 93.0608 Workmanship (Continued)

or soldering or by using thereon any paint, wax, tar, cement, or other repair agent.

Sec. 93.0609 - Prohibited Fittings and Practices

(a) No double hub fitting, single or double tee branch, single or double tapped tee branch, side inlet quarter bend, running thread, band or saddle, shall be used as a drainage fitting, except that a double hub sanitary tapped tee may be used on a vertical line as a fixture connection.

(b) No drainage or vent piping shall be drilled and tapped for the purpose of making connections thereto, and no cast iron soil pipe shall be threaded.

(c) No waste connection shall be made to a closet bend or stub of a water closet or similar fixture.

(d) Except as hereinafter provided, no vent pipe shall be used as a soil or waste pipe.

(e) No fitting, connection, device, or method of installation which obstructs or retards the flow of water, wastes, sewage, or air in the drainage or venting systems in an amount greater than the normal frictional resistance to flow, shall be used unless it is indicated as acceptable in this code or is approved by the Administrative Authority as having a desirable and acceptable function and as of ultimate benefit to the proper and continuing functioning of the plumbing system. The enlargement of a 3-inch closet bend or stub to 4 inches shall not be considered an obstruction.

(f) Four by three reducing closet rings are prohibited.

(g) All valves, pipes and fittings shall be installed in correct relationship to the direction of flow.

SEC. 93.0610 - Dead Ends

Dead ends are prohibited.

SEC. 93.0611 - Protection from Freezing

No water, soil, or waste pipe shall be installed or permitted outside of a building or in an exterior wall unless adequate provision is made to protect such pipe from freezing where necessary.

SEC. 93.0612 - Independent Systems

(a) The drainage system of each new building and of new work installed in any existing building shall be separate and independent of that of any other building.

(b) Buildings on an inside lot, having the same frontage, under the same ownership and constructed so that each building overlaps the prolongation of another

Sec. 93.0612 - Independent Systems (Continued)

building, may be connected to one and the same building sewer.

(c) Public school districts and other governmental agencies may be granted deviations from the provisions of this section after plans have been submitted to the Department of Building Inspection and have been approved by the Director.

(d) Where more than one building or structure is constructed on a parcel or combination of parcels of ground, held under one ownership and designed or used as an occupancy under one management, and a public sewer abuts such property, the Administrative Authority shall approve connection of the building drains of each building or structure to a common building sewer when the owner or authorized agent of the owner of such premises and the improvements thereon, shall provide an agreement in writing wherein it is agreed that said owner or agent will provide a separate building sewer for any building or structure located on such premises in the event of any subsequent division of the ownership of such parcel of land or the buildings located thereon.

Sec. 93.0613 - Repairs and Alterations

(a) In existing buildings or premises in which plumbing installations are to be altered, repaired, or renovated, deviations from the provisions of this Code are permitted, provided such deviations are found to conform to the intent of this division and are first approved in writing by the Director of Building Inspection.

(b) Existing house sewers and house drains may be used in connection with new buildings or new plumbing and drainage work only when they are found on examination and test to conform in all respects to the requirements governing new work and the proper Administrative Authority shall notify the owner to make any changes necessary to conform to this Code. No building or part thereof shall be erected or placed over any part of a drainage system which is constructed of materials other than those approved elsewhere in this Code for use inside of a building. No new building or addition to an existing building shall be erected over an existing clay sewer or drain unless such existing piping is replaced with materials approved for use within a building.

Sec. 93.0613 - Repairs and Alterations (Continued)

(c) All openings into a drainage or vent system, excepting those openings to which plumbing fixtures are properly connected or which constitute vent terminals, shall be permanently plugged or capped in an approved manner, using the appropriate materials required by this Code.

Sec. 93.0614 - Protection of Materials and Structures

(a) All pipes passing under or through walls shall be protected from breakage.

(b) All piping in connection with a plumbing system shall be installed without undue strains or stresses, and provisions shall be made for expansion, contraction, and structural settlement. No horizontal piping, fittings or equipment shall be built into or embedded in concrete footings or foundations.

(c) No structural member shall be seriously weakened or impaired by cutting or notching. All trenches deeper than the footing of any building or structure and paralleling the same must be at least forty-five (45°) degrees therefrom, unless permission be otherwise granted by the Director of Building Inspection.

(d) No house sewer or other drainage piping or part thereof constructed of materials other than those approved for use under or within a building shall be installed under or within three (3') feet of any building or structure or less than one (1') foot below the surface of the ground.

Sec. 93.0615 - Maintenance

The plumbing and drainage system of any premises under the jurisdiction of the Director of Building Inspection shall be maintained in a sanitary and safe operating condition by the owner or his agent.

Sec. 93.0616 - Existing Construction

Nothing contained in this code shall be deemed to require any plumbing or drainage system or part thereof, or any other work regulated by this code and existing prior to the effective date of this code, to be altered, changed, reconstructed, removed or demolished if such work was installed in accordance with any applicable law in effect prior to the

Sec. 93.0616 - Existing Construction (Continued)

date this code became effective, except when any such plumbing or drainage system or other work regulated by this code is dangerous, unsafe, insanitary or a menace to life, health or property, in the judgment of the Director of Building Inspection. For requirements for existing house sewers or house drains, see Section 93.0612.

Sec. 93.0617 - Health and Safety

Whenever compliance with all the provisions of this code fails to eliminate or alleviate a nuisance, or any other dangerous or insanitary condition which may involve health or safety hazards, the owner or his agent shall install such additional plumbing and drainage facilities or shall make such repairs or alterations as may be ordered by the Director of Building Inspection.

SECTION 9. That Division 7 of Article 3 of Chapter IX of the San Diego Municipal Code be, and the same is hereby amended to read as follows:

"DIVISION 7"

Quality and Weights of Materials and Methods of Construction

Sec. 93.0701 - Minimum Standards

(a) Unless otherwise provided in this Code all materials, fixtures or devices used or entering into the construction of plumbing and drainage systems or parts thereof, shall conform, each to the minimum applicable standard therefor, as set forth in Table A of this Division, or to other recognized and accepted standards and shall be free from defects.

(b) The provisions of this code are not intended to prevent the use of any alternate material or method of construction provided any such alternate has been first approved and its use authorized by the Director of Building Inspection as provided in Sec. 93.0105.

(c) In existing buildings or premises in which plumbing installations are to be altered, repaired, or renovated, the Director has discretionary powers to permit deviation from the provisions of this code, provided that such a proposal to deviate is first submitted for proper determination in order that health and safety requirements, as they pertain to plumbing, shall be observed.

Sec. 93.0701 - Minimum Standards (Continued)

(d) Standards listed in this chapter cover materials which will conform to the requirements of this Code, when used in accordance with the limitations imposed in other chapters thereof. Design and materials for special conditions or materials not provided for herein may be used only by special permission of the Administrative Authority after he has satisfied himself as to their adequacy.

(e) Standard specifications for materials for plumbing installations are listed in Table A. Products conforming to any of the specifications listed for a given material shall be considered acceptable.

Note: - Abbreviations used in this chapter or elsewhere in this Code refer to standards or specifications issued by the organizations identified below:

- ASA American Standards approved by the American Standard Association, 70 East Forty-fifth Street, New York 17, New York.
- ASTM Standards and Tentative Standards published by the American Society for Testing Materials, 1916 Race Street, Philadelphia 3, Pa.
- FS Federal Specifications published by the Federal Specifications Board and obtainable from the Superintendent of Documents, United States Government Printing Office, Washington 25, D.C.
- AWWA Standards and Tentative Standards published by the American Water Works Association, 500 Fifth Avenue, New York 18, N. Y.
- CS Commercial Standards representing voluntary standards of trade, prepared under the procedure of the National Bureau of Standards and published by the United States Department of Commerce. Obtainable from the Superintendent of Documents, United States Government Printing Office, Washington 25, D. C.
- MSS Standards published by the Manufacturers Standardization Society of the Valve and Fittings Industry, 420 Lexington Avenue, New York 17, N. Y.
- SPR Simplified Practice Recommendations prepared under the procedure of the National Bureau of Standards and issued by the United States Department of Commerce, Washington 25, D. C.

Sec. 93.0701 - Minimum Standards (Continued)

WPOA Standards and tentative standards sponsored by Western Plumbing Officials Association, P.O. Box 11, Los Angeles 53, California.

Note: - ASTM standards are issued under fixed designations; the final number indicates the year of original adoption or, in the case of revision, the year of the last revision; also, the final number indicates the years of issue. For Federal Specifications, the year indicates the year of issue or of the last revision or amendment.

All standards and specifications for materials are subject to change. Designations carrying indication of the year of issue may thus become obsolete. Table A gives the designations of standards current at the time this Code was printed.

(f) Each length of pipe, and each pipe fitting, trap, fixture, material and device used in a plumbing system shall have cast, stamped, or indelibly marked on it the maker's mark or name, the weight and the quality of the product, when such marking is required by the approved standard that applies. All materials and devices used or entering into the construction of plumbing and drainage systems or parts thereof shall be marked and identified in a manner satisfactory to the Director of Building Inspection.

Sec. 93.0702 - Cast Iron Pipe and Fittings

All cast iron pipe and fittings used in plumbing installations, additions, alterations, or repairs shall be of not less than the grade known as service weight. Each length of pipe and each fitting shall be indelibly stamped, by the manufacturer, at the foundry, with the maker's name or trade mark and the weight of the material.

All cast iron pipe and fittings shall be of lead keyed type.

Sec. 93.0703 - Use of Copper Tubing

(a) No copper tubing of a weight less than type K shall be used for underground drainage or vent piping.

(b) No copper tubing of a weight less than type M shall be used in any part of the soil, waste or vent piping of any plumbing system above ground.

Sec. 93.0703 - Use of Copper Tubing (Continued)

(c) All copper tubing drainage and vent piping shall be installed in conformance with plans approved by the administrative authority. Fittings shall be of an approved type manufactured for the purpose for which they are used. Fitting patterns shall be comparable to similar fittings of cast iron or brass as regulated by this Code. Design of copper tubing drainage and venting shall provide for the effects of expansion in long lines or stacks. Changes in direction shall be made with approved drainage fittings of copper, bronze or brass. Bending of tubing and made-up fittings are prohibited. Hard temper copper tubing shall be used unless structural conditions warrant the use of soft temper tubing and such use is approved by the Administrative Authority. Drainage and vent fittings for copper tubing shall be cast brass or wrought copper solder joint drainage fittings. Size of copper tubing drainage and vent piping shall be determined in the same manner as required for cast iron and steel and using the same nominal dimensions.

Sec. 93.0704 - Lead

See Table A. Sheet lead shall be not less than the following:  
For safe pans - not less than 4 pounds per square foot.

Lead bends and lead traps shall be not less than one-eighth inch wall thickness.

Sec. 93.0705 - Ferrules and Bushings

(a) Calking ferrules shall be manufactured from red brass and shall be in accordance with the following:

Calking Ferrules:

Pipe sizes (inches)	Inside diameter (inches)	Length (inches)	Minimum weight each	
			Lb.	Oz.
2- - - - -	2 1/4	4 1/2	1	0
3- - - - -	3 1/4	4 1/2	1	12
4- - - - -	4 1/4	4 1/2	2	8

Sec. 93.0705 - Ferrules and Bushings (Continued)

(b) Soldering bushings shall be of red brass in accordance with the following:

Pipe sizes (inches)	Minimum weight each Lb. Oz.	Pipe sizes (inches)	Minimum weight each Lb. Oz.
1 1/4 - - - - -	0 6	2 1/2 - - - - -	1 6
1 1/2 - - - - -	0 8	3 - - - - -	2 0
2 - - - - -	0 14	4 - - - - -	3 8

Sec. 93.0706 - Floor Flanges

(a) Floor flanges for water closets or similar fixtures shall be of approved type and shall be brass or cast iron.

(b) Caulked-on flanges shall be not less than one fourth (1/4") inch thick and not less than two (2") inches in overall depth.

(c) Flanges shall be burned or soldered to lead bends or stubs, shall be caulked to cast iron soil pipe and shall be screwed or fastened in an approved manner to other materials.

(d) All such flanges shall be adequately designed and secured to support fixtures connected thereto.

(e) Closet screws and bolts shall be of brass or other approved corrosion resistant metal. All such screws and bolts shall be of adequate size and number to properly support the fixture installed.

Sec. 93.0707 - Cleanout Fittings

(a) Each cleanout for cast iron pipe shall consist of a cast iron or brass body and a brass plug, and each cleanout for galvanized wrought iron, galvanized steel, copper or brass pipe or copper tubing, shall consist of a brass plug, as specified in the following tables, or a standard weight brass cap. Plugs shall have raised square heads or approved countersunk rectangular slots. Countersunk heads shall be used where raised heads may cause a hazard.

(b) Each cleanout fitting and each cleanout plug or cap shall be of an approved type.

Sec. 93.0707 - Cleanout Fittings (Continued)

(c) Each cleanout shall be maintained gas and watertight. Where a thread lubricant is used, such lubricant shall be an approved non-hardening type.

Alternate Cleanouts: San Diego Pattern: The cleanout cap or cover shall be made of extra heavy brass of not less than 1/4" thickness.

The screw or head of same shall be not less than 1/3 the area of the cover, and not less than 1" high and of hexagon shape. The body or cleanout ferrule shall be not less than 4" inches long and may be made of heavy iron or brass. The engaging parts shall have not less than 6 threads of iron pipe size. The flange between the engaging parts shall be of sufficient width to permit a washer to be used in order that the engaging parts may be made water tight. Other type cleanouts not specified in this Section may be used only after they have been approved.

Minimum material specifications. A.S.T.M. Designation B-146-52-6A.

#### Sec. 93.0708 - Thread Fittings

(a) All plain screwed fittings shall be of cast iron, malleable iron, or brass, of standard weights and dimensions.

(b) Drainage fittings shall be of cast iron, malleable iron, or brass, with smooth interior waterway, having threads tapped out of solid metal. The threads of drainage fittings shall be tapped so as to allow one-fourth ( $\frac{1}{4}$ " ) inch per foot grade.

(c) All malleable iron vent fittings shall be galvanized.

#### Sec. 93.0709 - Back Water Valves

Back water valves shall have cast iron or brass bodies, non-corrosive bearings, seats, and self-aligning discs, and shall be so constructed as to insure a positive mechanical seal and to remain closed except when discharging wastes. Such valves shall remain sufficiently open during periods of low flows to avoid screening of solids and shall not restrict capacities or cause excessive turbulence during peak loads. Valve access covers shall be bolted type with gasket and each valve shall bear the manufacturer's name cast into body and cover. Back water valves shall be

Sec. 93.0703 -- Back Water Valves (Continued)

so located that they will be readily accessible for inspection and repair at all times.

Sec. 93.0710 - Valves and Fittings

(a) Gate valves when used on drainage work shall be full way type with working parts of corrosion resistant metal. Sizes four (4") inches or more in diameter shall have cast iron bodies, and sizes less than four (4") inches cast iron or brass bodies.

Sec. 93.0711 - Hangers and Supports

(a) Vertical Piping

(1) Attachment. - Vertical piping shall be secured at sufficiently close intervals to keep the pipe in alignment and carry the weight of the pipe and contents. Stacks shall be supported at their bases, and if over two (2) stories in height at each floor by approved metal floor clamps.

(2) Cast iron soil pipe. - Cast iron soil pipe shall be supported at not less than at every story height and at its base.

Sec. 93.0711 -- Hangers and Supports (Continued)

(3) Screwed pipe. - Screwed pipe (IP3) shall be supported at not less than every other story height.

(4) Copper tubing. - Copper tubing shall be supported at each story for piping  $1\frac{1}{2}$  inches and over and at not more than 6 foot intervals for  $1\frac{1}{4}$  inches and smaller. Copper pipe or tube in contact with structural members or hangers shall be insulated or padded.

(5) Lead pipe. - Lead pipe shall be supported at intervals not exceeding 4 feet.

(b) Horizontal Piping

(1) Supports. - Horizontal piping shall be supported at sufficiently close intervals to keep it in alignment and prevent sagging.

(2) Cast iron soil pipe. - Cast iron soil pipe shall be supported at not more than 5 foot intervals.

(3) Screwed pipe. - Screwed pipe (IPS) shall be supported at approximately 12 foot intervals.

(4) Copper tubing. - Copper tubing shall be supported at approximately 8 foot intervals for piping  $1\frac{1}{2}$  inches and smaller and 10 foot intervals for piping 2 inches and larger.

(5) Lead pipe. - Lead pipe shall be supported by strips or otherwise for its entire length.

(6) In ground. - Piping in the ground shall be laid on a firm bed for its entire length, except where support is otherwise provided which is adequate in the judgment of the Administrative Authority.

(c) Hangers and Anchors

(1) Material. - Hangers and anchors shall be of metal of sufficient strength to support their proportional share of the pipe and contents. In no case shall hangers be less weight than perforated iron  $1/32$  inch thick and  $3/4$  inch wide securely nailed or screwed and held in place with not less than  $1/4$ " x  $1/2$ " stove bolts.

(2) Stone, concrete, brick or similar material shall be used where necessary to support any part of the plumbing system above ground on piers or pedestals.

