

BULLETIN

NO.: 25-63

DATE: April 23, 2025

TO: All Personnel

FROM: Kevin Pendleton, Battalion Chief, Training & Education Division

SUBJECT: Training Props at FS10 and FS38

The Training & Education Division finalized two multi-purpose sea container-based auxiliary training props located at Fire Station 10 ([single story prop](#)) and Fire Station 38 ([two story prop](#)). Both props are equipped with flat roofs, pitched roofs, and many other features including digital attack panels, forcible entry door props, rescue manikins, and smoke generators.

To assist personnel with the proper use of these props and their training features a series of short tutorial videos are available on the [SDFD Training and Education Division website](#) under the Training Sites tab.

These videos can also be accessed at the point of use by scanning QR Codes on the props at both locations with a smartphone or iPad.

Crews interested in utilizing either prop should make a request through their Battalion Chief who will enter the training on the Divisional Outlook Calendar with the location **SDFD\_FS-10 Training Prop** or **SDFD\_FS-38 Training Prop**.

The Training & Education Division will provide materials needed to facilitate training upon request. If your training event requires consumable training materials (i.e. lumber, forcible entry dowels, etc) contact [SDFDTrainingdivision@sandiego.gov](mailto:SDFDTrainingdivision@sandiego.gov) at least 14 days prior to request these items.

Please be cognizant of your impact on the Fire Station crews and surrounding neighborhoods while conducting training (i.e., noise level, time of day). Crews utilizing the props are responsible to clean up after training and securing the training prop and equipment after use.

Lastly, these props were funded by Fire Tech and CALJAC programs with the training hours you've documented in Vector Solutions. Thank you for your continued diligence in logging training hours.

Special recognition to Assistant Fire Marshall Alex Kane for seeing these through from concept to creation.

Any additional questions can be directed to IST/Class Exam Coordinator J Jafari Harris @ [jjharris@sandiego.gov](mailto:jjharris@sandiego.gov) or 619-643-4594.