Sec. 93.0712 - Trenching, Excavation and Backfill

(a) Support of piping. - Buried piping shall be supported throughout its entire length.

(b) Open trenches. - All excavations required to be made for the installation of a building-drainage system, or any part thereof within the walls of a building, shall be open trench work and shall be kept open until the piping has been inspected, tested and accepted.

(c) All excavations shall be completely back filled as soon after inspection as practicable. Adequate precaution shall be taken to insure proper compactness of backfill around piping without damage to such piping. Fill shall be properly compacted. Suitable precautions shall be taken to insure permanent stability for pipe laid in filled or made ground.

(d) Water Service pipes, or any underground water pipes shall not be run or laid in the same trench with building sewer or drainage piping.

SECTION 10. That Division 8 of Article 3 of Chapter IX of the San Diego Municipal Code be, and the same is hereby amended to read as follows:

"DIVISION 8"

Drainage System

Sec. 93.0801 - Materials

(a) Building drainage pipe shall be cast iron soil pipe, copper tubing or lead pipe.

(b) Copper tubing installed underground shall be not less than type K. Copper tubing above ground shall be not less than type M.

(c) Drainage fittings shall be cast iron, lead, brass, or copper having smooth interior waterway of the same diameter as the piping served and all such fittings shall conform to the type of pipe used.

1. Fittings on screwed pipe shall be of the recessed drainage type. Burred ends shall be reamed to the full bore of the pipe.

2. The threads of drainage fittings shall be tapped so as to allow one fourth (1/4") inch per foot grade.

Sec. 93.0802 - Fixture Unit Equivalents

The unit equivalent of plumbing fixtures shown in Table No. 1 shall be based on the size of the trap required, and the unit equivalent of fixtures and devices not shown in Table No. 1 shall be based on the rated discharge capacity in gallons per minute in accordance with Table No. 2.

Maximum trap loadings for sizes up to four (4") inches are as follows:

1 1/4"	- - - - -	1 unit

\*NOTE - The size and discharge rating of each indirect waste receptor and each interceptor shall be based on the total rated discharge capacity of all fixtures, equipment, or appliances discharging thereinto in accordance with Table 2.

Where trap sizes are increased over the minimums shown in Table 1 or greater waste loadings are evident, the discharge rating shall be determined in accordance with Table 2.

TABLE NO. 2

12 to 23	Equals	2 Units
24 to 45	Equals	4 Units
46 to 75	Equals	6 Units

Over 50 gals. shall be determined by the Administrative Authority.

Sec. 93.0803 - Size of Drainage Piping

(a) The minimum sizes of vertical and/or horizontal drainage piping shall be determined from the total of all fixture units connected thereto, and additional, in the case of vertical drainage pipes, in accordance with their length.

(b) Table No. 3 of this Division shows the maximum number of fixture units allowed on any vertical or horizontal drainage pipe, house drain, and/or house sewer of a given size; the maximum number of fixture units allowed on any branch interval of a given size.

Sec. 93.0804 - Fixture Connections Drainage

(a) Drainage piping shall be provided with approved inlet fittings for fixture connections, correctly located according to the size and type of fixture proposed to be connected and meeting all the requirements of this division.

(b) Two fixtures set back to back, within the distance allowed between a trap and its vent, may be served by a single drainage pipe provided that each fixture wastes separately into an approved double fitting having inlet openings at the same level.

(c) Each waste outlet for a plumbing fixture that requires roughing-in above grade shall be immediately in the rear of the fixture trap. One change of direction of not more than  $22\frac{1}{2}$  degrees will be permitted.

(d) Fixture connections or screw pipe trap arms installed below grade or in inaccessible locations shall be of cast iron or Red Brass pipe.

Galvanized iron screw pipe trap arms may be installed a minimum of six (6) inches above grade when entirely exposed to view, and accessible for replacement. Such galvanized trap arms shall be connected to traps in such a manner as to permit replacement of the trap arm piping by the use of threaded connections without cutting or structural repair. Galvanized trap arms shall not be installed to serve urinals, water closets, bidets or similar fixtures.

(e) No food waste disposal unit or grinder unit shall be installed in any waste on a back to back fitting, or double fitting having waste inlet openings at the same level.

Sec. 93.0805 - Changes in Direction of Drainage Piping

(a) Changes in direction of drainage piping shall be made by the appropriate use of approved fittings, and shall be of the angles presented by a one-sixteenth ( $1/16$ ) bend, one-eighth ( $1/8$ ) bend, or one-sixth ( $1/6$ ) bend, or other approved fittings of equivalent sweep. Piping shall be installed with the minimum number of fittings required to meet requirements of this Code.

(b) One-sixth bends will not be permitted, on soil or waste pipe lines, for horizontal changes of direction.

#### Horizontal to Vertical

(a) Horizontal drainage lines, connecting with a vertical stack shall enter through forty-five ( $45^{\circ}$ ) degree "Y" branches, sixty ( $60^{\circ}$ ) degree "Y" branches, combination "Y" and one eighth ( $1/8$ ) bend branches, sanitary tee or sanitary tapped tee branches, or other approved fittings of equivalent sweep. No fitting having more than one branch at same level shall be used unless such fitting is constructed so that the discharge from any one branch cannot readily enter any other branch. Double sanitary tees may be used when the barrel of the fitting is at least two pipe sizes larger than the largest branch.

#### Horizontal to Horizontal

(b) Horizontal drainage lines connecting with other horizontal drainage lines shall enter through forty-five ( $45^{\circ}$ ) degree "Y" branches, combination "Y" and one-eighth ( $1/8$ ) bend branches or other approved fittings of equivalent sweep.

#### Vertical to Horizontal

(c) Vertical drainage lines connecting with horizontal drainage lines shall enter through forty-five ( $45^{\circ}$ ) degree "Y" branches, combination "Y" and one-eighth ( $1/8$ ) bend branches, or other approved fittings of equivalent sweep.

#### Sec. 93.0806 - Cleanouts

(a) Size: All cleanout bodies shall be the same size as the line they serve. No cleanout shall be installed in a plumbing or drainage system, which is not an approved type.

(b) There shall be a cleanout placed at the end of each horizontal soil or waste line and at each horizontal change of direction, except that one change of direction of forty-five ( $45^{\circ}$ ) degrees or less, or two changes of direction using  $1/16$  bends may be permitted without a cleanout when said forty-five ( $45^{\circ}$ ) degree or twenty-two and one half ( $22\frac{1}{2}^{\circ}$ ) degree change of direction is in a line served by a cleanout in compliance with this Code.

(c) Distance Between Cleanouts: Soil lines or waste lines shall not be installed with a greater distance between cleanouts than one hundred (100') feet.

(d) Property Line Cleanout: There shall be installed a cleanout in each soil line at the point of connection with the Public Sewer at the property line, said cleanout shall be not more than three (3') feet inside the property line and shall be not more than twelve (12") inches below the finished grade line of the property. Cleanouts in paved areas shall be made accessible in the same manner as provided for in paragraph (h) of this section.

(e) Access to Cleanouts: 1. Under a building, where there is less than eighteen (18") inches clearance between the ground level and the lower edge of the floor joists, all cleanouts shall be extended through the foundation wall where they shall be made accessible, or as required in paragraphs (f) and (i) of this section.

2. Cleanouts under buildings: Cleanouts installed under buildings, and in basements shall be installed so that there will be a clearance of not less than 24 inches in front of each cleanout. Cleanouts three inches or less may have 18 inches clearance in front.

(f) Floor Cleanouts: Where it is impractical to extend cleanouts through the foundation wall, as required in paragraph (e) 1. of this section, they may be extended up through the floor and made accessible as required in (h) 1. of this section.

(g) Line Type Cleanout: Where main line cleanouts are not accessible or are not extended through foundation walls as required in (e) 1. of this section, approved line type cleanouts may be used provided they are located outside the foundation wall, not more than six (6') feet nor less than four (4') feet from said wall and not more than thirty (30") inches from the top of the cleanout to finish grades. When cleanouts are omitted at the base of the main stack, the change of direction from vertical to horizontal shall be made with two one-eighth (1/8) bends or a long sweep one-quarter (1/4) bend.

The Director may, for structural reasons permit line cleanouts to be placed in other locations than those mentioned in this paragraph. Surface markers shall be placed over this type of cleanout.

(h) Cleanout Floor Plates: 1. Cleanouts extended through finished floor slabs, decks or drives shall be so installed that the entire top of the cleanout plug shall be plainly exposed to view.

2. The top of each exterior cleanout shall be brought within twelve (12") inches of grade. Each cleanout in a building sewer shall be housed in a concrete meter box or shall be flush with a paved area. Line cleanouts shall comply with subsection (g) above and are not required to meet the requirements of this subsection.

3. Where for structural reasons it is desired to keep the cleanout flush with the finished floor deck or slab, an approved type cleanout plate or an approved type cleanout plug designed for this purpose, shall be used. Where plates are used, the cleanout plug shall be kept as close to the plate as possible.

(i) Cleanout Nuisance: No cleanout shall be installed so as to become an obstruction.

(j) Cleanout Lubrication: Cleanout plugs shall be lubricated with non-hardening compound.

(k) Cleanouts above First Floors: Soil and waste lines on floors above the first floor when concealed or completely enclosed may be installed without cleanouts. However, in no case shall waste lines be installed without cleanouts when said waste lines serve kitchen sinks or other fixtures or equipment used in the preparation of food.

(l) Wall Type Cleanouts: Wall type cleanouts, approved for use in vertical stacks, may be used where structural conditions justify wall cleanouts, however, wall cleanouts may be used only where sweeps or combinations of fittings having not less than a six inch radius are installed at the base of the stack.

(m) Cleanout plugs shall not be removed except to work on the lines involved and then only for the minimum time necessary.

(n) Cleanouts serving plumbing or drainage lines shall not be used for any other purpose.

Sec. 93.0807 - Grade of Horizontal Drainage Piping

(a) Minimum Grade: Horizontal plumbing and drainage piping shall be installed in the shortest practical alignment using the minimum number of fittings and at a uniform slope of not less than one-fourth (1/4") inch per foot toward the point of disposal; except that where it is impractical due to the depth of the public sewer, or for structural features,

or the arrangement of the building, or structure does not permit a slope of one-fourth (1/4") inch per foot, such pipe or piping may then have a slope of not less than one-eighth (1/8") inch per foot.

(b) Manholes Required: On private property, all house soil lines ten (10") inches or larger in diameter, extending a distance greater than 300 feet from the building sewer connection, to a sewer main, shall be provided with a manhole every 300 feet. Said manhole must comply with City Engineering Department Specifications.

Sec. 93.0808 - Gravity Drainage Required

Gravity flow: Where possible, all plumbing fixtures, drains, appurtenances, and appliances used to receive or discharge liquid wastes or sewage, shall be connected by gravity flow to the public sewer or other approved disposal system.

Only that portion of the plumbing system unable to attain gravity flow to the public sewer may be drained to an ejector sump.

Sec. 93.0809 - Drainage Below Curb and Also  
Below Main Sewer Level

(a) Fixtures within a building that are located below the elevation of the curb or property line, at the point where the house sewer crosses under the curb or property line, and above the crown level of the main sewer, shall drain by gravity into the main sewer, and shall be protected from back flow of sewage by installing an approved type back water valve, and each such backwater valve shall be installed only in that branch or section of the drainage system which receives the discharge from fixtures located below the elevation of the curb or property line.

(b) Drainage piping serving fixtures within a building located below the crown level of the main sewer, shall discharge into an approved water-tight sump or receiving tank, so located as to receive the sewage or wastes by gravity. From such sump or receiving tank the sewage or other liquid wastes shall be lifted and discharged into the house drain or house sewer by approved ejectors, pumps, or other equally sufficient approved mechanical device.

(c) The minimum size of any pump or any discharge pipe from a sump having a water closet connected thereto shall be not less than two (2") inches.

(d) The discharge line from such ejector, pump, or other mechanical device shall be provided with an accessible back water valve and gate valve, and if the gravity drainage line to which such discharge line connects is horizontal, the method of connection shall be from the top through a "Wye" branch fitting.

(e) House drains or house sewers receiving discharge from any pump or ejector shall be adequately sized to prevent overloading. Two (2) fixture units shall be allowed for each gallon per minute of continuous flow.

(f) Back-water valves, gate valves, motors, compressors, air tanks, or other mechanical devices, required by this Section shall be located where they will be readily and easily accessible for inspection and repair at all times, and unless continuously exposed, shall be enclosed in a water-tight masonry pit fitted with an adequately sized removable cover.

(g) The drainage and venting systems in connection with fixtures, sumps, receiving tanks and mechanical waste lifting devices, shall be installed as required in this Code for gravity systems.

(h) Sumps and receiving tanks shall be constructed on concrete or metal. If constructed of concrete, the walls and bottom shall be not less than six (6") inches thick, plastered on the inside with cement plaster, not less than one-half (1/2") inch thick. Metal sumps and receiving tanks shall be of such thickness as to serve the purpose for which they are intended, and shall be painted inside and outside with corrosion resisting paint.

(i) All such sumps and receiving tanks shall be automatically discharged.

(j) Sumps and receiving tanks shall be provided with substantial air tight covers having a bolt and gasket type manhole that will permit access to the tank for repairs and cleaning. The top shall be provided with a vent pipe which shall extend separately to the roof or, when permitted, may be combined with other vent pipes. Such vent shall be large enough to maintain atmospheric pressure within the sump under all normal operating conditions, and in no case shall be less in size than that required by Table 3 for the number of fixtures discharging into the sump

nor less than one and one-half ( $1\frac{1}{2}$ ) inches in diameter. When the foregoing requirements are met and the vent after leaving the sump is combined with vents from fixtures discharging into the sump the size of the combined vent need not exceed that required for the total number of fixtures discharging into the sump. No vent from an air operated sewage ejector shall combine with other vents.

(k) Air tanks shall be so proportioned as to be of equal cubical capacity to the ejectors connected therewith in which there shall be maintained an air pressure of not less than two (2) pounds for each foot of height the sewage is to be raised. No water operated ejectors shall be permitted.

(l) When subsoil drainage systems are installed, they shall be discharged into an approved sump or receiving tank and shall be discharged in a manner satisfactory to the Administrative Authority.

\*\*\* Only two toilets or trailer park traps or fixtures allowed on any branch or drain, and four toilets or trailer park traps or fixtures allowed on any vertical pipe or stack provided that not more than two toilets or trailer park traps or fixtures are connected to the stack in any one story and that water closets are limited to flush tank type.

\*\*\*\*One and one half ( $1\frac{1}{2}$ ) inch pipe is the minimum size permitted for drainage and vent piping, except as otherwise specifically permitted.

SECTION 11. That Division 9 of Article 3 of Chapter IX of the San Diego Municipal Code be, and the same is hereby amended to read as follows:

DIVISION 9

VENTS AND VENTING

Sec. 93.0901 - Vents Not Required

(a) Where permitted by the Administrative Authority vent piping may be omitted on an interceptor when such interceptor acts as a primary settling tank and discharges through a horizontal indirect waste pipe into a secondary interceptor located within twenty-five (25') feet, which is properly trapped and vented.

(b) Traps serving sinks, which are part of the equipment of bars, soda fountains and counters, need not be vented when the location and construction of such bars, soda fountains and counters is such as to make it impossible so to do. When such condition exists, said sinks shall discharge by means of approved indirect waste pipes, into a floor sink or other approved type receptor, or shall be provided with a foot vent complying with this Division.

Sec. 93.0902 - Materials

(a) Vent pipes shall be cast iron soil pipe, galvanized steel, galvanized wrought iron, threaded cast iron, lead, copper or brass, except that no galvanized steel or galvanized wrought iron, shall be used under ground and shall be kept at least six (6") inches above ground.

(b) Copper tubing installed underground shall be not less than type K. Copper tubing installed above ground shall be not less than Type M.

(c) Changes in direction of vent piping shall be made by the appropriate use of approved fittings and no such pipe shall be strained or bent. Burred ends shall be reamed to the full bore of the pipe.

Sec. 93.0903 - Size of Vents

(a) Each building in which drainage piping is installed and each connection to a sewage disposal system shall have at least one stack of a size equal to the main house drain extending continuous from such

house drain through the roof as a vent.

EXCEPTIONS:

(1) When a house drain exceeds three (3") inches in size such stack shall be equal in size to the largest required drainage stack in the building but in no case less than three (3") inches.

(2) Two or more buildings located on the same lot or parcel of land under one ownership, when connected to a common house sewer or private sewage disposal system, may be vented by means of piping sized in accordance with Table No. 3, provided that at least one such stack is installed to vent the house sewer or private sewage disposal system.

(b) Except as provided in subsection (a) of this section, the size of vent piping shall be determined from its length and the total of fixture units connected thereto, as set forth in Table 3.

Sec. 93.0904 - Vent Pipe Grades and Connections

(a) Location of Main Vent: The main vent stack may be placed where most practical.

(b) Venting Methods: Venting shall be accomplished by the appropriate use of soil or waste stacks, vents, revents, back vents, circuit of continuous vents or a combination thereof, installed in accordance with the requirements of this Code. The venting methods set forth in sections regulating foot vents and combination waste and vent systems are alternate methods of venting when separate venting is not practical. Such alternate methods shall comply separately and shall not be combined in the installation of any single fixture or group of fixtures.

(c) Trap Protection: Every trap shall be protected from siphonage and back pressure, and air circulation assured, by means of a vent pipe of the caliber, weight, and material as specified in this Code, except as provided for indirect fixtures.

(d) Vent Below Trap: Vent pipes shall not be taken off below the weir of the trap they serve, except for water closets, clinical sinks, urinals or other similar fixtures requiring siphonic action.

Sec. 93.0904 - Vent Pipe Grades and Connections (Continued)

(e) Siphon Leg: The vent pipe for plumbing fixtures that require a siphon leg to complete the function of fixture trap, shall be taken off at a point below the fixture, in such manner as not to interfere with the proper operation of the fixture.

(f) Grade of Vent: All vent pipes shall be so graded and connected, as to drain back to the drainage pipe it serves. No vent shall have less than one-quarter ( $\frac{1}{4}$ " ) inch per foot grade.

(g) Rise of Vent: Vent pipes shall rise vertically to a point not less than four (4") inches above the overflow level of the fixtures served, before offsetting. ~~horizontally.~~

(h) Vent Intersection: All vent intersections shall be not less than four (4") inches above the highest possible water line of the fixtures they serve.

(i) Vent for Double Fitting: Two fixtures back to back or side by side may be served with one vent provided that each fixture wastes separately into an approved type double fitting.

(j) Horizontal Vents: Horizontal vents may be installed only where, for structural reasons, vertical venting is impractical.

(k) Venting Changes of Direction: Changes in direction of vent piping shall be made by the appropriate use of approved fittings and no vent pipe shall be strained or bent.

Sec. 93.0905 - Vent Termination

(a) Each vent pipe or stack shall extend through its flashing and shall terminate vertically not less than four (4") inches above the roof or fire wall, not less than one (1') foot from any vertical surface.

(b) Each vent shall terminate not less than ten (10') feet from or at least two (2') feet above any window, door opening, air intake or vent shaft, nor less than three (3') feet in every direction from any lot line, alley and street excepted.

(c) Vent pipes shall be extended separately or combined, of full required size, not less than four (4") inches above the roof or fire wall.

Sec. 93.0905 - Vent Termination (Continued)

Flagpoling of vents is prohibited except where the roof is used for purposes other than weather protection. In such cases the vent shall extend not less than seven (7') feet above the roof and be securely stayed.

(d) Vent pipes for outdoor installations shall extend at least ten (10') feet above the surrounding ground and shall be securely supported.

(e) Joints at the roof, around vent pipes, shall be made watertight by the use of approved flashings or flashing material.

Sec. 93.0906 - Vent Stacks and Relief Vents

In every building ten or more stories in height, all soil and waste stacks which are served by parallel vent stacks shall be connected to such vent stack at each fifth story by means of an independent, special vent pipe, the size of which shall not be less than the size of the vent stack at that story. The vent stack intersection shall be through a "Wye" branch fitting placed not less than four (4') feet above the floor level, and the soil or waste stack intersection shall be through a "Wye" branch fitting placed below a fixture branch serving that floor. All main vents or vent stacks shall connect full size at their base to the main soil or waste pipe, at or below the lowest fixture branch.

Sec. 93.0907 - Foot Vents

(a) Island Fixture Vents: Foot vents may be installed where fixtures are located in the center of rooms or away from walls or partitions, and where continuous venting would be impractical.

(b) Where foot venting is permitted, the horizontal section of the waste serving fixtures on such system shall be at least one pipe size larger than required in Table 3.

The vertical portion of the piping serving the foot vented fixtures shall extend to a point at least four (4") inches above the highest possible water line of the fixture served, then returned downward to the horizontal waste line and connected thereto.

Sec. 93.0907 - Foot Vents (Continued)

The waste opening for the fixture trap connection shall be installed in the vertical line closest to the end of the horizontal waste line.

A vertical relief vent, extending independently through the roof or intersected into the venting system, shall be placed in the horizontal line on the sewer side of the foot vent.

The horizontal distance between the relief vent and the last fixture waste shall at no time exceed twelve (12') feet.

No other fixture shall be connected to any portion of the waste line between the fixtures being served and the relief vent.

(c) Foot venting shall be limited to not more than two sinks or similar fixtures on any one foot vent system.

Sec. 93.0908 - Circuit Vent System

(a) Maximum Toilets on Circuit Vent: The number of toilets for a Circuit System shall not exceed sixteen (16) and shall be spaced not more than thirty-six (36") inches apart.

(b) Main Vents: Two four (4") inch stacks shall be installed, one at the beginning of the horizontal line, and one immediately on the sewer side of the last toilet, both stacks shall raise immediately to the vertical and continue vertically through the roof, undiminished in size.

(c) Small Fixtures May Connect: The sixteen (16) toilets, between the two four (4") inch stacks, shall constitute a circuit vent system and small fixtures only, which are properly trapped and vented, may connect to the horizontal line, connection of said small fixtures shall be made only between the soil stacks.

(d) Multiple Circuit Vents: 1. Circuit vent systems may be installed, one immediately above the other on separate floors, forming a multiple circuit vents system.

2. Where multiple circuit vent systems are located there shall be installed a relief vent of not less than one-half the diameter of the main waste stack. The relief vent shall begin at the lowest floor, on which there is a circuit vent system, before intersecting into the main vent.

Sec. 93.0908 - Circuit Vent System (Continued)

3. On each floor, except the top floor, there shall be a connection to the relief vent. The fitting for said connection shall be in the horizontal soil line, between the main soil stack and the first toilet. The vent shall then be intersected into the relief vent, not less than four (4") inches above the flood level of the adjacent fixture.

4. Relief vents for circuit vent systems shall in no case be less than two (2") inches in diameter.

5. When the soil pipe leading from any fixture in the circuit vent system to the main horizontal run of the circuit vent system is more than 30" long, the said fixture shall be back vented and shall not be considered part of the vent system.

SECTION 12. That Division 10 of Article 3 of Chapter IX of the San Diego Municipal Code be and the same is hereby amended to read as follows:

DIVISION 10

INDIRECT WASTE PIPING, WET VENTED  
SYSTEMS AND SPECIAL WASTES

Sec. 93.1001 - Flood Storage and Preparation

No evaporative cooler, air washer or similar air conditioning equipment and no cold storage room refrigerator, cooling counter, compartment, receptacle, appurtenance or device, which is used, designed or intended to be used for the manufacture, preparation, storage, or handling of food or drinks, shall have any drain pipe in connection therewith directly connected to any soil, waste or vent pipe. Such equipment shall be drained by means of indirect waste pipes as defined in this Code, and all wastes drained by such equipment shall terminate at least one (1") inch above the overflow rim of such fixture.

Counter sinks, bar sinks, fountain sinks and similar fixtures may be drained by indirect waste pipes.

The foregoing does not apply to any dishwashing or culinary sink in any food preparation room unless such receptacle is used for soaking or washing ready-to-serve food.

Sec. 93.1002 - Materials and Size

The material and size of indirect waste pipes shall be in accordance with the provisions of other sections of this Code applicable to drainage piping and in addition shall include brass, galvanized steel pipe and fittings.

It is provided however that no indirect waste pipe need be larger in diameter than the drain outlet or tailpiece of the fixture, appliance or equipment served, but in no case shall any such indirect waste pipe be less than one half (1/2") inch in size.

Sec. 93.1003 - Drinking Fountains

Drinking fountains may be installed with indirect wastes.

Sec. 93.1004 - Indirect Waste Receptors

All plumbing fixtures or other receptors receiving the discharge of indirect waste pipes shall be of such shape and capacity as to prevent splashing or flooding, shall be located where they are readily accessible for inspection and cleaning and shall not be located within the enclosure or housing of any food storage equipment. No floor drain and no plumbing fixture which is used for domestic or culinary purposes, shall be used as an indirect waste receptor. Indirect waste pipes shall discharge into floor sinks, stand-pipe receptors or other approved fixtures. No stand-pipe receptor shall extend more than two (2') feet above its trap. No indirect waste receptor shall be installed in any toilet room, closet, or store room nor in any other portion of a building not in general use by the occupants thereof.

Sec. 93.1005 - Indirect Waste Piping

No indirect waste pipe shall exceed fifteen (15') feet in length, except cooling or condensate drainage. Any indirect waste pipe exceeding four (4') feet in length shall be effectively trapped but such traps need not be vented. Angles and changes of direction of indirect waste pipes shall be provided with cleanouts so as to permit flushing and cleaning.

Sec. 93.1006 - Pressure Drainage Connections

Indirect waste connections shall be provided for drains, overflow or relief vents from the water supply system, and no piping or equipment carrying wastes or producing waste or other discharges under pressure shall be directly connected to any part of the drainage system. Pressure relief drains may drain to the outside of the building and shall be directed downwards so as to avoid discharge on persons or property.

The foregoing shall not apply to any approved sump pump or to any approved pressure-wasting plumbing fixture or device when the Director of Building Inspection has satisfied himself that the drainage system is adequately sized to accommodate the anticipated discharge thereof.

Sec. 93.1007 - Sterile Equipment

Appliances, devices, or apparatus such as stills, sterilizers, and similar equipment requiring water and waste and used for sterile materials shall be indirectly connected or provided with an air gap between the trap and the appliance.

Sec. 93.1008 - Appliances

Appliances, devices, equipment, or other apparatus not regularly classed as plumbing fixtures, but which are equipped with pumps, drips, or drainage outlets, may be drained by indirect waste pipes discharging into an approved type open receptor. No commercial dishwashing machine shall be directly connected to a drainage system. No domestic dishwashing machine shall be directly connected to a garbage disposal.

Sec. 93.1009 - Cooling Water

When permitted by the Department having jurisdiction, clean running water used exclusively as a cooling medium in an appliance, device, or apparatus, may discharge into the drainage system through the inlet side of a fixture trap in the event that a suitable fixture is not available to receive such discharge. When an indirect connection is used, such trap connection may be by means of a pipe connected to the inlet side of an approved fixture trap, the upper end terminating in a funnel shaped receptacle set adjacent to, and not less than six (6") inches above, the overflow rim of the fixture.

Sec. 93.1009 - Cooling Water (Continued)

Air Conditioning Units. For gravity or pumped drains with continuously free flowing water, plastic pipe bearing NSY approved may be used.

Sec. 93.1010 - Drinking Fountains

Drinking fountains may be installed with indirect wastes. No drinking fountain shall be installed in a toilet room.

Sec. 93.1011 - Steam and Hot Water Drainage  
Condensors and Sumps

(a) No steam pipe shall connect to any part of a plumbing or drainage system, nor shall any water above one hundred and eighty (180°) degrees Fahrenheit be discharged into any part of a drainage system. Such pipes may be indirectly connected by discharging into an open or closed condenser, and/or intercepting sump of approved type, that will prevent the entrance of steam or water under pressure into the drainage system. All closed condensers or sumps shall be provided with a relief pipe not less than one pipe size larger than the largest inlet, which relief pipe shall be taken off the top, and extend separately full size above the roof. All condensers and sumps shall be properly trapped at the outlet with a deep seal trap and the trap vented. Outlets shall be taken off from the side in such manner as to allow a water line to be maintained that will permanently occupy not less than two-thirds (2/3) the capacity of the condenser or sump. All inlets shall enter above the water line, and the outlet size shall be not less than one (1) pipe size larger than the largest inlet. The contents of condensers receiving steam or hot water under pressure must pass through an open sump before entering the drainage system.

(b) Sumps, condensers, or intercepting tanks which are constructed of concrete shall have the walls and bottom not less than four (4") inches in thickness, and the inside shall be cement plastered not less than one-half (1/2") inch in thickness. Condensers constructed of metal shall be not less than Number Twelve (12) U.S. Standard gauge and all such metal condensers shall be protected from external corrosion by an approved bituminous coating.

(c) Sumps and condensers shall be adequately sized and designed, in

Sec. 93.1011 - Steam and Hot Water Drainage Condensers and Sumps (Cont'd)  
relationship to the type of equipment connected, to control the temperature of the effluent as required by sub-section (a) of this section and shall be provided with suitable means of access for cleaning.

Sec. 93.1012 - Chemical Wastes

(a) Chemical or industrial liquid wastes likely to damage or increase maintenance costs on the sanitary sewer system, detrimentally affect sewage treatment, or contaminate surface or sub-surface waters, shall be pretreated to render them innocuous prior to discharge into a drainage system. Detailed plans and specifications of the pretreatment facilities may be required.

(b) Each waste pipe receiving or intended to receive the discharge of any fixture in which any acid or corrosive chemical is placed, and each ventilating pipe connected thereto, shall be constructed of high silicon iron pipe, or lead pipe of not less than 1/8" wall thickness, or of approved type ceramic glazed vitrified clay.

(c) All jointing materials shall be of approved type and quality.

(d) Whenever practicable all piping shall be readily accessible and installed with the maximum of clearance from other services.

(e) The owner shall make and keep a permanent record of the location of all piping and venting carrying chemical waste.

(f) No chemical vent shall intersect vents for other services.

(g) No chemical wastes shall be discharged into the ground, sewer or any other place without approval of the Director of Building Inspection.

(h) The provisions in this section relative to materials and methods of construction need not apply to minor installations such as small photographic or x-ray dark rooms or small research or control laboratories where minor amounts of adequately diluted chemicals are discharged.

Sec. 93.1013 - Domestic Food Disposers

(a) 1. Waste food disposers shall be installed only with a separate, properly vented trap and with a separate waste opening to receive the discharge therefrom. The discharge from no other fixture shall discharge into the waste food disposer. Domestic dishwashers may discharge into the house side of the trap serving a domestic sink when approved

Sec. 93.1013 - Domestic Food Disposers (Continued)

directional fittings are used.

2. Waste food disposers may be connected to an approved and properly installed fitting, located in a vertical sink waste line, provided that the waste openings serving the sink and the disposer are not more than five (5) pipe diameters apart and that the waste food disposer is connected to the lower waste fitting. Lower tapped tee center line opening shall not be less than nine (9") inches from finished floor.

3. Waste food disposers to be installed in dwellings, which existed before the adoption of this Code, may be installed in connection with a two compartment sink in said dwelling. One of the sink compartments may be connected to the inlet side of the trap serving the food waste disposer by means of a continuous waste; said continuous waste shall be entirely above the water seal of the trap and shall be installed in the most direct method with a minimum of fittings and shall not be more than thirty (30") inches in length. The disposer connection shall be immediately over the trap inlet.

4. A food waste disposal unit shall not be connected to, or discharge into, an interceptor or separator.

Sec. 93.1014 - Combination Waste and Vent System

(a) Combination waste and vent systems shall be permitted only where structural conditions preclude the installation of conventional systems as otherwise prescribed by this code, and it is not intended that such systems shall contain fixtures which are vented in accordance with Secs. 93.0907 and 93.0908.

(b) Plans and specifications for each combination waste and vent system shall be first approved by the Director of Building Inspection before any portion of any such system is installed.

(c) Each combination waste and vent system shall consist of a wet vented installation of waste piping as hereinafter provided in this section in which the trap for one or more plumbing fixtures is not separately and independently vented, and in which the waste pipes or piping shall be provided with an adequate vent or vents to assure free circulation of air therein, and in which any branch more than fifteen (15') feet in length is separately vented in an approved manner.

(d) Each waste pipe and each trap in any such system shall be at

Sec. 93.1014 - Combination Waste and Vent System (Continued)

least two (2) pipe sizes larger than the sizes required by Division 11 of this code, and at least two (2) pipe sizes larger than any fixture tail piece or connection.

(e) Unless specifically required or permitted by the Director of Building Inspection no vertical waste pipe shall be used in any such system except the tail piece or connection between the outlet of a plumbing fixture and the trap therefor. Such tail pieces or connections shall be as short as possible, and in no case shall exceed two (2') feet.

(f) Cleanouts may not be required on any wet vented branch serving a single trap when the fixture tail piece or connection is not less than two (2") inches in diameter and provides ready access for cleaning through the trap.

(g) Except where permitted to discharge into a wet-vented trailer park drainage system, no water closet or urinal shall be installed on any such system. Other one, two or three unit fixtures remotely located from the sanitary system and adjacent to a combination waste and vent system may be connected to such system in the conventional manner by means of waste and vent pipes of regular sizes, providing that the two pipe size increase required in the third paragraph of this section is based on the total fixture unit load connected to the system.

NOTE: Explanatory Notes on Combination Waste & Vent Systems

Combination waste and vent systems, as outlined herein, covers the horizontal wet venting of a series of traps by means of a common waste and vent pipe. Line sizes at least two pipe sizes larger than those required for a conventional system are designed to maintain a wetted perimeter or flow line low enough in the waste pipe to allow adequate air movement in the upper portion, thus balancing the system. Sinks, lavatories and other fixtures that rough in above the floor, should not be permitted on a combination waste and vent system, which, at best, is merely an expedient designed to be used in locations where it would be structurally impractical to provide venting in the conventional manner.

Combination waste and vent systems are intended primarily for extensive floor or shower drain installations where separate venting is

Sec. 93.1014 - Combination Waste and Vent System (continued)

not practical, for floor sinks in markets, demonstration or work tables in school buildings, or for similar applications where the fixtures are not adjacent to walls or partitions. Due to its oversize characteristics, such a waste system is not self scouring and consequently care should be exercised as to the type of fixtures connected and to the location of cleanouts. In view of its grease producing potential, restaurant kitchen equipment should not be connected to a combination waste and vent system.

Caution must be exercised to exclude appurtenances delivering large quantities or surges of water (such as pumps, sand interceptors, etc.) from combination waste and vent systems in order that adequate venting be maintained. Small fixtures with a waste producing potential of less than  $7\frac{1}{2}$  gallons per minute may be safely assigned a loading value of one unit. Long runs should be laid at the minimum permissible slope in order to keep tail pipes as short as possible. Tail pipes should not exceed two (2') feet in length which may necessitate slopes up to  $45^{\circ}$  on some branches.

It is essential that the pneumatics of such a system be properly engineered as the air pressure within the line must at all times balance that of the atmosphere without in order to prevent either trap seal loss or air locking between traps. Long mains should be provided with additional relief vents located at intervals of about one hundred (100') feet. Each such relief vent should equal approximately one-half of the area of the wet vented drain served.

Trap sizes are required to be equivalent to the branches they serve (two pipe sizes larger than normal) and tail pipes between fixtures or floor drains and such traps should be reduced to normal size.

Example: A floor drain normally requires a two inch trap and waste. On a combination waste and vent system both the trap and waste must be increased two pipe sizes which would be  $2\frac{1}{2}$ " and 3", making the trap three (3") inch, (pipe sizes recognized for this purpose are 2",  $2\frac{1}{2}$ ", 3",  $3\frac{1}{2}$ ", 4",  $4\frac{1}{2}$ ", 5", 6", etc.) The tail piece between the floor drain and its trap should be 2' (or normal size to insure that the amount of waste water entering the trap only partially fills the waste branch. A

Sec. 93.1014 - Combination Waste and Vent System (Continued)

three (3") inch floor drain would thus require a 4" trap, a 4" floor drain, a 5" trap, etc., for the reasons previously stated.

Duplicate layout drawings of each such proposed piping system must be presented to the Department having jurisdiction, and approval obtained before any installation is made. Complicated layouts should be checked by qualified personnel.

WHEN IN DOUBT CHECK WITH YOUR LOCAL ADMINISTRATIVE AUTHORITY.

Sec. 93.1015 - Floor Drain Installation

The provisions of this Section are alternate provisions to the requirements of Section 93.1014, and such systems shall not be combined, but must be designed and constructed as separate systems.

(a) Main Floor Drain and Tributaries: In every building hereafter erected or altered, the floor of which is to be drained, a main floor drain of sufficient size shall be installed. The main floor drain shall be trapped and vented. Tributary floor drains trapped and less than thirty (30') feet in length may then be installed without a vent and shall be connected to the house side of the main floor drain trap. The size of the tributary drain shall be not less than two (2") inches inside diameter.

(b) Floor Strainer: Floor drains shall be installed so that the strainer or inlet shall be in plain view at all times.

SECTION 13. That Division 11 of Article 3 of Chapter IX of the San Diego Municipal Code be and the same is hereby amended to read as follows:

DIVISION 11

TRAPS AND INTERCEPTORS

Sec. 93.1101 - Trap Requirements

(a) Continuous Wastes: Continuous wastes and fixture tail pieces shall be constructed of seamless drawn brass not less than No. 20 gauge. Tail pieces, or continuous waste shall not be less than one and one-half (1 1/2") inches O.D. for sink, dish-washers, laundry tubs, bath tubs, and urinals and similar fixtures, and not less than one and one-quarter (1 1/4") inches for lavatories, drinking fountains

Sec. 93.1101 - Trap Requirements (Continued)

and similar small fixtures.

(b) Qualities of Fixture Traps: 1. Each trap, except interceptors or similar devices, shall have a uniform interior, smooth waterway and be self-cleansing. Fixture traps shall be of standard design and weight and shall be of lead, cast iron, or cast brass or of drawn brass tubing of not less than 20 B&S gauge in thickness. Each trap shall have the manufacturer's name stamped legibly on the body of the trap. Each tubing trap shall have the gauge of the tubing stamped legibly thereon.

(c) Trap Seal: Each trap shall have a water seal of not less than two (2) inches and not more than seven (7) inches.

(d) Traps: Traps shall be installed level, so as to provide a full water seal.

(e) Trap Screw Protection: Each trap shall be constructed so that the water seal will protect the trap screw.

(f) Use of Code Traps Only: No type of trap shall be installed in any soil or waste line except fixture traps and traps required by this Code.

(g) Drum Traps: Drum traps or pot traps shall not exceed four (4) inches in diameter nor be more than eight (8) inches deep. Drum traps may be installed only as provided for in/Section ~~93.1102~~ <sup>this</sup> ~~or (c) of this Code~~ or as required by the Director.

1. Drum traps may be installed to receive the waste from dental cuspidors, when it is necessary to provide against dental materials entering the plumbing system.

2. The distance between the drum trap and the vent may be greater than provided for in Section ~~93.1102~~ <sup>93.1102</sup> ~~Table #8~~, but in no case shall said distance be greater than eight (8) feet.

3. Drum traps shall be installed with the trap screw on top and accessible, to expedite trap cleaning.

(h) Trap Slip Joint: The slip joint of any trap, shall be located only between the seal of the trap and the outlet of the fixture. Every union joint shall be metal to metal without the use of washers, packing, or other material.

Sec. 93.1101 - Trap Requirements (Continued)

(1) Illegal Traps: No trap which depends upon the action of movable parts or concealed interior partitions for its seal shall be used. Full "S" traps are prohibited. Bell traps are prohibited. Crown-vented traps are prohibited.

Sec. 93.1102 - Traps Protected by Vent Pipes

(a) Each plumbing fixture trap, except as otherwise provided in this code, shall be protected against syphonage and back pressure, and air circulation assured throughout all parts of the drainage system, by means of a vent pipe, installed in accordance with the requirements of this Code.

(b) Each fixture trap shall have a protecting vent so located that the developed length in the fixture drain from the trap weir to the vent is within the distance given in the following table:

Horizontal Distance of Fixture Trap from Vent

<u>Size of Fixture Drain (Inches)</u>	<u>Distance Trap to Vent</u>	
Maximum slope one-fourth ( $\frac{1}{4}$ " ) inch per foot. - -	Feet	Inches
1 $\frac{1}{2}$ " - - - - -	2	6
2" - - - - -	3	0
3" - - - - -	3	6
2" and 3" floor drains & floor sinks - - - - -	10	0
4" and larger floor drains and sand traps - - - - -	10	0
Water closets, clinic sinks, bedpan washers & similar fixtures - -	3	6

(c) The vent pipe opening from a soil or waste pipe, except for water closets and similar fixtures having siphonic action, shall not be below the weir of the trap. The developed length between the trap of a water-closet or similar fixture and its vent shall not exceed (3' 6") three feet 6 inches.

Sec. 93.1103 - Industrial Interceptors and Separators

(a) When required: Interceptors (including grease, oil and sand interceptors, etc.) shall be provided when, in the judgment of the Department having jurisdiction, they are necessary for the proper handling of liquid wastes containing grease, flammable wastes, sand, solids, acid or alkaline substances or other ingredients harmful to the building drainage

Sec. 93.1103 - Industrial Interceptors and Separators - (Continued)  
system, the public or private sewer, or to public or private sewage disposal.

(b) Approval: The size, type, and location of each interceptor or separator shall be approved by the Department having jurisdiction in accordance with its standards and, except where otherwise specifically permitted by the Department having jurisdiction, no wastes other than those requiring treatment or separation shall be discharged into any interceptor.

(c) Seal: Sand and similar interceptors for heavy solids shall be so designed and located as to be readily accessible for cleaning, and shall have a water seal of not less than six (6") inches.

(d) Relief Vent: Interceptors shall be so designed that they will not become air bound if closed covers are used. Each interceptor shall be properly vented.

(e) Location: Each interceptor shall be so installed as to provide ready accessibility to the cover and means for servicing and maintaining the interceptor in working and operating condition. The use of ladders or the removal of bulky equipment in order to service interceptors shall constitute a violation of accessibility. Location of all interceptors shall be shown on the approved building plan.

(f) Sand Traps: 1. Permitted location: Sand traps may be installed only where cars, vehicles or equipment are washed commercially, and/or where in the opinion of the Director such traps may be necessary to provide against mud, dirt, grease or similar materials entering the plumbing or drainage system.

2. Size of Box: Sand traps shall be not less than twelve (12") inches deep, measuring from the crown weir to the finished bottom of the trap. The trap shall be not less than twenty four (24") inches square and shall be constructed of concrete or other approved material.

3. Size of Waste Line: The waste line of a sand trap shall be not less than four (4") inches inside diameter. The trap seal shall be formed in an approved manner with cast iron fittings and caulked joints, ~~and to comply with Section 34 of this Code.~~ The fittings shall be arranged so

Sec. 93.1103 - Industrial Interceptors and Separators (Continued)

as to provide a maximum of space for cleaning inside the trap.

4. Clean Out for Trap: A four (4") inch clean out shall be provided, immediately outside the trap, on the 4" waste line; said clean out shall extend either one (1") inch above the finished floor or be recessed in the floor, as required in Section ~~93.0806~~<sup>93.0806</sup> of this Code.

5. Distance for Vent: Vent pipes for sand traps shall be installed to provide not more than ten (10') feet between the vent pipe and the trap.

6. Horizontal Vent Size: All horizontal vent pipes for sand traps shall be four (4") inches cast iron pipe. Vertical vents shall be not less than two (2") inch pipe.

Sec. 93.1104 - Slaughter Houses, Packing Establishments, etc.

Every fish, fowl and animal slaughter house or establishment; every fish, fowl and meat packing or curing establishment; and every soap factory, tallow rendering, fat rendering and hide curing establishment; or any other establishment from which considerable amounts of grease are likely to be discharged into any plumbing system, sewer system, or private sewage disposal system, shall be connected to and shall drain or discharge into a grease interceptor of a design approved by the Department having jurisdiction.

Sec. 93.1105 - Minimum Requirements for Auto Wash Rack

Every private or public wash rack and/or floor or slab used for cleaning machine or machine parts shall be adequately protected against storm or surface water and shall drain or discharge into a sand and grease interceptor of a design approved by the Department having jurisdiction.

Sec. 93.1106 - Grease Interceptors

(a) An approved type grease interceptor complying with the provisions of this section shall be installed in the waste line leading from sinks, drains and other fixtures or equipment in establishments when such interceptors are installed and waste pretreatment is required. A grease interceptor is not required for individual dwelling units or for any private living quarters.

Sec. 93.1106 -- Grease Interceptors (Continued)

(b) Plans shall be submitted to the Department having jurisdiction and approval obtained prior to the installation of any plumbing system or part thereof designed to receive the wastes from any food establishment as set forth in sub-section (a) of this section.

(c) No grease interceptor shall be installed which has an approved rate of flow of less than twenty (20) gallons per minute and each plumbing fixture or piece of equipment connected to any grease interceptor shall be provided with an approved type flow control or restricting device installed in a readily accessible and visible location in the tail piece or drain outlet of each such fixture. Flow control devices shall be so designed that the total flow through such device or devices shall at no time be greater than the rated capacity of the interceptor. No flow control device having adjustable or removable parts shall be approved.

(d) Each grease interceptor when installed shall have an approved rate of flow which is not less than that given in the following table for the total number and size of fixtures connected thereto and/or discharging thereinto, and the total capacity in gallons of fixtures discharging into any such interceptor shall not exceed two and one half ( $2\frac{1}{2}$ ) times the certified g.p.m. flow rate of the subject interceptor, to wit:

<u>Total Number of Fixtures</u>	<u>Maximum capacity of fixtures connected Gallons</u>	<u>Required Rate of flow per minute Gallons</u>	<u>Grease Retention Capacity Pounds</u>
1	50	20	40
2	65	25	50
3	90	35	70
4	125	50	100

Provided, however, that any grease interceptor installed and/or located in such a manner that the inlet thereto is more than four (4') feet lower in elevation than the outlet of any fixture discharging into such interceptor, shall have an approved rate of flow which is not less than fifty (50%) per cent greater than that given in the foregoing table. Not to exceed four (4) separate fixtures shall be connected to and/or discharged into any one (1) grease interceptor.

For the purpose of this section, the term "Fixture" shall mean and include each plumbing fixture, appliance, apparatus and/or equipment required to be connected to and/or discharged into a grease interceptor by any provision of this section.

(e) Each grease interceptor shall be vented as required elsewhere in this code and each fixture discharging into a grease interceptor shall be individually trapped and vented in an approved manner except that an approved type grease interceptor may be used as a fixture trap for a single fixture when the horizontal distance between the fixture outlet and the grease interceptor does not exceed four (4') feet and the vertical tail pipe or drain does not exceed two and one-half (2½') feet.

(f) Each grease interceptor shall be so installed and connected that it shall be at all times easily accessible for inspection, cleaning, and for removal of the intercepted grease.

(g) Interceptors shall be maintained in efficient operating condition by periodic removal of the accumulated grease. No such collected grease shall be introduced into any drainage piping, public or private sewer.

(h) Each grease interceptor shall be constructed of durable materials satisfactory to the Administrative Authority and shall have a full size gas tight cover which can be easily and readily removed.

(i) No water jacketed grease interceptor shall be approved or installed.

(j) Each grease interceptor shall have an approved water seal of not less than two (2") inches in depth or the diameter of its outlet, whichever is the greater.

(k) No grease interceptor, when installed in compliance with this ordinance, shall be installed until the type or model of each size thereof has been subjected to, and has fully complied with the test specified therefor by the Department having jurisdiction, and has been approved by same.

(l) The Department having jurisdiction shall require such tests as they may deem necessary to determine the grease collecting efficiency of various types and kinds of grease interceptors to establish the rate of flow or other rating thereof. Such test requirements may be revised or

Sec. 93.1106 - Grease Interceptors (Continued)

modified from time to time as may be deemed necessary by said Department. A list of approved interceptors shall be kept on file in the office of the said Department.

(m) No grease interceptor shall be hereafter installed which does not comply in all respects with the type or model of each size thereof approved by the Department having jurisdiction. Whenever it shall come to the attention of said Department that any grease interceptor does not so comply, said Department is hereby granted the power and authority to immediately suspend or revoke such approval.

Sec. 93.1107 - Food Waste Prohibited

No food waste disposal unit shall be connected to or discharge into any interceptor.

SECTION 14. That Division 12 of Article 3 of Chapter IX of the San Diego Municipal Code be and the same is hereby amended to read as follows:

DIVISION 12

JOINTS AND CONNECTIONS

Sec. 93.1201 - Tightness

Joints and connections in the plumbing system shall be gas-tight and water-tight for the pressures required by test.

Sec. 93.1202 - Types of Joints

(a) Caulked Joints: Caulked joints for cast-iron bell-and-spigot soil pipe shall be firmly packed with oakum or hemp and filled with molten lead of standard width to a depth of not less than one (1") inch and not to extend more than one-eighth inch below rim of hub. No paint, varnish, or other coatings shall be permitted on the joining material until after the joint has been tested and approved.

(b) Threaded joints.-screwed joints.- Threads shall conform to American National Taper Pipe thread, ASA B2. 1-1945 or FS GGG-P-351a. All burrs shall be removed. Pipe ends shall be reamed or filed out to size of bore, and all chips shall be removed. Pipe-joint compound shall be used only on male threads. Pipe joint compound shall be insoluble in water and all such compound used on water piping shall be non-toxic.

Sec. 93.1202 - Types of Joints (Continued)

Cleanout plugs and caps shall be lubricated with water insoluble non-hardening compound.

(c) Wiped joints.- Joints in lead pipe or fittings, or between lead pipe or fittings and brass or copper pipe, ferrules, solder nipples, or traps, shall be full-wiped joints. Wiped joints shall have an exposed surface on each side of a joint not less than three-fourths inch and at least as thick as the material being jointed. Wall or floor flange lead-wiped joints shall be made by using a lead ring or flange placed behind the joint at wall or floor. Joints between lead pipe and cast iron, steel or wrought iron shall be made by means of a caulking ferrule or soldering nipple.

(d) Soldered or sweat joints.- Soldered or sweat joints for tubing shall be made with approved fittings. Surfaces to be soldered or sweated shall be cleaned bright. The joints shall be properly fluxed with non-corrosive flux and made with approved solder.

Tubing traps shall be connected to their fixture drains by means of an approved metal to metal joint and a hexagon brass solder bushing.

(e) Burned lead joints. Burned (welded) lead joints shall be lapped and the lead shall be fused together to form a uniform weld at least as thick as the lead being joined.

Sec. 93.1203 - Use of Joints

(a) Clay Sewer pipe.- Joints in vitrified clay pipe or between such pipe and metal pipe shall be made with approved mechanical joints.

(b) Cast-iron pipe.- Joints in cast-iron pipe shall be either caulked or screwed, as provided in subsection (a) and (b) of Section 93.1202.

(c) Screw pipe to cast-iron.- Joints between wrought-iron, steel, brass, or copper pipe, and cast-iron pipe shall be either caulked or threaded joints made as provided in subsections (a) and (b) of Section 93.1202 or shall be made with approved adapter fittings.

(d) Lead to cast iron, wrought-iron or steel. Joints between lead and cast-iron, wrought iron, or steel pipe shall be made by means of

Sec. 93.1203 - Use of Joints (Continued)

wiped joints to a caulking ferrule, soldering nipple, or bushing as provided in subsection (c) of Section 93.1202.

Sec. 93.1204 - Special Joints

(a) Copper tubing to screwed pipe joints.-- Joints from copper tubing to threaded pipe or cast iron soil pipe shall be made by the use of brass adapter fittings. The joint between the copper tubing and the fitting shall be properly sweated or soldered, and the connection between the threaded pipe and the fitting shall be made with a standard pipe size screw joint. Joints between cast iron soil pipe and copper tubing shall be made as provided in Section 93.1202 (a).

(b) Brazing or welding. Brazing or welding shall be performed in accordance with requirements of recognized published standards of practice.

(c) Slip joints. In drainage work slip joints may be used only on the inlet side of the trap.

(d) Expansion joints. Approved expansion joints shall be accessible and may be used where necessary to provide for expansion and contraction of the pipes.

(e) Unions.-- Approved screw type ground joint metal to metal seat unions may be used in drainage work when accessibly located in the trap seal, or between a fixture and its trap and in the vent system except underground or in wet vents.

(f) Ground joint brass connections. Ground joint brass connections which allow adjustment of water tubing but provides a rigid joint when made up shall not be considered as slip joints.

Sec. 93.1205 - Flanged Fixture Connections

(a) Fixture connections between drainage pipes and water closets, floor outlet service sinks, pedestal urinals, and earthen ware trap standards, shall be made by means of approved brass, or iron flanges, caulked, or soldered to the drainage pipe. The connection shall be bolted, with an approved gasket, washer, or setting compound between the earthenware and the connection. The floor flange shall be set on an approved firm base.

(b) Closet bends or stubs must be cut off so as to present a smooth surface even with the top of the closet ring before rough inspection is called.

Sec. 93.1206 - Prohibited Joints and Connections

(a) Drainage system. Any fitting or connection which has an enlargement chamber or recess with a ledge, shoulder, or reduction of pipe area, that offers an obstruction to flow through the drain, is prohibited.

(b) No fitting or connection that offers abnormal obstruction to flow, shall be used. The enlargement of a three (3") inch closet bend or stub to four (4") inches shall not be considered an obstruction.

Sec. 93.1207 - Waterproofing of Openings

Joints at the roof, around pipes, ducts or other appurtenances shall be provided by the use of lead, copper, galvanized iron, or other approved flashings or flashing material. Exterior wall openings shall be made watertight.

Sec. 93.1208 - Increasers and Reducers

Where different sizes of pipes, or pipes and fittings are to be connected, the proper size increasers or reducers or reducing fittings shall be used between the two sizes.

SECTION 15. That Division 13 of Article 3 of Chapter IX of the San Diego Municipal Code be and the same is hereby amended to read as follows:

DIVISION 13

General Requirements - Fixtures and Materials

Sec. 93.1301 - Quality of Fixtures

Plumbing fixtures shall have smooth impervious surfaces, be free from defects and concealed fouling surfaces, and, except as permitted elsewhere in this Code, shall conform in quality and design to one of the following standards:

CS 4-29.

Staple Vitreous China Plumbing Fixtures, NBS Commercial Standard

CS-20-49.

Enameled Cast-Iron Plumbing Fixtures, NBS Commercial Standard CS 77-51.

Sec. 93.1301 - Quality of Fixtures (Continued)

Earthenware (vitreous glazed) Plumbing Fixtures, NBS Commercial Standard CS 111-43

Plumbing Fixtures (for) Land Use, F.X. WW-P-541a-1947.

Formed Steel Enameled Sanitary Ware, F.X. WW-P-542a-1950.

Formed Metal Porcelain Enameled Sanitary Ware, NBS Commercial Standard CS 144-47.

Drinking Fountains, A.S.A. Z 4.2-1942.

Sec. 93.1302 - Alternate Materials

Sinks and special-use fixtures may be made of soapstone, chemical stoneware, or may be lined with lead, copper-base alloy, nickel-copper alloy, corrosion-resisting steel, or other materials especially suited to the use for which the fixture is intended.

Special use restaurant and other sinks may be made of approved type galvanized and bonderized sheet steel of not less than No. 16 U.S. gauge. The minimum thickness of any stainless steel plumbing fixture shall be No. 20 U.S. gauge. All sheet metal plumbing fixtures shall be adequately designed, constructed and braced in an approved manner to prevent flexing or buckling.

Sec. 93.1303 - Overflows

When any fixture is provided with an overflow, the waste shall be so arranged that the standing water in the fixture cannot rise in the overflow when the stopper is closed or remain in the overflow when the fixture is empty. The overflow pipe from a fixture shall be connected on the house or inlet side of the fixture trap, except that overflows on flush tanks may discharge into the water closets or urinals served by them, but it shall be unlawful to connect such overflows with any other part of the drainage system.

Sec. 93.1304 - Drinking Fountains

Bubblers and other approved drinking fountain supply connections may be installed in connection with, and above the flood rim of, any sink or similar fixture meeting the requirements of this Division and installed

Sec. 93.1304 - Drinking Fountains (Continued)

or converted to be used only as a drinking fountain. Supply orifices shall be protected from contact with the mouth.

Sec. 93.1305 - Strainers and Connections

(a) Strainers - All plumbing fixtures, other than water closets and syphon action washdown or blowout urinals, shall be provided with approved strainers having an approved waterway area.

(b) Continuous wastes and fixture tail pieces shall be constructed from the materials specified in Sec. 93.0801 for drainage piping, provided, however, that such connections where exposed or accessible may be of seamless drawn brass not less than No. 20 B&S gauge. .032" in thickness. Each such tail piece, or continuous waste shall not be less than one and one half (1 1/2") inches O.D. for sinks, dishwashers, laundry tubs, bath tubs, and urinals and similar fixtures, and not less than one and one-quarter (1 1/4") inches for lavatories, drinking fountains and similar small fixtures. Waste and over flow for bath tubs shall be not less than 1 3/8" O.D. 20 gauge seamless drawn brass tubing.

(c) Approved "Wye" or other directional type branch fittings may be installed in all continuous wastes connecting or receiving the discharge from food waste disposal units, dishwashers, clotheswashers or other force discharge fixture or appliances.

Sec. 93.1306 - Prohibited Fixtures

(a) Pan, valve, plunger, offset, washout, latrine, frostproof, and other water closets having an invisible seal or an unventilated space or having walls which are not thoroughly washed at each discharge, are prohibited. Any water closet which would permit siphonage of the contents of the bowl back into the potable water supply is prohibited.

(b) Fixed wooden wash trays or sinks, for domestic use, shall not be installed or maintained in any building designed or used for human habitation, unless first approved by the Department of Public Health.

Sec. 93.1307 - Special Fixture and Specialties

(a) Water and Drain Connections - Baptastries, ornamental and lily pools, aquaria, ornamental fountain basins, and similar constructions when provided with water supplies shall be protected from back-siphonage.

Sec. 93.1307 - Special Fixture and Specialties (Continued)

(b) Approval.- Specialties requiring water and waste connections shall be submitted for approval of the Administrative Authority.

Sec. 93.1308 - Installation

(a) Cleaning.- Plumbing fixtures shall be installed in a manner to afford easy access for repairs and cleaning. Where practical, all pipes from fixtures shall be run to the nearest wall.

(b) Joints.- Where fixture comes in contact with wall and floors, the joint shall be watertight.

(c) Securing fixtures.- Floor outlet fixtures shall be rigidly secured to the floor by approved brass or other approved corrosion resistant screws or bolts.

(d) Wall-hung fixtures.- Wall-hung fixtures shall be rigidly supported by metal supporting members so that no strain is transmitted to the connections. Flush tanks and similar appurtenances shall be secured by approved non-corrosive screws or bolts.

(e) Setting.- Fixtures shall be set level and in proper alignment with reference to adjacent walls.

(f) Supply fittings.- The supply lines or fittings for every plumbing fixture shall be so installed as to prevent backflow.

Sec. 93.1309 - Urinals

(a) Automatic flushing tank.- Tanks flushing more than one urinal shall be automatic in operation and of sufficient capacity to provide the necessary volume to flush and properly cleanse all urinals simultaneously.

(b) Automatic Flush Valves.- No flushometer valve shall be used to flush more than one urinal and each urinal flush valve shall be of an approved self-closing type.

(c) Trough urinals.- Trough urinals shall have strainers with outlets at least one and one-half ( $1\frac{1}{2}$ ) inches in diameter. The washdown pipe shall be perforated so as to flush with an even curtain of water against the back of the urinal. This pipe shall be of approved type brass, and shall be securely clamped as high as practicable to the back

Sec. 93.1309 - Urinals (Continued)

of the urinal. Trough urinals greater than twenty-four (24") inches in length shall be equipped with tanks having a flushing capacity of not less than one and one-half (1½) gallons of water for each two feet of urinal length.

2. Equivalent length.- Trough urinals shall be figured on the basis of one urinal for each 18 inches of length, provided that --

24-inch trough equals 1 urinal.

36-inch trough equals 2 urinals.

48-inch trough equals 2 urinals.

60-inch trough equals 3 urinals.

72-inch trough equals 4 urinals.

(d) Floor-type Urinals.- Floor-type trough urinals are prohibited.

Sec. 93.1310 - Drinking Fountains

Drinking fountains may waste, by means of an indirect waste pipe, into a floor sink.

Sec. 93.1311 - Floor Drains and Shower Stalls

Floor Drain Requirement: (a) Floor drains and shower drains shall be considered plumbing fixtures and each such drain shall be provided with an approved type strainer. Floor drains shall be suitably flanged to provide a water-tight joint in the floor.

(b) Each shower receptor shall be an approved type and be so constructed as to have a finished dam, curb or threshold which is at least one (1") inch lower than the sides and back of such receptor. In no case shall any shower receptor be less than two (2") inches or more than nine (9") inches in depth measured from the top of the finished threshold.

(c) No shower stall or receptor shall have any interior dimension which is less than thirty (30") inches, nor shall it have a floor area of less than nine hundred (900) square inches. On-site construction of a built-up shower receptor shall be permitted when one of the following means is employed:

1. Receptors built directly on the ground: Shower receptors built directly on the ground shall be watertight and shall be constructed from approved type dense, non-absorbent and non-corrosive

Sec. 93.1311 - Floor Drains and Shower Stalls (Continued)

materials. Each such receptor shall be adequately reinforced, shall be provided with a suitably flanged floor drain designed to make a watertight joint in the floor, and shall have smooth, impervious and durable surfaces.

2. Receptors above ground: When shower receptors are built above ground, the sub-floor and rough side walls to a height of not less than three (3") inches above the top of the finished dam or threshold shall be first lined with sheet lead\* or copper\* or with three layers of fifteen (15) pound tar or asphalt roofing paper, each layer thoroughly mopped with hot asphalt, or shall be lined with such other durable and watertight materials as the Administrative Authority may deem equivalent to those aforementioned. All such lining materials shall extend upward on the rough jambs of the shower opening to a point not less than three (3") inches above the top of the finished dam or threshold and shall extend outward over the top of the rough threshold and be turned over and fastened on the outside face of both the rough threshold and the jambs.

All corners shall be made thoroughly waterproof by lapping and flashing. Linings shall be properly recessed and fastened to approved backing so as not to occupy the space required for the wall covering and shall not be nailed or perforated at any point which will be less than one (1") inch above the finished dam or threshold. An approved type sub-drain shall be installed with every such shower safe pan or lining. Each such drain shall be of the type that sets flush with the sub floor and shall be equipped with a clamping ring or other device to make a tight connection between the shower stall lining and sub drain. The drain shall have weep holes into the waste line.

\*Lead and copper pans shall be insulated from all conducting substances other than their connecting drain by fifteen (15) pound asphalt felt or its equivalent and no lead pan shall be constructed of material weighing less than four (4) pounds per square foot. Copper pans shall be at least No.24 B&S gauge. Joints in lead

Sec. 93.1311 - Floor Drains and Shower Stalls (Continued)

pans and copper pans shall not be soldered but shall be burned or silver brazed respectively.

(d) Shower pans or receptors are not plumbing fixtures and the requirements of this section are installation requirements when such pans or receptors are elsewhere required by State or Municipal laws.

(e) Hinged shower doors shall open outward.

Sec. 93.1312 - Sink Combination Connections

(a) Combination Sink: A three-compartment sink may be connected to one trap when such trap is centrally located.

(b) Double Connections: Two kitchen sinks or two laundry tubs, or two basins located respectively, in the same room, may be connected to one trap if their waste openings from center to center, are not more than thirty (30") inches apart.

(c) Sink-Tray Combination: One tray-sink combination may be installed on one trap, if one compartment is not more than six (6") inches deeper than the other and their waste outlets are not more than thirty (30") inches apart.

(d) Sink and Laundry Tray: A sink trap shall not serve, in connection with either a laundry tray or a clothes washer.

(e) Clothes washer and Tray: One clothes washer may discharge into the trap of an adjacent laundry tray providing that said connection is made on the inlet side of the trap above the water seal.

DIVISION 14

HOUSE SEWERS AND PRIVATE  
SEWAGE DISPOSAL SYSTEMS

Sec. 93.1401 - Sewer Required

(a) Every building in which plumbing fixtures are installed and every premises having drainage piping thereon shall have a connection to a public approved or private sewage disposal system.

(b) When no public sewer, intended to serve any lot or premises, is available in any thoroughfare or right of way abutting such lot or premises, drainage pipe from any building or works shall be connected to an approved private sewage disposal system.

(c) The rearrangement or subdivision into smaller parcels of a lot which abuts and is served by a public sewer shall not be deemed cause to permit the construction of a private sewage disposal system, and all plumbing or drainage systems on any such smaller parcel or parcels shall connect to the public sewer when **available**.

(d) On every lot or premises hereafter connected to a public sewer, all plumbing and drainage systems or part thereof on such lot or premises shall be connected to such public sewer.

Sec. 93.1402 - Damage to Public Sewer or Private  
Sewage Disposal System

(a) It shall be unlawful for any person to deposit, by any means whatsoever, into any plumbing fixture, floor drain, interceptor, sump, receptacle or device which is connected to any drainage system, public sewer, private sewer, septic tank, or cesspool any ashes, cinders, solids, rags, inflammable, poisonous or explosive liquids or gases, oil, grease or any other thing whatsoever which would, or could cause damage to the public sewer, private sewer or private sewage disposal system.

(b) No rain, surface or subsurface water shall be connected to or discharge into any drainage system.

(c) No cesspool, septic tank, seepage pit, or drainfield shall be connected to any public sewer or to any house sewer leading to such public sewer.

Sec. 93.1402 - Damage to Public Sewer or Private Sewage Disposal System  
(Continued)

(d) No commercial food waste grinder shall be connected to a private sewage disposal system unless permission has first been obtained from the Health Officer or other Department having jurisdiction.

Sec. 93.1403 - House Sewer Materials

(a) The house sewer, beginning three (3') feet from any building or structure, shall be of cast iron soil pipe or vitrified clay.

(b) Joining methods and materials shall be as prescribed in Division 8 of this Code.

Sec. 93.1404 - Markings

All pipe, brick, block, prefabricated septic tanks, prefabricated septic tank or seepage pit covers or other parts of appurtenances incidental to the installation of house sewers or private sewage disposal systems shall conform to the approval requirements of Division 7 of this Code and shall be marked and identified in a manner satisfactory to the Director of Building Inspection.

Sec. 93.1405 - Size of House Sewers

The size of any house sewer shall be determined on the basis of the total number of fixture units drained by such sewer, in accordance with Table No. 3, provided however that the minimum size of the house sewer shall be three (3") inches inside diameter.

Sec. 93.1406 - Grade, Support and Protection of House Sewers

(a) House sewers shall be run in practical alinement and at a uniform slope of not less than one-fourth ( $1/4$ ") of an inch per foot, provided, however, that any such pipe or piping four (4") inches or larger may have a slope of not less than one-eighth ( $1/8$ ") of an inch per foot when approved by the Director of Building Inspection.

(b) House sewer piping shall be laid on a firm bed through its entire length, and any such piping laid in made or filled-in ground shall be laid on a bed of approved materials and shall be adequately supported to the satisfaction of the Director of Building Inspection.

Sec. 93.1406 - Grade, Support and Protection of House Sewers (Continued)

Vitrified clay pipe and fittings shall be laid to a true line and an even grade on a firm foundation, with suitable excavation to receive the socket, so as to provide uniform bearing along the entire length of the barrel of the pipe. Pipe laying shall start at the lowest point and proceed up grade with socket pointing up grade.

All vitrified clay pipe house sewers shall have a minimum depth below finish grade of at least 18" except when protected with concrete.

(c) No house sewer or other drainage piping or part thereof which is constructed of materials other than those approved for use under or within a building shall be installed under or within three (3') feet of any building or structure or part thereof, nor less than one (1') foot below the surface of the ground. The provisions of this subsection include structures such as porches and steps, whether covered or uncovered.

Sec. 93.1407 - Cleanouts

Cleanouts in house sewers shall be installed as required in Section 93.0806.

Sec. 93.1408 - Sewer and Water Pipes

Water service pipes, or any underground water pipes, shall not be run or laid in the same trench with any building drain or building sewer.

Sec. 93.1409 - Drawings and Specifications

When unusual site conditions exist, the Director of Building Inspection may require any or all of the following information before a permit is issued for a house sewer or at any time during the construction thereof.

(a) Plot plan drawn to scale completely dimensioned, showing direction and approximate slope of surface, location of all present or proposed retaining walls, drainage channels, water supply lines or well, paved areas and structures on the plot, number of bedrooms or plumbing fixtures in each structure and location of the house sewer.

(b) Details of construction necessary to assure compliance with

Sec. 93.1409 - Drawings and Specifications (Continued)

the requirements of this Code together with a full description of the complete installation including quality, kind and grade of all materials, equipment, construction workmanship and methods of assembly and installation.

Sec. 93.1410 - Location

Except where proper legal easement is obtained and plans are approved by the Director of Building Inspection, no house sewer or parts thereof shall be located in any lot other than the lot which is the site of the building or structure served by such house sewer, except as provided by section 93.0612.

SECTION 18. That Article 3 Chapter IX of the San Diego Municipal Code be and the same is hereby amended by adding thereto a new Division to be known as and numbered Division 16 and to read as follows:

. DIVISION 16

Trailer Park Plumbing Standards

Sec. 93.1601 - General

Plans and Specifications: Before any plumbing or sewage disposal facilities are installed or altered in any trailer park, duplicate plans and specifications shall be filed and proper permits obtained from the Department or Departments having jurisdiction. Plans shall show in detail:

(1) Plot plan of the park drawn to scale, indicating elevations, property lines, driveways, existing or proposed buildings, and the sizes of trailer sites.

(2) Complete specification and piping layout of proposed plumbing system or alteration.

(3) Complete specification and layout of proposed sewage disposal system or alteration.

Sec. 93.1602 - Construction

(a) Trailer park plumbing and drainage systems shall be designed and installed in accordance with the requirements of the plumbing code and shall in addition conform to all applicable provisions of the

Municipal Code and State regulations.

(b) Wet vented trailer park drainage systems are similar in principle to the foregoing. It is provided, however, that a three (3") inch trap serving a house trailer may have a three (3") inch tailpiece when the horizontal trap branch does not exceed six (6') feet in length, if three (3") inches in diameter, or fifteen (15') feet if four (4") inches in diameter.

(c) Materials shall conform to the approved standards set forth in the plumbing code.

(d) Cleanouts shall be provided as required by Sec. 93.0806 of the plumbing code except that outdoor cleanouts may be spaced at intervals of not to exceed one hundred (100') feet. All cleanouts (except sewer cleanouts) shall be approved type brass plugs accessible at or above grade. All parts of any cleanout extension shall be cast iron pipe terminating at a protected location below access covers or in concrete pads. Cleanouts in the house sewer shall conform to the requirements of Sec. 93.0806 of the plumbing code.

(e) Each trailer site shall be provided with a 3" I.P.S. male or female threaded connection extending above the surrounding grade from a 3" minimum size vented cast iron soil P-trap. Each such connection shall be located within five (5') feet of the left boundary line of the trailer site (road side or trailer) and at least three (3') feet but not to exceed fifteen (15') feet from the rear boundary line. This location may be varied when unusual conditions are encountered. Each trap inlet connection shall be protected at grade with a metal casing or shall be encased in a concrete pad measuring not less than four (4") inches in thickness and eighteen (18") square. No trap shall be more than twenty-four (24") inches below grade. Each trap inlet connection shall be effectively capped with a screw type plug or cap when not in use.

(f) All traps, tail pipes, vertical vents, the upper five (5') feet of any horizontal vent and the first five (5') feet of any trap branch shall be fabricated from materials approved for use within a

Sec. 93.1602 - Construction (Continued)

building, provided however that approved type non-metallic pipe may be used for the balance of the system when not under any building.

(g) Drainage systems may be wet vented when each such system conforms to the rules set forth in Sec. 93.1014, and to the requirements herein contained.

(h) The drainage system of a utility or other building shall not discharge into a wet vented line. No house sewer shall discharge into a wet vented line.

(i) No house sewer or part thereof shall function as a wet vent.

(j) Each wet vented drainage system shall be provided with a vent not more than fifteen (15') feet downstream from its upper trap and long mains shall be provided with additional relief vents at intervals of not more than one hundred (100') feet thereafter. Each vent serving a wet vented system shall equal approximately one-half of the cross-sectional area of the drain served.

(k) Vents shall be installed as provided in Division 9 of the plumbing code and outdoor vents shall be securely fastened to a 4 x 4 minimum redwood post or have equivalent support. Galvanized iron vents may be anchored in a substantial concrete base and the 4 x 4 post eliminated providing that the concrete extends not less than twelve (12") inches above the junction with the cast iron pipe or fitting. Galvanized steel vent pipe may extend below ground vertically and may directly intersect a drainage line if the entire section around both the drain and the galvanized pipe is encased in concrete to prevent any movement. Galvanized steel pipe encased in concrete shall be first coated with bituminous paint or equivalent protective material.

(l) For the purpose of determining pipe sizes each trailer site connection shall be assigned a waste loading value of six (6) fixture units and each trailer park drainage system shall be sized as provided in Table I hereof.

TABLE I

Minimum pipe size for drainage systems shall be as set forth in the table below:

Sec. 93.1602 - Construction (Continued)

<u>Max. No. of trailers individually vented systems</u>	<u>Max. No. of trailers wet vented system</u>	<u>Size of Drain</u>
2	1	3"*
30	10	4"
100	50	6"
400	**	8"
1000	**	10"

\* The maximum length of any three (3") inch trap branch is six (6') feet from its vent.

\*\* Will require special design.

Sec. 93.1603 - Water Distributing System

(a) Each trailer park water distributing system shall conform to the requirements of Division 14 of the plumbing code and shall be so designed and maintained as to provide a pressure of not less than 20 P.S.I. at each trailer site under normal operating conditions.

(b) Each trailer site branch water supply connections shall be not less than one-half (1/2") inch in diameter and shall be assigned a supply demand of five (5) fixture units.

(c) An approved backflow preventer shall be installed on the water supply branch to each trailer at, or near, the trailer connection. Such devices shall be at least twelve (12") inches above surrounding grade.

(d) An approved pressure relief valve shall be installed immediately on the discharge side of each backflow preventive device required by subsection (c) of this section. Each such pressure relief valve shall be equipped with a full size drain extending downward to a point not less than three (3") inches or more than six (6") inches above the surrounding ground level. No shut-off valve shall be installed between any such pressure relief valve and the trailer it serves.

(e) A shut-off valve shall be installed on the water supply branch immediately upstream from the backflow preventive device.

Water supply piping shall not be laid or run in the same trench with drainage piping.

Sec. 93.1604 - Testing

Installations shall be tested and inspected as required by the plumbing code except that non-metallic pipe shall be subjected to a

Sec. 93.1604 - Testing (Continued)

pressure test of not less than a five (5') foot head of water.

Sec. 93.1605 - Responsibility and Maintenance

Violations - Operators' Responsibility. When it is evident that there exists, or may exist, a violation of any pertinent regulation, the owner, operator, lessee, person in charge of the park or any other person causing a violation shall immediately disconnect the trailer water supply and sewer connection from the park systems and shall employ such other corrective measures as may be ordered by the appropriate enforcement agency.

Maintenance. All required devices or safeguards shall be maintained in good working order. The owner, operator or lessee of the trailer park or his designated agent shall be responsible for their maintenance.

SECTION 19. That Article 3, Chapter IX, of the San Diego Municipal Code, be, and the same is hereby amended by adding thereto a new division to be known as and numbered Division 17, and to read as follows:

Sec. 93.1701 - Application for Permit: Fee.

Any person desiring to install, construct or reconstruct a septic tank, settling tank, cesspool or other subsurface sewage disposal unit or system shall file with the Director a written application for a permit for such installation, construction or reconstruction. A separate application and permit for each installation shall be required. The application shall contain the following information and such other information as the Director may require.

Street name and number of the premises where the installation is to be made; the name and address of the owner; the name and address of the contractor who is to perform the work; the size and type of the septic tank, settling tank, cesspool or other subsurface sewage disposal

unit or system to be installed and the number of people it is to serve. The application shall include or be accompanied by a plan or diagram showing the character and kind of installation to be made and the manner and location in which the work is to be done.

Sec. 93.1702 - Change of Location of Work by Supplemental Permit

A permittee to whom there has been issued pursuant to this article a permit for an installation to be made at a particular location may apply for a supplemental permit authorizing such work to be performed at a different location provided that no work has been commenced at the location specified in the original permit. The application for a supplemental permit shall be made on a form prescribed and furnished by the Director. On receipt of such application and a fee of \$3.00 the Director may issue a supplemental permit authorizing the performance of work at the substituted location.

Sec. 93.1703 - Reinspections: Fee.

When an inspection has been ordered and the work is found to be not ready for inspection and approval, the Director shall cause an official notice to be posted on the job stating the changes necessary in order that the work will comply with the requirements of this ordinance. As soon thereafter as practicable, the owner or contractor shall cause the changes to be made and upon completion thereof shall notify the Department that the unit or system is ready for reinspection. As soon thereafter as practicable, the Director shall make or cause a reinspection to be made. If, upon reinspection, the work is approved, a certificate to that effect shall be posted as hereinabove specified. The fee for each reinspection shall be \$5.00, which fee shall be paid to the Director."

**ORDINANCE NO. 7366**  
(NEW SERIES)

**ORDINANCE OF THE CITY OF SAN DIEGO, CALIFORNIA, ORDERING, CALLING, PROVIDING FOR AND GIVING NOTICE OF A SPECIAL MUNICIPAL ELECTION TO BE HELD IN SAID CITY ON WEDNESDAY, APRIL 16, 1957, FOR THE PURPOSE OF SUBMITTING TO THE QUALIFIED VOTERS OF SAID CITY A PROPOSITION TO INCUR BONDED INDEBTEDNESS IN SAID CITY FOR A CERTAIN MUNICIPAL IMPROVEMENT, AND CONSOLIDATING SAID SPECIAL MUNICIPAL ELECTION WITH THE MUNICIPAL GENERAL ELECTION TO BE HELD ON SAID DATE.**

WHEREAS, the Council of the City of San Diego, California, on the 26th day of February, 1957, by a vote of less than five of the members thereof, adopted Resolution No. 137973, and "A resolution of the Council of the City of San Diego, California, mandating that the public interest necessarily demand the acquisition, construction of a certain municipal improvement, and making findings relating thereto", which said resolution was duly passed and signed and attested on said 26th day of February, 1957.

AND WHEREFORE, the Council of the City of San Diego, California, as follows: Section 1. That a special municipal election be held, and the same is hereby called and ordered to be held, in the City of San Diego, California, on the 16th day of April, 1957, for the purpose of submitting to the qualified voters of said city a proposition recurring bonded indebtedness and for the amount hereinafter set forth for the object and purpose set forth in said resolution and herein stated.

Section 2. That the object and purpose for which said indebtedness is incurred and bonds issued therefor are as follows:

The acquisition and construction of the City of San Diego of a certain municipal improvement, to wit: a civic theatre, with vehicle parking therefor, to be located within an area in Balboa Park, bounded on the west by Park Boulevard, on the north by Morley Field Drive, on the east by Florida Street, and on the south by Laurel Drive; said civic theatre to be used for operas, musical events, shows, pageants, public gatherings and other public uses, and to include radio and television facilities, movie projection booth, equipment, furniture and furnishings, and all incidental facilities necessary therefor, and for improvement to include the construction of public utilities, drains, sewers, walks, drives, and all other works, structures, and facilities necessary therefor.

Section 3. That the estimated cost of the municipal improvement described in Section 2 hereof is the sum of \$3,500,000 and that the amount of the principal of the indebtedness incurred therefor is the sum of \$2,000,000.

That the maximum rate of interest to be paid on said indebtedness shall not exceed five per cent (5%) per annum, payable annually for the first year and semiannually thereafter, that if the proposition for the incurring of bonded indebtedness so submitted receives the requisite number of votes, to wit, two-thirds of the votes of the qualified electors voting in said election, bonds of said city not exceeding the principal amount set forth in such proposition shall be issued and sold for the object and purpose set forth in said proposition, and the credit of the City of San Diego shall be pledged for the payment of said bonds and the interest thereon.

Section 4. That the polls for said election shall be opened at seven o'clock A.M. of the day of said election and shall remain open continuously from said time until seven o'clock P.M. of the same day, when the polls shall be closed, except as provided in Section 27.0731 of the Election Code of said City.

Section 5. That on the ballots to be used at said special municipal election, in addition to any other matter required by law, there shall be printed substantially the following: To vote on any measure, stamp a cross in the voting square after the word "Yes" or after the word "No". All marks, except the cross, are forbidden. All distinguishing marks or erasures are forbidden and make the ballot void. If you wrongly stamp, tear or face this ballot, return it to the inspector of election and obtain another.

**CITY OF SAN DIEGO CIVIC THEATRE BONDS:** Shall be a bonded indebtedness in the principal sum of \$3,500,000 for the acquisition and construction by said city of a certain municipal improvement, to wit: a civic theatre, with vehicle parking therefor, to be located within an area in Balboa Park, bounded on the west by Park

Balboa Park, on the north by Morley Field Drive, on the east by Florida Street, and on the south by Laurel Drive, said civic theatre to be used for operas, musical events, shows, pageants, public gatherings and other public uses, and to include radio and television facilities, movie projection booth, equipment, furniture and furnishings, and all incidental facilities necessary therefor, and for improvement to include the construction of public utilities, drains, sewers, walks, drives, and all other works, structures, and facilities necessary therefor.

Section 6. Absent Voter Ballots may be marked as provided in the Election Code of said City of San Diego. A cross (X) placed in the voting square after the word "Yes" in the manner provided by this ordinance shall be counted in favor of the adoption of said proposition. A cross (X) placed in the voting square after the word "No" in the manner provided by this ordinance shall be counted against the adoption of the proposition.

Section 7. That the special municipal election hereby called shall be and is hereby ordered consolidated with The City of San Diego general municipal election to be held on said date, and within The City of San Diego the precincts, polling places, voting booths and officers of election for the special municipal election hereby called shall be the same as those provided for said general municipal election, and such elections shall be held in all respects as if there were only one election, and only one ticket or ballot shall be used thereat.

The ordinance proclaiming said general municipal election and giving notice thereof is Ordinance No. 7354 (New Series), adopted February 28, 1957, and reference is hereby made to such ordinance for the precincts, polling places and officers of election provided for such municipal election. A list of the polling places and names of officers of election for such general municipal election is on file in the office of the City Clerk of The City of San Diego.

Section 8. That except as otherwise provided in this ordinance, the election called hereby shall be conducted as provided by law for other municipal elections in said city. Only qualified voters of The City of San Diego shall be permitted to vote at the election called by this ordinance.

Section 9. The City Clerk is hereby directed to cause sample ballots and polling place slips to be mailed to the registered qualified electors entitled to vote at the election called by this ordinance. Such mailing shall be in the manner and within the time provided by the Election Code of said City.

Section 10. That the City Clerk shall certify to the passage and adoption of this ordinance by the Council of said City by a vote of more than two-thirds of all of its members, and shall cause this ordinance to be published once a day for at least seven (7) days prior to the time appointed for the holding of said election in the city official newspaper, to wit: THE SAN DIEGO UNION, a newspaper printed and published seven days a week in said city. No notice of such election other than that herein provided need be given.

Section 11. This ordinance shall take effect immediately upon its passage.

**AN ORDINANCE AMENDING ARTICLE 3 CHAPTER IX OF THE SAN DIEGO MUNICIPAL CODE, RENUMBERING CERTAIN SECTIONS, REPEALING CERTAIN SECTIONS, AND REPEALING ORDINANCES NUMBERS 11648, 13797, 13415, 381 N.S., 1639 N.S., 2407 N.S., 2408 N.S., 3328 N.S., 3339 N.S., 4108 N.S., 4179 N.S., 4577 N.S., 4621 N.S., 4793 N.S., AND 4891 N.S., REGULATING PLUMBING INSTALLATIONS.**

BE IT ORDAINED By the Council of the City of San Diego, as follows: Section 1. That the title to Division 1, Article 3, Chapter IX of the San Diego Municipal Code be, and the same is hereby amended to read as follows:

**"ADMINISTRATION AND AUTHORITY"**  
Section 2. That Sections 93.0101 and 93.0102 and 93.0103 of the San Diego Municipal Code be, and the same are hereby amended to read as follows:

**SEC. 93.0101 STANDARDS FOR INSTALLATIONS AND MATERIALS**  
All installations and materials shall be in conformity with the provisions of this article and with approved standards of safety as to life and property. All installations on any public or private piers or on the tidelands shall be in conformity with the provisions of this article. The disposal of the effluent must meet with the approval of the Director of Public Health.

**SEC. 93.0102 DUTIES OF DIRECTOR OF BUILDING INSPECTION**  
It shall be the duty of the Director of Building Inspection to enforce the provisions of this code. He shall, upon application, grant permits for the installation or alteration of plumbing installations, devices, appliances, and equipment and shall make inspections of all new plumbing installations and re-inspection of all plumbing installations, all as provided in this Article. He shall keep complete records of all permits issued, inspections, and re-inspections made and other official work performed in accordance with the provisions of this Article.

**SEC. 93.0103 AUTHORITY OF DIRECTOR OF BUILDING INSPECTION**  
(a) The Director of Building Inspection shall have the right during reasonable hours or at any time when extreme danger exists to enter any building in the discharge of his official duties or for the purpose of making an inspection, re-inspection, or test of the plumbing installations, devices, fixtures, appliances, and equipment contained therein. The Director of Building Inspection shall have the authority to cut or disconnect any installations in cases of emergencies where necessary to safety of life or property or where such installations may interfere with the work of the Fire Department. The Director of Building Inspection is hereby authorized to disconnect or order discontinuance or removal of plumbing installations, fixtures, devices, appliances, or equipment found to be dangerous to life or property because they are defective or defectively installed.

(b) The Director of Building Inspection may delegate any of his powers or duties to any of his assistants.

Section 3. That Division 1, Article 3, Chapter IX of the San Diego Municipal Code be, and the same is hereby amended by adding thereto new sections to be known as, and numbered Sections 93.0104, 93.0105, 93.0106, 93.0107, 93.0108, 93.0109, 93.0110 and 93.0111, and to read as follows:

**SEC. 93.0104 BOARD OF PLUMBING EXAMINERS**

(a) In order to examine applicant for the Certificate of Competency, there shall be and is hereby created a Board of Plumber Examiners consisting of five (5) members who have qualified by experience and training to pass upon matters pertaining to plumbing installations. The Board shall consist of the Chief Plumbing Inspector, two licensed Plumbing Contractors, and two Journeyman Plumbers holding a valid Certificate of Competency. The Director of Building Inspection or his authorized deputy shall serve as secretary of the Board. The Board shall be appointed by the City Manager and shall hold office at his pleasure. All members of the Board shall serve without pay.

(b) The Board shall adopt reasonable rules and regulations for conducting investigations and examinations, and shall render all decisions and findings in writing to the Director of Building Inspection, with a duplicate copy to the applicant.

(c) The Board shall meet when required for the purpose of conducting business, on a date selected by the Board. A majority of the members shall constitute a quorum.

**SEC. 93.0105 ALTERNATE MATERIALS AND METHODS OF CONSTRUCTION**

The provisions of this Code are not intended to prevent the use of any material or method of construction not specifically prescribed by this Code, provided any such alternate has been approved.

The Director of Building Inspection may approve any such alternate, provided he finds that the material, method or work offered is for the purpose intended or at least the equivalent of that prescribed in this Code in quality, strength, effectiveness, durability and safety. Such determination shall be made in writing and a record kept which shall be open to the public.

The Building Official shall require that sufficient evidence or proof be submitted, that substantiates any claims that may be made regarding the use of such materials, methods or work.

**SEC. 93.0106 APPEALS**

When a question involving the interpretation of the intent and purposes of any provision of this Article, or the suitability of alternate materials and types of construction is presented to the Director of Building Inspection, he may request the Board of Appeals and Advisors to investigate such matters under the procedure established in Section 91.03 of this Code.

**SEC. 93.0107 RESPONSIBILITY**

This Code shall not be construed to relieve from, or lessen the responsibility of any party owning, operating, controlling, or installing any plumbing installation, fixtures, device, or materials, for damage to person or property caused by any defect therein; nor shall the City of San Diego or any officer or employee thereof enforcing this Code be held as assuming any such liability by reason of the inspections authorized herein, or certificate of inspection issued in accordance with the provisions of this Article.

**SEC. 93.0108 PROHIBITIONS**

It is unlawful for any person, either as owner, architect, contractor, artisan, or otherwise, to do or knowingly to cause to permit to be done any plumbing in such manner that the same shall not conform to all of the provisions of this Code.

**SEC. 93.0109 DEPARTMENT OF PUBLIC HEALTH—JURISDICTION AND AUTHORITY**

It shall be the duty of the Director of Public Health, and he is hereby directed, to enforce and administer the provisions of the following sections of the Plumbing Code:

Sections 93.0110 and 93.0111 regulating premises unfit for human occupancy.

Division 17, regulating Cesspools, Septic tanks and Subsurface Disposal Systems.

Before any permits for the construction of a septic tank or cesspool shall be issued under the provisions of Section 93.1701, fees in accordance with Section 93.0401 shall be collected therefor by the Department of Public Health.

**SEC. 93.0110 DEPARTMENT OF BUILDING INSPECTION—AUTHORITY TO CONDEMN PROPERTY**

When any building or premises has been inspected by the Department of Building Inspection and the plumbing is found to be defective or in violation of this division, notice to that effect shall be served upon the owner, or his agent, and the said notice shall specify the character of repairs and alterations, as specified in said notice, to be made. If such repairs and alterations, as specified in said notice, are not commenced in good faith within five (5) days from the date of the service of such notice, and completed within the time specified therein, the Department of Building Inspection may condemn the said property as being unsanitary and unfit for human habitation, and its occupancy thereafter is prohibited.

**SEC. 93.0111 DEPARTMENT OF BUILDING INSPECTION—CONDEMNATION NOTICE**

When a building has been condemned by the Department of Building Inspection of said City, the occupant or lessee, if there be any, shall immediately vacate the premises until such time as all repairs and alterations required by the Department of Building Inspection have been made. When a building has been condemned for any cause

by the Department of Building Inspection, there shall be placed thereon a placard, which shall read as follows:

ORDINANCE NO. 7373  
(New Series)

AN ORDINANCE AMENDING ARTICLE 1, CHAPTER IX, OF THE SAN DIEGO MUNICIPAL CODE BY ADDING THERETO SECTION 91.02.2, REGULATING BUILDING AND STRUCTURES.

BE IT ORDAINED, by the Council of The City of San Diego, as follows:

Section 1. That Article 1, Chapter IX, of the San Diego Municipal Code, be, and the same is hereby amended by adding thereto a new section to be known as and numbered, Section 91.02.2, and to read as follows:

"SEC. 91.02.2 UNIFORM BUILDING CODE CHANGED

The following specifically enumerated subsections shall be amendments or additions to sections of the Uniform Building Code:

(a) SEC. 4201 shall read as follows:

GENERAL - Interior wall and ceiling finish shall mean interior wainscoting, paneling, or other finish applied structurally or for decoration, acoustical correction, surface insulation, or similar purposes. Requirements for finishes shall not apply to trim, doors, windows or their frames, nor to materials which are less than one twenty-eighth inch (0.036") in thickness cemented to the surface of walls or ceilings, providing these materials have flame-spread characteristics no greater than paper of this thickness cemented to an incombustible backing.

(b) SEC. 4202 shall read as follows:

TESTING AND CLASSIFICATION OF MATERIALS - (a) Testing. Flame-spread characteristics of materials used for interior wall or ceiling finish shall be determined by one of the following methods:

1. The "Tunnel Test" as set forth in U.B.C. Standard No. 42.1.
2. The "Federal Specification SS-A 118b", as set forth in U.B.C. Standard No. 42.2.

3. Any other recognized method of testing procedure for determining the flame-spread characteristics of finish materials that will give comparable results to those specified in Subsections 1 or 2 of this section.

(b) Classification. The classes of interior finish materials based upon their flame-spread characteristics under the "Tunnel Test" or the "Federal Test" shall be as set forth in Table No. 42-A. These terms shall apply only to finish materials as specified in this Chapter.

(c) SEC. 4203 shall read as follows:

APPLICATION OF CONTROLLED INTERIOR FINISH. - Where interior-finish materials applied to walls and ceilings are regulated for purposes of limiting flame-spread, the following provisions shall apply:

TABLE 42-A. FLAME-SPREAD CLASSIFICATION.

MATERIAL QUALIFIED BY:

Class	Tunnel Test	Federal Specification Test
I	0 - 25	Class A
II	26 - 75	Class B & C
III	76 - 200	Class D*

\*Class III materials when tested under U.B.C. Standard No. 42-2 shall be subjected to the flame resistance test in Section 4.3.3 of this specification. If the flame does not reach the angle frame at any point within five minutes or less, the material shall be considered as approved Class III material.

1. Ceiling and wall finishes shall be cemented or otherwise fastened in place in such a manner that they will not readily become detached when subjected to room temperatures of 350° Fahrenheit for 20 minutes.

2. When walls and ceilings are required by any provision of this code to be of fire-resistive construction

the finish material of any class shall be applied directly against such fire-resistive construction, or to furring strips not exceeding one and three-fourth inches (1 3/4") applied directly against such surfaces. The intervening spaces between such furring strips shall be fire stopped. (See Sections 2512 and 3105 U.B.C. for fire-stopping requirements.)

3. Where walls and ceilings are required to be of fire-resistive construction and walls are set out or ceilings are dropped more than 1 3/4 in., Class I finish materials shall be used except where the finish materials are protected on both sides by an automatic fire extinguishing system, or are attached to an incombustible backing, or to furring strips installed as specified in Paragraph 2. The hangars and assembly members of such dropped ceilings that are below the main ceiling line shall be of incombustible materials. The construction of each such set out wall shall be of fire-resistive construction as required elsewhere in this Code. (See Sections 2512 and 3105, U.B.C., for fire-stopping requirements.)

4. Where walls and ceilings are not required to be incombustible or fire-resistive, and walls are set out or ceilings are dropped more than 1 3/4 in., flame spread limitations shall apply to both the exposed and back faces of interior wall and ceiling finish material, except where the finish material is applied against incombustible backing or where the finish material is protected on both sides by an automatic fire extinguishing system. (See Sections 2512 and 3105 U.B.C.)

5. Wall and ceiling finish materials of all classes as permitted in this Chapter may be installed directly against the wood decking or planking of heavy tim-

ber construction or to wood furring strips applied directly to the wood decking or planking installed and fire stopped as specified in Paragraph 2.

6. All interior wall or ceiling finish other than Class I material which is less than one-fourth (1/4) inch thick shall be applied directly against an incombustible backing unless the qualifying tests are made with the material suspended from the incombustible backing.

(d) SEC. 4204 shall read as follows:

FINISHES BASED ON OCCUPANCY. - The minimum flame-spread classification of interior finish, as determined by tests, shall be based on use or occupancy as set forth in Table No. 42-B.

TABLE 42-B. MINIMUM INTERIOR FINISH CLASSIFICATIONS.

Occupancy Group	Enclosed Vertical Exitways	Other Exitways	Rooms or Areas
A	I	I	II
B 1-2-4	I	I	II
B 3	I	II	II
C	I	II	II
D 1-2	I	I	II
D 3	I	I	III
E	I	II	III
F	I	II	III
G	I	II	III
H	I	I	III
I	No restrictions		
J	No restrictions		

EXCEPTIONS:

1. The exposed face of Type III heavy timber construction is excluded from these flame-spread requirements.

2. The interior wall finish in a lobby or foyer may be of the same flame-spread classification permitted in rooms and areas of like occupancies.

3. Except in Group D occupancies where personal liberties are restrained, and enclosed vertical exitways, Class III interior wall finish may be used as wainscoting extending not more than 48" above the floor

00672

and for tack and bulletin boards covering not more than 10% of the wall area.

4. In any occupancy where a complete automatic fire sprinkler system is provided interior wall and ceiling finish may be one classification less restrictive; where Class III wall and ceiling finish is indicated, the flame-spread may be 250.

5. The wall finish in rooms and areas in Group B-3 occupancies may be of Class III materials.

6. For rooms in Group C occupancies which exit directly to ground level, interior wall and ceiling finish may be Class III material.

7. In one story, Group D-3 occupancies, the interior wall finish in exitways may be of Class II material.

8. In one story buildings less than 8,000 square feet in area, housing Group F and G occupancies, wall and ceiling finish in hallways, exitways, may be of Class III material. In F and G occupancies more than two stories in height and not separated between floors, interior wall and ceiling finish in rooms and areas shall be of Class II materials.

9. Ceiling finish in A, B and F occupancies in conjunction with H occupancies shall be of Class I materials.

10. Wall and ceiling finish in halls and exitways of apartment houses designed to accommodate less than three families and hotels designed to accommodate less than six guests, and not more than two stories in height may be of Class III material.

(e) The EXCEPTIONS in subsection (1) of Section 4306 shall read as follows:

EXCEPTIONS:

1. Unlabeled passenger elevator hoistway doors may be installed if the panels are of equivalent fire re-

sistance.

2. Window frames bearing the manufacturer's fire window label may be installed in Class E or F openings, provided they are constructed in the following manner:

(1) Solid Section Steel Window Frame - One and One-quarter Inch Minimum Depth. The main frame, ventilator, and muntin section shall be not less than one-eighth inch in thickness and shall be assembled by welding, riveting or interlocking together. Windows shall be limited to 12 feet, one inch in either dimension and a maximum area of 84 square feet and may be provided with ventilators of hinged, pivoted, or projected types, not to exceed 60 inches in either dimension or not more than 3000 square inches in area.

Individual windows installed two or more in one opening and joined by vertical mullions shall not exceed seven feet in width and 12 feet in height.

The exposed area per light of glass shall not exceed 350 square inches. The inside of glazed windows shall be provided with glazing angles for the entire perimeter of the light. Outside glazed windows shall be prepared for putty glazing and wire clips.

All windows shall be equipped with manufacturer's standard locking hardware and erection fittings. The frame shall have provision for glazing with 1/4-inch wire glass.

(2) Solid Section Window Frame - One Inch Minimum Depth. The main frame, ventilator, and muntin sections shall be not less than one-eighth inch in thickness and shall be assembled by welding, riveting or interlocking together. Windows shall be limited to six feet, six inches in either dimension and a maximum area of 32 square feet, and may be provided with ventilators of hinged or projected type not to exceed 24 inches

by 48 inches. The exposed area per light of glass shall not exceed 200 square inches. The windows shall be outside putty glazed and prepared for wire glazing clips. All windows shall be equipped with the manufacturer's standard locking hardware and erection fittings. The frame shall have provision for glazing with 1/4-inch wire glass.

(3) Cold Formed Steel Window Frame, Double Hung Type. The members, except frame sill and head cover strips, shall be rolled or formed of 18 gauge minimum galvanized steel or 16 gauge minimum plain steel and shall be assembled by welding or riveting. Frame sill members shall be of 14 gauge minimum galvanized or plain steel; head cover strips shall be of 22 gauge minimum galvanized steel. Windows shall be limited to six feet in width and ten feet in height.

The exposed area per light of glass shall not exceed 505 square inches when one and one-half inch wide muntins are used, or 720 square inches when one and three-quarters inch wide muntins are used. The sash shall be provided with inside glass stops for the entire perimeter of each light.

All windows shall be counter-weighted and equipped with the manufacturer's standard locking hardware and erection fittings. The frame shall have provision for glazing with 1/4-inch wire glass.

Section 2. This ordinance shall take effect and be in force on the thirty-first day from and after its passage.

ORDINANCE NO. 7376 (NEW SERIES)

AN ORDINANCE AMENDING ARTICLE I, CHAPTER IX, OF THE SAN DIEGO MUNICIPAL CODE, BY ADDING THERETO SECTION 91.02.2, REGULATING BUILDING AND STRUCTURES.

BE IT ORDAINED, by the Council of The City of San Diego, as follows: Section 1. That Article I, Chapter IX, of the San Diego Municipal Code, be, and the same is hereby amended by adding thereto a new section to be known as and numbered, Section 91.02.2, and to read as follows:

SEC. 91.02.2 UNIFORM BUILDING CODE CHANGE: The following specifically enumerated subsections shall be amendments or additions to sections of the Uniform Building Code:

(a) SEC 4201 shall read as follows: GENERAL-Interior wall and ceiling finish shall mean interior wainscoting, paneling, or other finish applied structurally or for decoration, acoustical correction, surface insulation, or similar purposes. Requirements for finishes shall not apply to trim, doors, windows or their frames, nor to materials which are less than one twenty-eighth inch (0.038") in thickness cemented to the surface of walls or ceilings, providing these materials have flame-spread characteristics no greater than paper of this thickness cemented to an incombustible backing.

(b) SEC. 4202 shall read as follows: TESTING AND CLASSIFICATION OF MATERIALS. (a) Testing. Flame-spread characteristics of materials used for interior wall or ceiling finish shall be determined by one of the following methods:

1. The "Tunnel Test" as set forth in U.B.C. Standard No. 42.1. 2. The "Federal Specification SS-A 118b" as set forth in U.B.C. Standard No. 42.2. 3. Any other recognized method of testing procedure for determining the flame-spread characteristics of finish materials that will give comparable results to those specified in Subsections 1 or 2 of this section.

(b) Classification. The classes of interior finish materials based upon flame-spread characteristics under the "Tunnel Test" or the "Federal Test" shall be as set forth in Table No. 42-A. These terms shall apply only to finish materials as specified in this Chapter.

(c) SEC. 4203 shall read as follows: APPLICATION OF CONTROLLED INTERIOR FINISH. Where interior finish materials applied to walls and ceilings are regulated for purposes of limiting flame-spread, the following provisions shall apply:

TABLE 42-A. F.L.A.M.E. SPREAD CLASSIFICATION. Material qualified by:

Table with 3 columns: Class, Tunnel Test, Federal Specification. Rows include Class I, II, III, and Class A, B, C, D, E, F, G, H, J.

Class III materials when tested under U.B.C. Standard No. 42-3 shall be subjected to the flame resistance test in Section 4.2.3 of this specification. If the flame does not reach the angle frame at any point within five minutes or less, the material shall be considered, as approved Class III material.

1. Ceiling and wall finishes shall be cemented or otherwise fastened in place in such a manner that they will not readily become detached when subjected to room temperatures of 300° Fahrenheit for 30 minutes.

2. When walls and ceilings are required by any provision of this code to be of fire-resistant construction the finish material of any class shall be applied directly against such fire-resistant construction, or to furring strips not exceeding one and three-fourth inches (1 3/4") applied directly against such surfaces. The intervening space between such furring strips shall be fire-stopped. (See Sections 91.02 and 91.03 U.B.C. for fire-stopping requirements.)

3. Where walls and ceilings are required to be of fire-resistant construction and walls are set out or ceilings are dropped more than 1 1/2 inches, Class I finish materials shall be used except where the finish materials are protected on both sides by an approved fire-resisting system.

4. Where walls and ceilings are not required to be incombustible or fire-resistant, and walls are set out or ceilings are dropped more than 1 1/2 inches, the exposed and finished wall and ceiling shall, except where material is applied against incombustible backing or material is protected on both sides by an approved fire-resisting system, be of Class I material. (U.B.C.)

6. All interior wall or ceiling finish other than Class I material which is less than one-fourth (1/4) inch thick shall be applied directly against an incombustible backing unless the qualifying tests are made with the material suspended from the incombustible backing. (d) SEC. 4204 shall read as follows: FINISHES BASED ON OCCUPANCY-The minimum flame-spread classification of interior finish, as determined by tests, shall be based on use or occupancy as set forth in Table No. 42-B.

TABLE 42-B. MINIMUM INTERIOR FINISH CLASSIFICATIONS. Table with 4 columns: Occupancy Group, Enclosed Vertical Exitways, Other Exitways, Rooms or Areas.

EXCEPTIONS: 1. The exposed face of Type III heavy timber construction is excluded from these flame-spread requirements.

2. The interior wall finish in a lobby or foyer may be of the same flame-spread classification permitted in rooms and areas of like occupancies.

3. Except in Group D occupancies where personal liberties are restrained, and enclosed vertical exitways, Class III interior wall finish may be used as wainscoting extending not more than 48" above the floor and for tack and bulletin boards covering not more than 10% of the wall area.

4. In any occupancy where a complete automatic fire sprinkler system is provided interior wall and ceiling finish may be one classification less restrictive; where Class III wall and ceiling finish is indicated, the flame-spread may be 250.

5. The wall finish in rooms and areas in Group B-3 occupancies may be of Class III materials.

6. For rooms in Group C occupancies which exit directly to ground level, interior wall and ceiling finish may be Class III material.

7. In one story, Group D-3 occupancies, the interior wall finish in exitways may be of Class II material.

8. In one story buildings less than 2,000 square feet in area, housing Group F and G occupancies, wall and ceiling finish in Class III material. In F and G occupancies more than two stories in height and not separated between floors, interior wall and ceiling finish in rooms and areas shall be of Class II materials.

9. Ceiling finish in A, B and F occupancies in conjunction with H occupancies shall be of Class I materials.

10. Wall and ceiling finish in halls and exitways of apartment houses designed to accommodate less than three families and hotels designed to accommodate less than six guests, and not more than two stories in height may be of Class III material.

(e) The EXCEPTIONS in subsection (1) of Section 4204 shall read as follows:

EXCEPTIONS: 1. Unlabeled passenger elevator hoistway doors may be installed if the panels are of equivalent fire resistance.

2. Window frames bearing the manufacturer's fire window label may be installed in Class E or F openings, provided they are constructed in the following manner:

(1) Solid Section Steel Window Frame-One and One-quarter Inch Minimum Depth. The main frame, ventilator, and muntin section shall be not less than one-eighth inch in thickness and shall be assembled by welding, riveting or interlocking together. Windows shall be limited to 12 feet, one inch in either dimension and a maximum area of 54 square feet and may be provided with ventilators of hinged, pivoted, or projected types, not to exceed 60 inches in either dimension or not more than 3000 square inches in area.

Individual windows installed two or more in one opening and joined by vertical mullions shall not exceed seven feet in width and 12 feet in height.

The exposed area per light of glass shall not exceed 350 square inches. The inside of glazed windows shall be provided with glazing angles for the entire perimeter of the light. Outside glazed windows shall be prepared for putty glazing and wire clips.

All windows shall be equipped with manufacturer's standard locking hardware and erection fittings. The frame shall have provision for glazing with 1/4-inch wire glass.

(2) Solid Section Window Frame-One Inch Minimum Depth. The main frame, ventilator, and muntin sections shall be not less than one-eighth inch in thickness and shall be assembled by welding, riveting or interlocking together. Windows shall be limited to 12 feet, one inch in either dimension and a maximum area of 54 square feet and may be provided with ventilators of hinged or projected type not to exceed 24 inches by 48 inches. The exposed area per light of glass shall not exceed 200 square inches. The windows shall be outside putty glazed and prepared for wire glazing clips. All windows shall be equipped with the manufacturer's standard locking hardware and erection fittings. The frame shall have provision for glazing with 1/4-inch wire glass.

(3) Cold Formed Steel Window Frame, Double Hung Type. The members, except frame sill and head cover strips shall be rolled or formed of 13 gauge minimum galvanized steel or 16 gauge minimum plain steel and shall be assembled by welding or riveting. Frame sill members shall be of 14 gauge minimum galvanized or plain steel; head cover strips, shall be of 22 gauge minimum galvanized steel. Windows shall be limited to six feet in width and ten feet in height. The exposed area per light of glass shall not exceed 505 square inches when one and one-half inch wide muntins are used, or 720 square inches when one and three-quarters inch wide muntins are used. The sash shall be provided with inside glass stops for the entire perimeter of each light.

All windows shall be counter-weighted and equipped with the manufacturer's standard locking hardware and erection fittings. The frame shall have provision for glazing with 1/4-inch wire glass.

Section 2. This ordinance shall take effect and be in force on the thirty-first day from and after its passage. Passed and adopted by the Council of the City of San Diego, California, this 14th day of March, 1957, by the following vote, to-wit:

(New Series)

AN ORDINANCE INCORPORATING A PORTION OF LOT 18, LA MESA COLONY, IN THE CITY OF SAN DIEGO, CALIFORNIA, INTO R-4 ZONE, AS DEFINED BY SECTION 101.0408 OF THE SAN DIEGO MUNICIPAL CODE, AND REPEALING ORDINANCE No. 13558, ADOPTED JULY 5, 1932, INSOFAR AS THE SAME CONFLICTS HEREWITH.

WHEREAS, pursuant to section 101.0206 of the San Diego Municipal Code, the City Planning Commission fixed and determined a time and place for a public hearing upon a proposed rezoning of a portion of Lot 18, La Mesa Colony, in The City of San Diego, California, as indicated on Planning Commission Zone Map Drawing No. B-767, attached to Planning Commission communication on file in the office of the City Clerk as Document No. 548098; and

WHEREAS, after due notice duly and regularly given, hearings were duly held and all persons interested were given an opportunity to appear and be heard before said Planning Commission; and

WHEREAS, the area as designated on zone Map Drawing No. B-767.1 is proposed to be subdivided, whereby provision will be made for the installation of public utility services and for the dedication of streets, alleys and easements for public uses; and

WHEREAS, the City Planning Commission, by a vote of 5 to 0 has filed a recommendation with the Council of said City as contained in Document No. 548098, filed February 13, 1957, recommending that a portion of Lot 18, La Mesa Colony, in The City of San Diego, California, as indicated on Zone Map Drawing No. B-767.1 be incorporated into R-4 zone, the restrictions of said zone to attach upon the recordation of a final subdivision map of said area; and

00734

WHEREAS, said Council, after public hearing, is of the opinion that the best interests of the people of San Diego will be subserved by adopting the recommendation; NOW, THEREFORE,

BE IT ORDAINED, by the Council of The City of San Diego, as follows:

Section 1. That if, as and when, and in the event that within one year of the effective date of this ordinance, a portion of Lot 18, La Mesa Colony, in The City of San Diego, California, as indicated on Zone Map Drawing No. B-767.1 contained in City Clerk's Document No. 548098 is resubdivided, and a final subdivision map thereof duly recorded, and within such subdivision, provision is made for the installation of public utility services and the dedication of streets, alleys and easements for public use, the provisions of section 101.0408 of the San Diego Municipal Code shall attach and become applicable to the said subdivided lands and said subdivided lands shall be incorporated into R-4 zone as described by section 101.0408 of the San Diego Municipal Code, the boundary of such zone to be as indicated on Zone Map Drawing No. B-767.1 as filed in the office of the City Clerk as Document No. 548098;

Section 2. That in the event the zoning restriction shall attach to the said resubdivided lands described in section 1 of this ordinance, Ordinance No. 13558 of the ordinances of The City of San Diego, adopted July 5, 1932, and entitled, "An Ordinance incorporating a portion of La Mesa Colony and vicinity, in the City of San Diego, California, into R-1, R-2, R-4 and C Zones, as defined by ordinance No. 8924 of the ordinances of said City, and amendments thereto.", be, and the same is hereby repealed insofar as the same conflicts herewith.

Section 3. This ordinance shall take effect and be in force on the thirty-first day from and after its passage.

AN ORDINANCE INCORPORATING A PORTION OF LOT 18, LA MESA COLONY, IN THE CITY OF SAN DIEGO, CALIFORNIA, INTO R-4 ZONE, AS DEFINED BY SECTION 161.6408 OF THE SAN DIEGO MUNICIPAL CODE, AND REPEALING ORDINANCE NO. 13558, ADOPTED JULY 5, 1952, IN SO FAR AS THE SAME CONFLICTS HEREWITH.

WHEREAS, pursuant to section 101.0206 of the San Diego Municipal Code, the City Planning Commission fixed and determined a time and place for a public hearing upon a proposed rezoning of a portion of Lot 18, La Mesa Colony, in the City of San Diego, California, as indicated on Planning Commission Zone Map Drawing No. B-767, attached to Planning Commission communication on file in the office of the City Clerk as Document No. 548088; and

WHEREAS, after due notice duly and regularly given, hearings were duly held and all persons interested were given an opportunity to appear and be heard before said Planning Commission; and

WHEREAS, the area as designated on some Map Drawing No. B-767.1 is proposed to be subdivided, whereby provision will be made for the installation of public utility services and for the dedication of streets, alleys and easements for public uses; and

WHEREAS, the City Planning Commission, by a vote of 5 to 0 has filed a recommendation with the Council of said City as contained in Document No. 548088, filed February 13, 1957, recommending that a portion of Lot 18, La Mesa Colony, in the City of San Diego, California, as indicated on some Map Drawing No. B-767.1 be incorporated into R-4 zone, the restrictions of said zone to attach upon the recordation of a final subdivision map of said area; and

WHEREAS, said Council, after public hearing, is of the opinion that the best interests of the people of San Diego will be subserved by adopting the recommendation: NOW, THEREFORE

BE IT ORDAINED, by the Council of The City of San Diego, as follows:

Section 1. That if, as and when, and in the event that within one year of the effective date of this ordinance, a portion of Lot 18, La Mesa Colony, in the City of San Diego, California, as indicated on Zone Map Drawing No. B-767.1 contained in City Clerk's Document No. 548088 is resubdivided, and a final subdivision map thereof duly recorded, and within such subdivision, provision is made for the installation of public utility services and the dedication of streets, alleys and easements for public use, the provisions of section 161.6408 of the San Diego Municipal Code shall attach and become applicable to the said subdivided lands and said subdivided lands shall be incorporated into R-4 zone as described by section 161.6408 of the San Diego Municipal Code, the boundary of such zone to be as indicated on Zone Map Drawing No. B-767.1 as filed in the office of the City Clerk as Document No. 548088;

Section 2. That in the event the said restriction shall attach to the said subdivided lands described in section 1 of this ordinance, Ordinance No. 13558 of the ordinances of The City of San Diego, adopted July 5, 1952, and entitled, "An Ordinance incorporating a portion of La Mesa Colony and vicinity, in the City of San Diego, California, into R-1, R-2, R-4 and C Zones, as defined by ordinance No. 8824 of the ordinances of said City, and amendments thereto," be, and the same is hereby repealed insofar as the same conflicts herewith.

Section 3. This ordinance shall take effect and be in force on the thirty-first day from and after its passage. Passed and adopted by the Council of the City of San Diego, California, this 31st day of March, 1957, by the following vote, to-wit:

ORDINANCE NO. 7400  
(NEW SERIES)

AN ORDINANCE ALLOWING THE SAN DIEGO & ARIZONA EASTERN RAILWAY COMPANY TO CONSTRUCT, MAINTAIN AND OPERATE A SPUR TRACK ALONG AND ACROSS COMMERCIAL STREET ADJACENT TO BLOCKS 104 AND 107 CENTRAL PARK ADDITION, BETWEEN 30TH STREET AND 32ND STREET IN THE CITY OF SAN DIEGO, AND REPEALING ORDINANCE NO. 7268 (NEW SERIES), ADOPTED DECEMBER 27, 1956.

WHEREAS, the San Diego & Arizona Eastern Railway Company has heretofore made its application to The City of San Diego for revision of Charter permit granted said company by Ordinance No. 7268 (New Series), for the reason that it now appears the spur track in question should be re-located in order to serve the purpose of the application, and said request to construct, maintain and operate a spur track should read "on Commercial Street between 30th and 32nd Streets, in the City of San Diego"; and

WHEREAS, it appears to the Council that the construction, maintenance and operation of said spur track will promote the interests and welfare of The City of San Diego; and

WHEREAS, the City Manager recommended under date of March 8, 1957, filed as Document No. 550536 in the office of the City Clerk, that a Charter permit instead of a franchise be granted; NOW, THEREFORE,

BE IT ORDAINED By the Council of The City of San Diego, as follows:

Section 1. That permission be, and the same is hereby granted to the San Diego & Arizona Eastern Railway to construct, maintain and operate a spur track along and across Commercial Street adjacent to Blocks 104 and 107, Central Park Addition, between 30th and 32nd Streets in The City of San Diego, as shown on that print of Division Engineer Drawing No. E-1390, dated June 28, 1955, revised February 25, 1957, attached to said

petition and contained in said Document No. 549696, upon the following terms and conditions, to-wit:

First: That said spur track shall be kept and maintained at the official grade of such street over which the same shall pass, as such official grade is now or may hereafter be established or changed, and the City hereby reserves the right to grade, curb, sewer, macadamize, pave, gutter, culvert, or otherwise improve or repair or reimprove any part of said street over which said spur track may be laid, and to lay down or relay pipes for water, gas, electrical conduit, sewers or other purposes.

Second: That said Company shall pave or repave, and keep in repair said street between the rails of said track, and for at least two feet on each side thereof; and that said Company shall allow any other person doing business along the line of said spur track to use the same upon such compensation as the Council shall determine to be reasonable for such privilege, and further that cars shall not be permitted to stand on the track in said street.

Third: That all cars shall be operated upon said spur track in such manner as to cause the least possible obstruction to ordinary public travel along or across the same, and no cars shall be allowed to remain on said spur track for a longer period of time than is necessary to expeditiously load or unload the same.

Fourth: The rights and privileges granted by this ordinance are made upon the further condition that said spur track shall be at all times subject to regulation of the Council of said City. That nothing herein contained shall be so construed as to prevent the Council from altering, amending or repealing this grant, or amending or repealing this ordinance in any and all respects.

Fifth: That said City of San Diego shall have the right to use said spur track at any time, without cost to said City.

Sixth: That the permission granted by this ordinance shall be revocable at the will of the Council of said City.

Section 2. It is expressly provided that nothing herein contained shall be construed to extend the permit or time of any franchise heretofore granted either to petitioner or to any other company.

Section 3. The above permission is granted upon the further express condition that said San Diego & Arizona Eastern Railway Company shall pay to The City of San Diego the sum of One Hundred Dollars (\$100.00) per year, payable in advance, as rental for each year that said spur track is in place. This rental shall be subject to change at the pleasure of said Council.

Section 4. Failure on the part of said San Diego & Arizona Eastern Railway Company to conform to any or all of the provisions of this ordinance shall operate as an immediate forfeiture of the privileges herein granted.

Section 5. That Ordinance No. 7263 (New Series) of the ordinances of The City of San Diego, adopted December 27, 1956, be, and the same is hereby repealed.

Section 6. This ordinance shall take effect and be in force on the thirty-first day from and after its passage.
